

Key Messages

- Critical Fire Weather Conditions will continue this evening and tomorrow.
- Warm temperatures, low afternoon humidity levels and gusty winds will lead to extreme fire behavior, with the potential for rapid rates of fire spread and growth.

Important Updates

- Extended Red Flag Warning to 9PM tonight, and upgraded the Fire Weather Watch for Tuesday to a Red Flag.

Next Scheduled Briefing

- This is the last scheduled briefing

Relative humidity of less than 15% for at least 3 hours

Winds of 25 mph or greater for at least 3 hours

Dry Fuels

Fire Weather Watch or Red Flag Warning Issued

Fire Weather Watches and Red Flag Warnings are also issued when scattered dry thunderstorms are expected and dry fuel conditions are present

- ✓ **Fire Weather Watch:**
 - ✓ Issued when critical fire weather conditions are possible within the next 24 to 96 hours
- ✓ **Red Flag Warning:**
 - ✓ Issued when critical fire weather conditions are likely within the next 12 to 48 hours
