

CAT Conference Call

April 29, 2010

Attendees

ABRFC: Billy O, Eric J, Jeff M

CNRFC: Rob H, Peter F

NERFC: Rob S, Ron H

NWRFC: Harold O, Joe I

NOHRSC: John H

OHD/HSD: Lee C, Pedro R, Dave R

1) Health Check on the Support Log

ABRFC:

Config manager not uploading. Recovery steps did not work. Live system is not running now due to files deleted by recovery process. Need to complete config upload in order to get DBs to sync. Right now DB on chps2 and chps5 do not sync. Symptom is DB on chps5 cannot not insert log data from chps2 DB.

Update: 5/4 – config uploaded, system working again

2) Install Status

NERFC:

1,2,3 and 4,5,6 installed, but they are not syncing. 1,2,3 directory structure is not yet arranged correctly. Running on 1,2,3 with new build. Running ok.

ABRFC:

Same

CNRFC:

4,5,6 installed, but not the March build yet.

NWRFC:

4,5,6 installed, configs loaded onto 4,5,6. May be running, but not sure. Working on making two independent data flows.

Action: Randy R: Provide a schematic of the correct data structure. Place it into the baseline description document.

Action: Edwin: Resend Baseline description document

3) CAT Workshop

Action: Edwin: Send Rob H the CAT workshop agenda

4) Action: To All: Please send SHEF Messages to John H so he can test his shefout to PI-XML translator. Especially messages that would not work with current CHPS SHEF decoder.
