# Key Messages for This Week

February 9, 2026  
10:45 AM

Valid Monday, February 9 to Monday, February 16, 2026

## Key Messages:

- Light rain chances Tuesday night into Wednesday, with the highest chances (40-65%) across west Kentucky and extreme southeast Missouri.
- Extended period of rain chances Thursday evening through Sunday, with the highest chances (50-70%) Saturday/Saturday night. Isolated thunderstorms possible. Current forecast rainfall amounts from 1 to 2.25 inches.
- In areas from southwest Indiana through the Interstate 64 corridor in Illinois, precipitation could become a wintry mix during the late night/early morning hours. No impacts expected at this time.
- Above normal temperatures over the next 7 days, with well above normal readings today and Tuesday, and again early next week.
