

About WFO Paducah

Background & Mission

The National Weather Service (NWS) is an agency under the National Oceanic and Atmospheric Administration (NOAA) and the Department of Commerce (DOC). “The National Weather Service provides weather, hydrologic, and climate forecasts and warnings for the United States, its territories, adjacent waters and ocean areas, for the protection of life and property and the enhancement of the national economy. NWS data and products form a national information database and infrastructure which can be used by other governmental agencies, the private sector, the public, and the global community.”

This mission is carried out by a highly trained workforce amidst a network of weather offices located throughout the United States and its territories. Through this network, the National Weather Service provides data to several user communities around the clock. Information is made available to the private sector through such outlets as the Family of Services, National Digital Forecast Database, and Emergency Managers Weather Information Network to meet specific and unique individual, corporate, and educational needs.

The National Weather Service offers:

- ✓ Warnings and Forecasts for Severe Weather, Winter Weather, Tropical Weather, and Non-Precipitation Hazards
- ✓ Warnings and Forecasts for the Aviation, Hydrologic, Fire Weather, and Marine Communities
- ✓ Digital and Text Forecasts for Various Weather Parameters through 7 Days
- ✓ Forecasts for General Weather Trends beyond 7 Days
- ✓ Incident-Specific Weather Forecasts for Emergency Management and Land Management Agencies in support of HAZMAT and Wild Fire Containment
- ✓ Multimedia Graphic Displays to assist in Decision Support Services
- ✓ High-Quality Data Collection and Distribution to the Private Sector
- ✓ Historical Databases of Climatological Phenomena
- ✓ Direct Line of Communication through Social Media and NWSChat

Within this framework, our priority for service to the nation is ***protection of life and property, and enhancement of the national economy***. For the National Weather Service in Paducah, this means constantly striving to provide timely and accurate weather services to best serve those who live, work, play, or vacation within our 58-county coverage area of southern Illinois, southwest Indiana, western Kentucky, and southeast Missouri. It's our part in a larger effort to build a Weather-Ready Nation.

NWS Office Configuration

Well over 100 National Weather Service Weather Forecast Offices (WFO) are strategically positioned throughout the United States. Each WFO is responsible for maintaining a multi-element forecast database within its forecast area for a running 7-day period. The always-current gridded forecast is assimilated into the larger National Digital Forecast Database—accessible to everyone. Each office also issues forecasts specific to various interests, such as aviation, hydrology, and fire weather. Additionally, the WFO disseminates a variety of hazardous weather watches, warnings, advisories, and statements for all counties within its designated warning area.

WFO Paducah's area of responsibility encompasses 58 counties across southeast Missouri, southern Illinois, southwest Indiana, and western Kentucky. Immediately surrounding WFO Paducah are other NWS offices located in Springfield and St. Louis, Missouri; Lincoln, Illinois; Indianapolis, Indiana; Louisville, Kentucky; Nashville and Memphis, Tennessee; and Little Rock, Arkansas.

The following map details the county configuration for the Paducah County Warning and Forecast Area (CWFA). WFO Paducah's area of responsibility encompasses these counties:

Zone Numbers & FIPS Codes

The following table contains Zone numbers and FIPS codes for all 58 counties within the WFO Paducah CWFA. These numbers are specific to each county in a particular state and are used to route various weather products to the appropriate users.

<i>County</i>	<i>Zone No.</i>	<i>FIPS Code</i>	<i>County</i>	<i>Zone No.</i>	<i>FIPS Code</i>
