Excessive Heat Warning Continues

**What:**
Temperatures in the mid to upper 90s combined with high humidity will cause heat index values between 105 to 120.

**Where:**
All of southeast Missouri, southern Illinois, western Kentucky, and southwest Indiana.

**When:**
Through Friday evening. Cooler air moves in this coming weekend.

**Action:**
Follow heat wave safety practices as heat is one of the most deadly weather hazards.

Heat Wave Safety Practices

**Heat** can escalate quickly.

Warm temperatures can quickly become dangerous. Heat is one of the most deadly weather hazards — don’t underestimate it.

- NEVER leave people or pets alone in a closed car
- Drink plenty of water, even if you don’t feel thirsty
- Wear loose-fitting, light-colored clothing
- Spend time in air conditioning and in the shade
