| Fowl River | 14 15 | 2000CST 0500CST | | | 0 | 0 | 300K | | Flash Flood |
| Ten to Twelve inches of rainfall in a twelve hour period caused several roads to flood in the south parts of Mobile county, generally along and south of I-10. Flooding of the roads started about 800 pm Sunday evening and continued through 500 am Monday morning. Many roads had to be closed until water had drained from them. Many roads near the Fowl River became impassable and a portion of Lauendine Road was washed away. Traffic had to be rerouted until the road could be repaired. A couple of homes near the Fowl River had water in them and residents had to evacuate. A resident near the Fowl River, who raises exotic fish, saw rising water carry away most of his fish. As a result of the heavy rains, a sewer pipe collapsed spilling 400,000 gallons of untreated waste water into Halls Mill Creek. | | | | | | | | | |
| Baldwin County | | | | | | | | | |
| Daphne to Robertsdale | 14 15 | 2100CST 0500CST | | | 0 | 0 | 200K | | Flash Flood |
| Rains of around ten inches caused many roads to become impassable in the south central part of Baldwin county. People living along the Fish River were the hardest hit. The roads started flooding around 900 pm on Sunday evening and continued until 500 am Monday morning. High water cut a 7-foot gap across County Road 48 near Alabama 59. County Road 48 had to also be closed east of Fairhope. About a mile section of Main Street in Daphne had to be closed due to a washout. A couple of roads in the Robertsdale area had to also be closed due to washouts. Ten County bridges were still closed due to high water late Monday. | | | | | | | | | |
| Baldwin County | | | | | | | | | |
| Loxley | 14 | 2100CST | | | 0 | 0 | 25K | | Lightning |

| Stone County 4 NW Fox to Allison | 14 | 1810CST 1839CST | 16 | 880 | 5 | 5 | 2.5M | | Tornado (F4) |
| The tornado first touched down 4 miles northwest of Fox. It moved northeastward, passing south of Timbo, where some homes were damaged or destroyed and a number of trees were blown down. The tornado continued moving northeastward, causing some spotty damage through much of the county until the storm was 3.5 miles southwest of Allison. There, a house was completely destroyed and the first fatality occurred at approximately 730 pm CDT. The tornado then moved into Allison at around 738 pm CDT, damaging a resort area and destroying a bathhouse. The storm then struck a campground near the resort. As the tornado moved through the campground area, trees were downed on recreational vehicles, and several camping trailers were either overturned or tossed into a nearby creek. Four people were killed at the campground. The tornado exited Stone County at 739 pm CDT. Five people also sustained minor injuries. | | | | | | | | | |
| Damage along the track of the tornado was mostly F3. However, some structural damage was consistent with an F4 rating. Initial estimates place the amount of damage at around \$2,500,000. M71MH, F64MH, M65MH, F65MH, F53PH | | | | | | | | | |

| Izard County Sylamore to 2 SE Horseshoe Bend Arpt | 14 | 1839CST 1922CST | 28 | 880 | 2 | 30 | 5M | | Tornado (F4) |
| The Stone County tornado moved into Izard County at Sylamore at 739 pm CDT. The tornado destroyed several cabins. Luckily, the cabins were evacuated before the tornado arrived. Just east of the cabins, the tornado moved into a small subdivision where several homes were damaged and one destroyed. Two occupants in the destroyed home were thrown several hundred feet and killed. The storm continued to track northeastward along Highway 9, where isolated damage was noted. The tornado reached Melbourne around 800 pm CDT, damaging or destroying a number of homes and businesses. A Ford dealership was destroyed with a number of new cars totalled. A housing project and local community college were also damaged in Melbourne. The tornado continued northeast toward the town of Franklin and then lifted 3 miles southeast of Horseshoe Bend. Some downed trees were the only noted damage along the last few miles of the tornado's path. 30 people sustained minor injuries from the storm. | | | | | | | | | |
| Damage along the track of the tornado was mostly F3. However, some damage was consistent with an F4 rating. Initial estimates place the amount of damage at \$5,000,000. M54PH, F50PH | | | | | | | | | |

Severe thunderstorms moved across northwest Arkansas during the late evening of April 21st and early morning of April 22nd. The storms spawned 3 tornadoes in northwest Arkansas, and also produced damaging winds and large hail.

The first two tornadoes were produced by the same supercell thunderstorm which moved out of eastern Oklahoma across northwest Arkansas. The first tornado formed just across the Arkansas border in Sequoyah County, Oklahoma, and quickly crossed the Arkansas River into the city of Fort Smith at 2212CST. The tornado moved northeast through Fort Smith and entered Crawford County and the town of Van Buren at 2218CST. The tornado continued northeast and lifted at 2228CST 1 mile south of Rudy. 2 young children were killed in Fort Smith, 40 people were injured in Sebastian County, and 49 people were injured in Crawford County.

In Sebastian County, 35 homes were destroyed, 120 homes sustained major damage, 1133 homes had minor damage, and 88 businesses were damaged or destroyed. Several brick buildings in downtown Fort Smith were either damaged or destroyed. In Crawford County, 463 homes were destroyed, 500 homes sustained major damage, 142 homes had minor damage, 246 apartment units were damaged, and 10 businesses were damaged or destroyed. The tornado was on the ground for a total of 10 miles and reached a maximum width of 0.6 miles in both Fort Smith and Van Buren. The maximum intensity of the tornado was rated as F2 in Sebastian County and F3 in Crawford County.

The second tornado touched down at 2315CST 3 miles south of St. Paul and moved northeast for 15 miles before lifting at 2340CST 2 miles northeast of Venus. A man and his son were killed south of St. Paul when their mobile home was destroyed by the tornado, and 6 people were injured in Madison County by the tornado. The tornado destroyed 8 homes and damaged a church, and reached a maximum width of 0.6 miles. The maximum intensity of the tornado was rated as F3.

The third tornado touched down at 0108CST in the town of Natural Dam and remained on the ground for 1 mile before lifting at 0110CST 1 mile east of Natural Dam. Several homes were damaged by the 100 yard tornado, and the tornado was rated as F1 in intensity.

