Practice HEAT SAFETY Wherever You Are

Heat related **deaths** are preventable.
Protect yourself and others from the
impacts of heat waves.

Job Sites

Stay hydrated and
take breaks in the shade
as often as possible

Indoors

Check up on the
elderly, sick and those
without AC

Vehicles

Never leave kids or
pets unattended -
LOOK before you LOCK

Outdoors

Limit strenuous outdoor
activities, find shade,
and stay hydrated

weather.gov/heat

Heat Impacts: *Vulnerable Populations*

PREGNANT

Extreme heat events have been associated with adverse birth outcomes such as low birth weight, preterm birth, infant mortality, and congenital cataracts.

NEWBORNS

Newborns are extra sensitive to heat because their ability to regulate body temperature is limited.

CHILDREN

Young children and infants are particularly vulnerable to heat, as their bodies are less able to adapt to heat than adults. Those under four are especially vulnerable.

ELDERLY

Older adults, especially those who have preexisting diseases, take certain medications, live alone or have limited mobility are at higher risk for heat illness.

CHRONIC ILLNESS

People with chronic medical conditions are more likely to have a serious health problem during a heat wave.
