

Appendix E: Product Cross Reference

The following tables provide a cross-reference between the AWIPS and WMO IDs for the text products listed in this guide. The product identifier part of the WMO ID is listed along with the first three characters of the AWIPS ID. For the entire WMO or AWIPS ID, append the issuing office's identifier. For example, the complete WMO ID for a Severe Thunderstorm Warning issued by WFO Paducah is WUUS53 KPAH, while the entire AWIPS ID is SVRPAH.

AWIPS ID	WMO ID