Damaging straight-line winds also occurred with the storms. Strong thunderstorm winds destroyed 1 home and 1 trailer house near Venus, injuring 2 people, and a trailer house was blown over in Venus. Strong winds destroyed a mobile home in Pettigrew and damaged a mobile home 2 miles west of St. Paul. A barn was destroyed, two houses were blown off their foundations, and a roof was blown off a house 2 miles north of Witter, and a roof was blown off a barn in Witter. Trees were downed and a roof was blown off a house 2 miles north of Rudy, and large tree limbs were downed and a roof was blown off a house 1 mile east of St. Paul. A roof was blown off a home at a cemetery in St. Paul, and trees and large tree limbs were also blown down in St. Paul, resulting in a gas line being broken. Fallen tree limbs damaged a boat and a vehicle in St. Paul.

Windows were blown out of a home in Van Buren, and thunderstorm winds estimated at 70 miles an hour blew the front porch off a home on High Street in Fort Smith and downed numerous signs and large tree limbs in Fort Smith. Thunderstorm winds gusted to 60 miles an hour in Eureka Springs.

Large hail also accompanied the storms. Softball size hail fell 3 miles west of Combs and near Combs, baseball size hail fell at Combs and at St. Paul, and 2 inch diameter hail fell 1 mile east of St. Paul. The hail broke 4 or 5 car windshields in St. Paul. Golfball size hail in Fayetteville caused 9 million dollars damage to homes and vehicles. 2000 homes and 2500 vehicles were damaged by the hail in Fayetteville. Golfball size hail destroyed a roof in Hindsville, and golfball size hail also fell at Farmington, at Prairie Grove, and at Greenland. Quarter size hail fell in Japton and 2 miles southwest of Japton, and dime size hail fell in Fort Smith.

| Crawford County Van Buren | 28 | 1750CST | | | 0 | 0 | | | Hail (0.75) |

Thunderstorms during the evening of April 21st and early morning of April 22nd produced very heavy rainfall which resulted in flash flooding in Washington and Madison Counties in northwest Arkansas. In Washington County, street flooding occurred in the eastern part of the city of Fayetteville, and in Madison County, War Eagle Creek and Kings River both overflowed their banks and flooded county roads. State Highway 23 was also partially flooded 3 miles north of Huntsville in Madison County.

| | 01 | 1500PST 1510PST | | | 0 | 0 | 1M | | Thunderstorm Wind |
|--|-----------|----------------------------|--|--|----------|----------|-----------|--|--------------------------|

A line of severe thunderstorms, associated with a bow echo indicated on the Sacramento WSR-88D at the time, produce straight-line damage in the San Joaquin River delta. Heaviest damage occurred to a boat marina (the source of the estimated value of damage). A local park also sustained damage in the form of 30 uprooted oak trees of more than 2 feet in diameter. On nearby Interstate 5, two tractor trailers were blown over on the highway, which runs north-south, by the strong westerly winds.

CAZ006-009

Sacramento Valley - Northern Sierra Nevada-West Slopes

| | 15 | 2300PST | | | 0 | 0 | | | Winter Storm |
| | 18 | 0300PST | | | | | | | |

A spring storm brought high winds to both the Sacramento Valley and northern Sierra Nevada mountain range. In the city of Folsom, CA, a 100-foot oak tree crashed into an apartment building, damaging 6 units. In Tuolumne County, 40000 customers lost electricity. Numerous motor vehicle accidents occurred in the mountains, including a tractor-trailer collision that released hazardous materials and temporarily closed Interstate 80.

CALIFORNIA, South Central

Merced County

**1 W Los Banos to
1 NW Los Banos**

| | | | | | | | | | |
|--|-----------|----------------------------|--|--|----------|----------|------------|----------|--------------------------------|
| | 01 | 1438PST 1443PST | | | 0 | 0 | 50K | 0 | Thunderstorm Wind (G60) |
|--|-----------|----------------------------|--|--|----------|----------|------------|----------|--------------------------------|

High wind from the SSW swept the western edge of the west Merced County town of Los Banos over a path length of 1 1/2 mile. Very small structures, trees, and powerlines received damage. Eyewitness accounts saw no funnel thus damage is attributed to downburst wind with associated thunderstorms rolling through the area in a "bow echo". High wind lifted one 10'x10' small hay storage structure during heavy rain. Another eyewitness watched powerlines being downed along with a small water utility structure. Additional damage was caused to other small structure tin roofing. This event could have been a very small F0 tornado but evidence appears to support thunderstorm wind.

Merced County

3 SW Los Banos

| | | | | | | | | | |
|--|-----------|----------------------------|--|--|----------|----------|------------|----------|--------------------------------|
| | 01 | 1445PST 1450PST | | | 0 | 0 | 20K | 0 | Thunderstorm Wind (G52) |
|--|-----------|----------------------------|--|--|----------|----------|------------|----------|--------------------------------|

High wind from the southwest flattened an older barn 3 miles SW of Los Banos in west Merced County per eyewitness reports. A California Division of Forestry and Fire Protection anemometer measured wind in the hour prior to 1500 PST at a location 10 miles west of Los Banos at 52 knots. This report would match with the line of thunderstorms developing along the San Joaquin Valley west side at that time.

Merced County

**3.5 S Gustine to
Gustine**

| | | | | | | | | | |
|--|-----------|----------------------------|--|--|----------|----------|-------------|-------------|--------------------------------|
| | 01 | 1445PST 1455PST | | | 0 | 0 | 230K | 100K | Thunderstorm Wind (G80) |
|--|-----------|----------------------------|--|--|----------|----------|-------------|-------------|--------------------------------|

In western Merced County high wind damaged trees and structures beginning 3 1/2 miles south of Gustine and ended with powerline and structure damage within the town itself. Only tree, very small structures, and some roof damage was apparent from 3 1/2 miles south of town to 2 miles south of town. About 2 miles south of Gustine and within a 1/2 mile path, a large, well constructed, 60'x60' wood barn, an historical slate rock building, trees, and 40'x100', wood barn were flattened. Eyewitness accounts attribute the damage to high wind only.

