What has changed: Tropical Storm Warnings cancelled for SE NJ and Delmarva

Next Briefing: This is the final briefing.

Disclaimer: The information contained within is time-sensitive. Do not use after 9:00 AM EDT Friday.
Situation Overview

Tropical Storm Elsa

- Tropical Storm Warnings remain in effect for portions of coastal New Jersey, as well as the northern Atlantic Ocean coastal waters.
- Tropical Storm Elsa will move into the Northeast this morning.
- Heavy rainfall will taper off later this morning.
- Increased swells with a high rip current risk expected today.
## Situation Overview

### Tropical Storm Elsa

<table>
<thead>
<tr>
<th>Hazard</th>
<th>Impacts</th>
<th>Location</th>
<th>Timing</th>
</tr>
</thead>
<tbody>
<tr>
<td>Rainfall/Flash Flooding</td>
<td>Rainfall amounts of 1-3 inches, most of which has already fallen.</td>
<td>Across much of the region with the highest threat being over the I-95 urban corridor along with areas south and east.</td>
<td>Tapering off later this morning.</td>
</tr>
<tr>
<td>Wind</td>
<td>Tropical storm force winds could lead to scattered tree and power line damage.</td>
<td>All coastal areas of New Jersey.</td>
<td>Through this morning.</td>
</tr>
<tr>
<td>Tornados</td>
<td>A few isolated tornadoes could lead to locally enhanced wind damage.</td>
<td>Across eastern New Jersey.</td>
<td>Through early this morning.</td>
</tr>
<tr>
<td>Marine</td>
<td>There is the potential for dangerous conditions due to tropical storm force winds and seas 6-9 feet.</td>
<td>Coastal and nearshore waters across northern New Jersey.</td>
<td>Through this morning.</td>
</tr>
</tbody>
</table>
There is a potential for:

- Scattered tree damage and power outages, especially in the orange shaded area.
- Isolated instances of structural damage especially near the coast, where wind gusts to near hurricane strength are possible.
Storm Total rainfall forecast valid through this afternoon.

Locally, most rain will occur along the I-95 corridor through this morning.
- Heavy rain leading to flash flooding is possible across the region through this morning. Some river flooding is also possible. A Flash Flood Watch continues for most of New Jersey and portions of northeast Pennsylvania. Tropical Storm warnings remain in effect for coastal New Jersey.
- Increased swells and dangerous rip currents are expected today.

We have good confidence in the track of Elsa, but lower confidence in the intensity and rainfall amounts as the storm impacts our area.
