

WMO messages: The use of county partitions will be appropriately identified below the && sign. Specifically, the Partition Tag Line will be located immediately after the LAT...LON line and before the TIME...MOT...LOC line or IBW Tags. Each element of the Partition Tag Line will use a six digit code corresponding to the six digit SAME location code, following the PSSCCC nomenclature, where P=partition number, SS=state and CCC=county.

WMO messages are disseminated over numerous dissemination pathways, to include NOAAPORT/SBN, NWWS, EMWIN and the API.

WMO product example, Clark County. The partition tag beginning with the number 8 indicates this polygon-based warning is located in the South partition.