A potent spring storm strengthened as it made its way into Eastern Colorado. As a result, blizzard conditions developed over portions of Northeast Colorado. Strong northerly winds ranging from 25 to 50 mph, cold temperatures and heavy snowfall combined to create very hazardous conditions. The areas hardest hit by the storm included: Eastern Adams, Eastern Arapahoe, Eastern Elbert, Northern Lincoln and Washington Counties. Snow drifts anywhere from 3 to 4 feet high were whipped up by strong winds.

Several power outages were reported, especially around the Limon area, as high winds and heavy wet snow downed power lines. Numerous accidents were reported due to the the adverse weather conditions. As a result, several roads and highways were closed. Some of the more impressive snowfall totals included: 15 inches at Strasburg and Deer Trail, 10 inches at Arriba and 6-9 inches at Genoa, Larkspur, Last Chance, Limon and Kiowa Vicinity.

| | 13 | 0100MST | 0 | 0 | 0 | 0 | Winter Storm |
| | 14 | 0330MST | | | | | |

A strong winter storm moved across Colorado from the west starting on the morning of the 13th...bringing significant snowfall to the mountains and the plains. 6 to 12 inches of snow fell across the high terrain, while 4 to 8 inches fell across the plains. Steady 20 to 40 mph winds...with higher gusts from the north produced blowing snow and reduced visibilities, prompting many road closures across the higher elevations. Near blizzard conditions struck Colorado Springs causing many stranded vehicles. A cold front associated with this system then swept through that afternoon...produced high winds and substantial damage across the southeast plains. A gust of 69 mph was reported in La Junta in Otero county the evening of the 13th, knocking down fences, uprooting trees, and damaging 75 to 100 street signs. One mobile home was destroyed. In Fowler in Otero county, four roofs were blown off in the downtown area. Las Animas county reported up to 8 inches of snow, and wind gusts up to an estimated 70 mph, knocking out power to an estimated 6900 customers for about 3 hours late on the 13th and early on the 14th.

| CTZ003>004 | | 07 | Tolland - Windham | | 0 | 0 | | | Heavy Snow |
| | | 1800EST 08 1000EST | | | | | | | |
| | | | A low pressure system developed off the North Carolina coast and a nor'easter accompanied by heavy, wet snow began during the late afternoon and early evening on Easter Sunday. The maximum snowfall accumulation of around 6 inches was measured on grassy surfaces and in higher elevations. Union, in Tolland County, had 6.5 inches while only around 1 inch of snow fell in the Connecticut Valley, including 1 inch at Bradley International Airport in Windsor Locks. Pavements had much less accumulation and many roads remained just wet or slushy. | | | | | | |
| CTZ002>004 | | 09 | Hartford - Tolland - Windham | | 0 | 0 | | | Heavy Snow |
| | | 1800EST 10 1200EST | | | | | | | |
| | | | A low pressure system developed along the mid-Atlantic coast and intensified to 984 mb (29.06 in.) as its center passed right over Nantucket Island, MA at 10 AM on April 10th. This storm brought a record late-season snowfall to most of northern Connecticut and especially to the higher elevations. Windham and Storrs each recorded 17.0 inches; Willington had 15.5 inches; Union had 14.8 inches; Bristol, at an elevation of 800 feet, had 12.0 inches. Bradley International Airport in Windsor Locks had 7.0 inches. Seasonal snowfall totals reached new record maxima of well over 100 inches in many places. Since this was a late-season snowfall event, accumulation on pavement was much less. In Glastonbury, there was a total of 9 inches of snow on the grassy surfaces but only 3 inches on the pavement. The heavy, wet snow stuck to trees and power lines, resulting in many power outages. Up to 83,000 electric customers lost power statewide. Some final seasonal snowfall totals included: Bakersville, 131.9 inches; Putnam, 124.0 inches; and Bradley International Airport, Windsor Locks, 115.2 inches (old record 84.9 inches in 1993-1994). | | | | | | |

Two to 3 inches of rain fell on April 16th in northern Connecticut, with totals of 3 to 5 inches in the south portion of Hartford and Tolland Counties. All of the rain fell in about a 12-hour period. The ground had remained saturated from heavy snowmelt during the previous week and this combined with the heavy rain to produce urban flooding, flooding of small streams, and finally minor to moderate flooding of the major rivers. After a record snowfall during the first ten days of the month, wet and milder weather returned, resulting in the most significant mainstem river flooding along the Connecticut River in 9 years. A flash flood occurred in Berlin, where boats were needed to rescue people stuck in two cars on Route 71 at about 3 PM on the 16th. The North Branch of the Park River crested at Hartford at 12.9 feet at 4:23 PM on the 16th; flood stage is 8 feet. Moderate flooding was reported along the South Branch of the Park River at Hartford. The Farmington River crested at Simsbury at 12.17 feet at 9:30 PM on the 17th. The Connecticut River crested at Thompsonville at 6.61 feet at 1:15 AM on the 18th; flood stage is 5 feet. The Connecticut River crested at Hartford at 22.06 feet at 1:30 PM on the 18th; flood stage is 16 feet. Moderate flooding was reported along the Quinnipiac River at Hartford around 3 PM on the 16th. In general, during this event low-lying riverfront land and some roads were flooded, but no significant damage was reported.

| A low pressure system formed off the North Carolina Coast during Tuesday morning, April 9th. It intensified as it moved slowly northeast, passing near Cape Cod, MA around 7 am Wednesday morning, April 10th and northeast of Maine during Thursday morning. | | | | | | | | | |

With cold air in place, this system spread heavy wet snow across most parts of Southern Connecticut. The weight of the wet snow caused numerous trees and power lines to fall.

Here are some snowfall ranges:

For Fairfield County - from 3.0 inches at Bridgeport to 9.2 inches at Ridgefield.

For New Haven County - from 3.0 inches at Milford to 14.0 inches at Wolcott.

For Middlesex County - from 5.5 inches at Old Saybrook to 9.0 inches at Haddam.

For New London County - from 8.5 inches at Groton and North Stonington to 14.0 inches at Norwich.

As a low pressure system over the midwest on Monday April 15th, moved northeast, its' associated warm and cold fronts moved across the area during the evening of Tuesday, April 16th.

With abundant moisture and unstable air in place, heavy rain and southeast winds gusting over 34 knots preceded the frontal passages.

In New Haven County, 12 hour rainfall amounts ranged from 2.83 inches at Oxford to 6.10 inches at East Haven. The following events occurred:

- o Moderate flooding occurred on the Wepawaug River in Milford CT, on the Quinnipiac River in Southington and Wallingford CT, on the Farm River in East Haven and North Branford CT, on the Muddy River in the Spring Lake area, and on Harbor Brook in Meriden CT. MacKenzie Reservoir, at the headwaters of the Muddy River, overtopped its emergency spillway. The reservoir level reached 196.8 feet. Mandatory evacuation of Clintonville CT, the nearest town downstream, occurs when the reservoir reaches 197 feet.

- o Five hundred forty seven (547) homes and 28 businesses suffered minor damages.

- o Three (3) small dams (2 in Middletown and 1 in Wallingford) were breached.

The total un-insured flood damage was about 1.5 million dollars according to preliminary damage assessments by the Connecticut Office of Emergency Management and the Federal Emergency Management Agency.

As a low pressure system over the midwest on Monday April 15th, moved northeast, its' associated warm and cold fronts moved across the area during the evening of Tuesday, April 16th.

With abundant moisture and unstable air in place, heavy rain and southeast winds gusting over 34 knots preceded the frontal passages.

Heavy rain caused rapid and significant widespread river, small stream and urban (street, poor drainage and low-lying area) flooding.

Here are selected rainfall amounts:

- o For Fairfield County - from 1.73 inches at Bethel to 5.23 inches at Bridgeport.

- o For New Haven County - from 2.83 inches at Oxford to 6.10 inches at East Haven.

- o For Middlesex County - from less than 3 inches over the extreme southeast to at least 6 inches across the extreme northwest parts of the county.

- o For New London County - from 2.32 inches at Lebanon to 3.31 inches at Norwich.

| | 01 | 2010EST | | | 0 | 0 | | | Flash Flood |
| | 02 | 0240EST | | | | | | | |

A slow moving cold front and a separate low pressure system that moved off the Middle Atlantic Coast combined to produce heavy rain. About 1.50 inches of rain fell in a basinwide average across the Christina River; the heaviest occurred between 6 p.m. and 9 p.m. on the 1st. The heavy rain pushed the Christina out of its banks a little after 8 p.m.. It crested at 10.6 feet at 1115 p.m. (Flood Stage is 9 feet.) and was back within bankfull by 3 a.m. on the 2nd. No serious injuries or damage were reported.

New Castle County Northern

| | | | | | | | | | |
|--|-----------|----------------|--|--|----------|----------|--|--|--------------------|
| | 16 | 0530EST | | | 0 | 0 | | | Flash Flood |
| | | 1100EST | | | | | | | |

Heavy rain...which averaged around 2 inches in the headwater region of the Christina River Basin in Chester and New Castle Counties caused the flooding of several streams including the Christina. Most of the heavy rain fell between 11 p.m. EDT on the 15th and 6 a.m. EDT on the 16th. The Christina River reached its flood stage of 9 feet at 630 a.m. EDT, crested at 10.8 feet at 9 a.m. EDT and was back within bankfull by noon EDT. No serious damage or injuries were reported. But three young boys had to be rescued by boat from trees they were clinging to after they waded into and were swept downstream into the river. A fourth boy with them ran for help.

Storm totals included 2.20 inches in Honey Brook, 2.23 inches in Glenmoore, 1.55 inches in Chadds Ford, 1.40 inches in Newark and 1.09 inches in Wilmington. A slow moving cold front was responsible for the heavy rain. Weak low pressure systems moving north along the frontal boundary enhanced the heavy rain across Southeastern Pennsylvania and Northern Delaware.

| | 23 | 1815EST | | | 0 | 0 | | | Thunderstorm Wind |
| | | 1830EST | | | | | | | |

A squall line of severe thunderstorms tore down tree limbs and power lines in Northeast Cecil and adjoining New Castle County. Delmarva Power and Light reported about 4,000 homes lost power and all but 150 were restored by the next morning. Around the City of Wilmington four trees were uprooted in Riverview Cemetery, part of a roof was blown off of a hardware store. A plate glass window was blown out, part of the roof was peeled away from another store and the debris damaged three autos. In Edgemoor, numerous trees were knocked down and damaged two cars. Electrical wires were also ripped down and a roof was torn from a house in the Gordon Heights area.

|----|---------|--|--|--|---|---|-------------|--|--------------|
| 24 | 0700PST | | | | 0 | 0 | 100K | | |
| 26 | 1600PST | | | | | | | | Flood |

Flooding took place in Northern Idaho due to rain and snow melt at the mid elevations. One and a half to two in half inches of rain fell in the Panhandle of Idaho causing the St. Joseph and Coeur d'Alene Rivers to rise above flood stage. Both rivers peaked on April 25th. Several structures that were being repaired from the February flood were washed out. From the Coeur d'Alene flooding Latour Creek Road was covered with three feet of water isolating seventy-five families. A farmer reported 30 head of cattle drowned along Latour creek behind the Cataldo Mission. At Kingston between Enaville and Cataldo, there was water over the road and some homes were flooded. In the Rose Lake area, downstream from Cataldo, several homes and businesses were flooded. Damage from flooding from the St. Joe river caused Benewah county to be declared a disaster area. Two important dikes leaked causing flooding to occur in Benewah county.

| 24 | 0800MST | | | | 0 | 0 | 380K | | |
| | 1600MST | | | | | | | | High Wind (G75) |

High winds gusting upto 75 miles an hour ripped through Southeastern Idaho. Damage occurred in several communities. The most amount of damage occurred in Jefferson county where winds were sustained above 45 miles an hour for four hours with higher gusts. Insurance companies estimated damage at over \$250,000. Several power lines and trees were downed. Power line damage was estimated at \$90,000. Blowing dust from 68 mph winds closed I-15 between Idaho Falls and Roberts. Other parts of I-15 were closed for over 7 hours. State Highway 33 was also closed for three hours. In Madison County, shingles were blown off of several houses, roofs and sheds were damaged and several trees were toppled. In Butte and Fremont counties trees and power lines were downed. In the Smith Park community irrigation well lines were mangled, roofs were damaged and trees were toppled. St. Maries suffered a power outage due to trees downed on top of power lines. In Lemhi county, winds were sustained at 40 to 45 miles an hour and gusted to 60 miles an hour uprooting several trees.

| | | | | | | | | | King Jr. Drive and Marion St. on the northwestern corner of Mueller Park. The path of the storm then moved a little north of east, with damage centered along Lincoln Street to about 19th Street. At that point the damage path center appeared to move somewhat to the north, crossing 22nd Street between Cantrell and Roosevelt. The path then went across the Nelson Park Golf Course, where it knocked down over 100 trees, then crossed over the western portion of the Hwy 36 bridge before lifting. 88 homes were either damaged or destroyed, as well as, numerous businesses. Nine people sustained minor injuries. Also, 6 large utility poles on the Illinois Hwy 36 bridge were blown over, which trapped several motorists in their cars, though no one was injured. The damage is estimated around \$1.5 million. |

| Edgar County 3 NW Paris to 3 N Paris | 19 | 1610CST 1616CST | 2 | 440 | 0 | 0 | | | Tornado (F1) A tornado touched down 3 miles northwest of Paris. It destroyed a barn at this location then continued to the east northeast. The tornado caused damage to 6 farms in the area. It destroyed several machine sheds, a couple of barns and grain bins. One residence sustained moderate roof damage and another had several windows broken by baseball sized hail. The tornado lifted after crossing Hwy 1, 3 miles north of Paris. No injuries were reported and no damage estimate was available. |
| Edgar County Paris | 19 | 1610CST | | | 0 | 0 | | | Hail (1.75) |
| Edgar County 1.5 NNW Paris to 2 N Paris | 19 | 1612CST 1616CST | 1 | 220 | 0 | 0 | | | Tornado (F0) A tornado touched down 1.5 miles north northwest of Paris, near Cherry Point Road and W200. The tornado destroyed a machine shed at this location. The tornado then lifted briefly and touched back down at the intersection of Steidle Road and Tucker Beach Road where it damaged a three car garage. Then it continued to travel to the east northeast where it damaged another machine shed, blew down numerous trees, and damaged a baseball field. One of the light poles at the baseball field was ripped out of the ground and thrown across a nearby road. Also, the roof of one dugout was blown apart. At Twin Lakes Park, several benches, trees, and a small shed were damaged. It then travelled across the lake and flipped a boat lift upside down and blew down more trees before lifting and dissipating. No one was injured and no damage estimate was available. |

| A tornado touched down in Bath causing major damage to one home and minor damage to 11 homes. Also, 2 trailers were destroyed. In one of the trailers a woman sustained minor injuries when the tornado hit it. After going through Bath, the tomado continued to the northeast where it destroyed and uprooted numerous trees in the Bath Cemetery, blew down numerous power lines, destroyed numerous farm buildings and picked up a semi-truck and blew it into a nearby field. Only the one minor injury was reported and no damage estimate was available. | | | | | | | | | |
| Peoria County 1 SW Brimfield to 2.5 NE Brimfield | 19 | 1710CST 1716CST | 4 | 100 | 0 | 0 | | | Tornado (F0) |
| A tornado touched down 1 mile southwest of Brimfield and moved to the northeast into the south side of Brimfield, causing minor damage. The tornado then lifted to tree top level and caused some damage to trees in Jubilee State Park before lifting completely. The tornado uprooted a 12 inch diameter pine tree in Brimfield, caused rivets to pop out of the metal siding on one business, and damaged a steeple on one church. Also, a van parked in a driveway was moved sideways up against a bush in the yard. No injuries were reported and no damage estimate was available. | | | | | | | | | |
| Mason County 2 WSW Easton to 7 NE Easton | 19 | 1717CST 1730CST | 9 | 250 | 0 | 0 | | | Tornado (F1) |
| A tornado touched down 2 miles west southwest of Easton and travelled to the northeast. The tornado destroyed 1 home as it moved along the northwest side of Easton. It then lifted 3.5 miles to the northeast of Easton before touching down one mile later. It remained on the ground for 3 more miles, before lifting and dissipating. In all, two homes were destroyed, 5 sustained major damage, and the windows were blown out and the roof lifted up on the high school. Also, numerous power lines and trees were blown down. One barn and one home were lifted off their foundations. No injuries were reported and no damage estimate was available. | | | | | | | | | |
| Morgan County 2 E Jacksonville to 1 N Orleans | 19 | 1718CST 1728CST | 6 | 880 | 0 | 1 | 400K | 0 | Tornado (F2) |
| A tornado touched down 2 miles east of Jacksonville, at the MOBIL Chemical Plant, moving east over a portion of the Jacksonville Correctional Facility. "F2" damage was found along this portion of the tornado path. The tornado then lifted and remained aloft for 2 miles before touching down again. It remained on the ground for 2 more miles, lifting 1 mile north of Orleans. Two railroad cars were turned over at the MOBIL Chemical Plant, which itself sustained some roof damage. Also, it damaged two guard towers, a greenhouse, and a fence at the prison. To the east of the prison, one home was destroyed, 3 sustained major damage, and several farm buildings were either damaged or destroyed. One person sustained minor injuries at the prison and damage was estimated around \$400,000. | | | | | | | | | |
| Morgan County 2 E Alexander | 19 | 1731CST | 0.1 | 100 | 0 | 0 | | | Tornado (F0) |
| A tornado briefly touched down 2 miles east of Alexander. No damage was reported. | | | | | | | | | |
| Sangamon County 2 E New Berlin to 5 ENE New Berlin | 19 | 1732CST 1741CST | 4 | 330 | 0 | 0 | 250K | 0 | Tornado (F0) |
| A tornado briefly down 2 miles east of New Berlin, then lifted and touched down again 5 miles east northeast of New Berlin. The tornado caused major damage to one home, a barn, and machine shed, though no injuries were reported. Also, two other homes sustained minor damage. Two semis were blown over on I-72 (both trailers were empty) and no injuries were reported. Damage was estimated around \$250,000. | | | | | | | | | |

| 5 WNW Mc Lean to 3.6 W Funks Grove | 19 | 1809CST 1819CST | 4.8 | 880 | 0 | 0 | 1M | 0 | Tornado (F3) |
| | A tornado touched down just south of the Logan/Tazewell County line (on I350E), causing minor damage to three homes. Then the tornado travelled to the northeast, through the south side of Armington, destroying one home as well as several outbuildings. Also, 2 homes sustained major damage and 5 homes sustained minor damage. After moving through the Armington area, the tornado moved into southwestern McLean County. Here it destroyed a church and one home and caused major damage to another home in the area. Also, 8 homes sustained minor damage and numerous barns, outbuildings, grain bins, trees, and farm equipment were either damaged or destroyed. No injuries were reported. Damage was estimated around \$15,000 in Logan County, \$1 million in Tazewell County, and around \$1 million in McLean County. | | | | | | | | |
| Sangamon County | | | | | | | | | |
| Illiopolis | 19 | 1817CST | | | 0 | 0 | 0 | | Thunderstorm Wind |
| | Thunderstorm winds blew over a semi-trailer on I-72 near Illiopolis. No injuries were reported. | | | | | | | | |
| Macon County | | | | | | | | | |
| 2 SSW Niantic to 1 N Harristown | 19 | 1822CST 1827CST | 5.5 | 220 | 0 | 29 | 9M | 0 | Tornado (F2) |
| Macon County | | | | | | | | | |
| 1 N Harristown to 3 NE Decatur | 19 | 1827CST 1845CST | 9 | 440 | 0 | 29 | 9M | 0 | Tornado (F3) |
| | A tornado touched down 2 miles south southwest of Niantic and travelled to the east northeast causing extensive damage. It moved into Old Harristown at 727 pm destroying 4 to 5 homes, extensively damaging the remainder of the homes, tore the roof off of the old grade school gymnasium, and destroyed a grain silo. It continued to the east northeast and moved into the westside of Decatur at the intersection of Wyckles and Center Roads after crossing I-72, destroying a church at that intersection, as well as a couple of homes. Then the tornado lifted to tree top level for a short distance till it reached Ravina Park Road. "F3" damage was seen, as the tornado demolished a house in a gully area, then continued to move to the east northeast down Ravina Park Road, causing "F2" damage. The width of the tornado was from 1 1/2 to 2 blocks wide in this area. It then crossed Oakland Avenue, destroying the Sims Lumber Company, and then it lifted to tree top level again. It dropped down again near the intersection of Bloomington Road and Pythan Avenue, causing minor damage before lifting again just east of Morgan Street. The tornado touched down once more at the intersection of Pershing and 27th, causing damage to the roofs of several buildings at a manufacturing plant and damaging the surrounding fences before lifting. Twenty-nine people were injured, two seriously and damage was estimated around \$9 million. | | | | | | | | |
| Piatt County | | | | | | | | | |
| Milmine | 19 | 1855CST 1857CST | 0.3 | 50 | 0 | 0 | 500K | 0 | Tornado (F1) |
| | A tornado briefly touched down in Milmine completely destroying a new grain bin, throwing a grain auger across the railroad tracks, and caused minor damage to some homes in town, mainly some shingle and window damage. Also, several trees were blown down, windows on a number of cars were broken and several large trucks were overturned. No injuries were reported and damage was estimated around \$500,000. | | | | | | | | |
| Piatt County | | | | | | | | | |
| 3 S Monticello to 2 SE Monticello | 19 | 1900CST 1910CST | 2 | 300 | 0 | 1 | 1M | 0 | Tornado (F1) |
| | A tornado touched down briefly 3 miles south of Monticello, in the Breezy Meadows subdivision where it destroyed 2 homes, seriously damaged a third, caused major damage to a church and a metal machine shed. The tornado then lifted and travelled to the northeast touching down 2 miles southeast of Monticello at the Monticello Airport. Again, the tornado was only on the ground briefly, destroying 3 single engine planes, 2 gliders, a hanger and caused major damage to another hanger before lifting and dissipating. Only one minor injury was reported and damage was estimated around \$1 million. | | | | | | | | |
| Clay County | | | | | | | | | |
| 3.5 NW Xenia to 2.5 NNW Xenia | 19 | 1910CST 1914CST | 2 | 50 | 0 | 0 | 0 | | Tornado (F0) |
| | A tornado moved into Clay County, 3.5 miles northwest of Xenia, from Marion County. It continued to the northeast before lifting 2.5 miles north northwest of Xenia. Damage was limited to some downed trees on the north end of Greendale Lake. No injuries were reported and no damage estimate was available. | | | | | | | | |
| Clay County | | | | | | | | | |
| Flora | 19 | 1926CST | | | 0 | 0 | 0 | | Thunderstorm Wind |
| | Thunderstorm winds blew over several trees and power lines in Flora. | | | | | | | | |

| Champaign County 1 N Savoy to 1 SE Urbana | 19 | 1934CST 1947CST | 4 | 220 | 0 | 12 | 9M | 0 | Tornado (F3) |
| A tornado briefly touched down 1 mile north of Savoy (near Rt. 45 and Curtis Road) and destroyed 3 homes under construction. Then the tornado lifted, travelled to the northeast, and touched down again 1 mile south of Urbana. The tornado destroyed 30 homes, caused moderate damage to 29 homes and one business, and minor damage to 54 homes and 4 businesses. Twelve people were injured and damage was estimated between \$7 and \$11 million. | | | | | | | | | |
| Champaign County (Cmi)Willard Fld Cha | 19 | 1934CST | | | 0 | 0 | | | Thunderstorm Wind (G65) |
| Champaign County .5 SW Ogden to 1 NNE Ogden | 19 | 1955CST 1958CST | 2 | 1500 | 1 | 13 | | 0 | Tornado (F3) |
| A tornado touched down half a mile to the southwest of Ogden and travelled to the northeast right through the middle of the town. The tornado destroyed 68 homes, 12 businesses, 3 churches, the library, and a grade school. Once east of town, the tornado crossed I-74, where it killed a woman who was riding in a semi with her husband. The semi and trailer were picked up and rolled into a field. The woman, who had been in the sleeper portion, was thrown about 30 yards from the truck. She was killed instantly. After rolling the semi, the tornado damaged 2 more homes before lifting and dissipating 1 mile north northeast of Ogden. Back in Ogden the damage was variable. One house would have significant damage, when a nearby structure would only have minor damage. In addition to the destroyed homes and businesses, 128 homes and 8 businesses sustained major damage and 51 homes and 12 businesses had minor damage. With it's larger width, it appears that this tornado had multiple circulations within the parent tornado. Overall, one woman was killed and thirteen people were injured. No damage estimate was available yet. F55VE | | | | | | | | | |
| Effingham County Countywide | 19 | 1958CST | | | 0 | 1 | | 0 | Thunderstorm Wind |
| Thunderstorm winds blew down numerous trees and power lines throughout the county. Also, in Teutopolis, winds blew down a tree onto a parked car. A woman in the car sustained minor injuries. | | | | | | | | | |
| Richland County Countywide | 19 | 1958CST | | | 0 | 0 | | 0 | Thunderstorm Wind |
| Thunderstorm winds blew apart a trailer 3 miles northwest of Olney and its contents were strung out along the roadway. No injuries were reported. Also, numerous trees and power lines were blown down throughout the county. No damage estimate was available. | | | | | | | | | |
| Vermilion County 1 NW Catlin | 19 | 2008CST | 0.1 | 100 | 0 | 0 | | | Tornado (F0) |
| A tornado briefly touched down in a field 1 mile northwest of Catlin. No damage was reported. | | | | | | | | | |
| Lawrence County Chauncey | 19 | 2037CST | | | 0 | 0 | | 0 | Thunderstorm Wind |

| | 28 | 0915CST 1115CST | | | 0 | 0 | | | High Wind (G53) |
| Strong gradient winds between 40 and 50 mph, with gusts to 61 mph, caused damage over a large area of Central Illinois. Numerous trees, tree limbs, and power lines were blown down. Also, a part of the roof and guttering on the Charleston High School, in Coles County, was blown off. Several barns and machine sheds sustained minor damage and one grain bin was blown over onto a car. No injuries were reported. A window in a business in Pana, Christian County, was blown out and the roof of the building sustained some damage. One tree fell onto a car in Forsyth, Macon County, though fortunately no one was in it at the time. Numerous houses throughout Central Illinois sustained some minor roof and siding damage as well. No damage estimate was available. | | | | | | | | | |

| Mchenry County Harvard | 19 | 2130CST | | | 0 | 0 | | | Thunderstorm Wind |
| The roof of a building was damaged on the northwest side of Harvard. | | | | | | | | | |
| Mchenry County Hebron to 2 SW Richmond | 19 | 2140CST 2150CST | | | 0 | 0 | 0 | | Thunderstorm Wind |
| At Hebron part of the roof of a house was torn off and a trailer truck was overturned on Price road just east of Hebron. About 2 miles east of Hebron, corn cribs and other outbuildings were damaged and trees were blown down. About 2 miles southwest of Richmond, farm buildings were damaged and part of the roof of a barn was torn off. | | | | | | | | | |
| Mchenry County 5 E Richmond | 19 | 2159CST | | | 0 | 0 | | | Thunderstorm Wind |
| Sheds and barns were damaged or destroyed near IL Route 173 and Wilmont Road. | | | | | | | | | |
| Lake County Fox Lake to Waukegan | 19 | 2200CST 2235CST | | | 0 | 2 | 5M | | Thunderstorm Wind |
| Thunderstorm winds caused considerable damage over northern Lake County. The storms entered northwest Lake County around 1100 pm CDT. Trees and power lines were blown down at Fox Lake, Chain O'Lakes and west of Antioch. Barns and other outbuildings were damaged at the Lake-McHenry County line west of Antioch. In Antioch a billboard was blown down, part of a house roof was torn away and garages were damaged. Many trees were downed. At Round Lake, the roof was blown off a building at a lumberyard. At Lindenhurst, 4 businesses and 12 homes were damaged by winds. Signs were blown down. A tree fell on a house. Trees were down throughout the village. Twenty six homes were damaged in Wadsworth. The Pyramid House sustained a quarter of a million dollars in damage. Several planes were damaged at the Waukegan Regional Airport. The roof of a house was torn off just west of the airport. In Beach Park a Tennessee Walker horse was killed when a barn collapsed. Several homes and garages were damaged. At Illinois Beach State Park, a tree fell on a tent injuring 2 campers. A 5 year old boy was taken to a hospital with a head injury. | | | | | | | | | |
| Cook County Park Forest | 19 | 2208CST | | | 0 | 0 | | | Hail (1.00) |
| Lake County Libertyville | 19 | 2222CST | | | 0 | 0 | | | Thunderstorm Wind |
| Trees were blown down, damaging a soccer complex. | | | | | | | | | |
| Lake County Zion | 19 | 2232CST 2235CST | 2 | 100 | 0 | 2 | 6.6M | | Tornado (F2) |
| The roof was torn off an apartment building. Over 400 homes and businesses sustained damage and 32 received major damage. Five trucks were overturned at a plant. Homes and garages had roof damage. Numerous trees were damaged or blown down. Injuries included a child with a broken leg and a woman cut by glass. | | | | | | | | | |

| Henderson County 3 W Bald Bluff | 19 | 1710CST 1716CST | 3.5 | 100 | 0 | 0 | 4M | | Tornado (F1) |
| | | | At least 2 tornados were responsible for damage to 15 homes, a barn, and many outbuildings. One farm lost one 50,000 bushel and three 2,000 bushel grain bins as well as \$20-30,000 of irrigation equipment. Many large and old trees were also snapped off and dumped into the streets and across rural roads, which slowed traffic through the area. | | | | | | |
| Henry County Lynn Center | 19 | 1739CST | | | 0 | 0 | | | Hail (1.75) |
| Henry County Cambridge | 19 | 1750CST | | | 0 | 0 | | | Hail (1.75) |

| Henry County Galva to Galva | 19 | 1810CST 1820CST | 0.5 | 50 | 0 | 4 | 10M | | Tornado (F0) |
| | | | 10 Million in damage and 4 hospitalized as this tornado moved from Bishop Hill through Galva. At least 6 Million of damage was reported in the city limits of Galva where 150 homes were damaged, 26 recieved extensive damage, and 15 had to be destroyed. Extensive damage was also recieved to the cities sewage treatment plant. Segment 2 was a small and short lived tornado which did much less damage to the eastern part of town, most notably pushing over gravestones in a cemetery and downing trees. | | | | | | |
| Henry County Galva | 19 | 1810CST | | | 0 | 0 | | | Thunderstorm Wind (G80) |
| | | | Power was cut to the City of Galva, Illinois. | | | | | | |
| Bureau County Tiskilwa | 19 | 1840CST | 0.1 | 10 | 0 | 0 | | | Tornado (F0) |
| | | | A tornado touched down briefly, striking a power pole, before lifting. | | | | | | |

| 4 SW Barnhill to 2 SW Barnhill | 19 | 2028CST 2030CST | 2 | 400 | 0 | 0 | 200K | | Tornado (F3) |
| Total damage was estimated around 3 million dollars. The tornado destroyed 3 homes and caused moderate to severe damage to 50 others. About 45 barns and outbuildings were damaged or destroyed, along with 60 to 70 grain bins. The small community of Piopolis was nearly devastated. The intensity of the tornado was just weak (F0 or F1) during most of its life, but it briefly reached F3 intensity. | | | | | | | | | |
| White County | | | | | | | | | |
| .7 W Carmi Muni Arpt to .5 NE Carmi Muni Arpt | 19 | 2030CST 2033CST | 1 | 100 | 0 | 0 | 1M | | Tornado (F1) |
| The short-lived tornado caused extensive damage to aircraft hangers and aircraft at the Carmi airport. Ten hangars were destroyed, along with eight small planes and an automobile. The windows were blown out of a church half a mile northeast of the airport, and one of its walls was damaged. Metal debris from the airport littered the church property. | | | | | | | | | |
| Wayne County | | | | | | | | | |
| Fairfield | 19 | 2035CST | | | 0 | 0 | | | Hail (2.50) |

| Jackson County | | | | | | | | | |
| Murphysboro | 19 | 2050CST | | | 0 | 0 | 1M | | Thunderstorm Wind |
| A Wal-mart store was partially unroofed, a house trailer was overturned, and many trees were blown down. A wind gust to 63 MPH was measured at Carbondale Airport. Several businesses in and near Murphysboro sustained roof damage, which allowed rain to damage the interior of the buildings. Mobile homes were severely damaged just east of Murphysboro. The Murphysboro Civic Center was heavily damaged when its roof was partially blown off, allowing the interior to flood. Power was out for up to 16 hours. | | | | | | | | | |
| Williamson County | | | | | | | | | |

| ILZ081-084>085 Franklin - Jackson - Williamson | | | | | | | | | |
| | 22 | 0400CST | | | 0 | 0 | 35K | 30K | Flood |
| | 30 | 2359CST | | | | | | | |
| The Big Muddy River reached 28.3 feet at Murphysboro on the 27th, over 10 feet above the flood stage of 16 feet. In Franklin County, a dairy farm was covered with water, and portions of Illinois Route 149 were threatened by rising water. Fewer than a half dozen homes were evacuated along the river in Jackson County. More heavy rain in May caused the river to reach a second crest. | | | | | | | | | |
| Jackson County | | | | | | | | | |
| Murphysboro | 22 | 0523CST 0900CST | | | 0 | 0 | 30K | | Flash Flood |
| Between 3 and 4 inches of rain caused many roads to cover with water. Rainfall rates of 1.3 inches per hour were observed at the Carbondale Airport. Schools were cancelled in Murphysboro because of flooded roads. | | | | | | | | | |
| Williamson County | | | | | | | | | |
| Carterville | 22 | 0610CST 1000CST | | | 0 | 0 | | | Flash Flood |
| Rainfall amounts between 2 and 3 inches covered roads with water. | | | | | | | | | |
| ILZ087-092>094 Gallatin - Alexander - Pulaski - Massac | | | | | | | | | |
| | 26 | 0300CST | | | 0 | 0 | 40K | 20K | Flood |
| | 30 | 2359CST | | | | | | | |
| The Ohio River rose above flood stage at Cairo on the 26th. Between 5 and 8 inches of rain over parts of southern Illinois and southwest Indiana pushed the river over its banks at a few other locations, including Shawneetown and Grand Chain. Mainly low-lying unprotected farmland was affected through the end of April. | | | | | | | | | |
| ILZ083 White | | | | | | | | | |
| | 26 | 0700CST | | | 0 | 0 | | | Flood |
| | 30 | 2359CST | | | | | | | |
| The Little Wabash River rose above flood stage on the 26th, but it did not crest until May. As many as 20 homes were expected to be affected by flooding, so evacuations began near Carmi. | | | | | | | | | |
| Gallatin County | | | | | | | | | |
| Shawneetown | 28 | 1345CST 2200CST | | | 0 | 0 | 100K | | Flash Flood |
| Very heavy rainfall around 5 inches in 24 hours caused extensive flooding, especially in and near Omaha. No residential areas were evacuated, but the post office, civic center, and four businesses had water in them. Runoff from Crawford Creek near Ridgway flooded a few basements, and two trailer homes had water in them. Significant flooding of roads occurred. | | | | | | | | | |
| Saline County | | | | | | | | | |
| Harrisburg | 28 | 1354CST 2200CST | | | 0 | 0 | 1.5M | 50K | Flash Flood |
| Widespread rainfall amounts from 4 to 7 inches in 24 hours caused extensive flooding. A pickup truck stalled in high water in rural Saline County. By the time the owner returned to it, it was submerged under 6 feet of water. Extensive flooding of farm fields forced farmers to delay spring planting indefinitely. The Harrisburg water treatment plant reported 5.75 inches in 24 hours. A number of roads and highways were closed. Schools were closed. Saline County was declared a federal disaster area. About 1.3 million dollars damage occurred to private property. | | | | | | | | | |
| Franklin County | | | | | | | | | |
| West Frankfort | 28 | 1930CST 2300CST | | | 0 | 0 | 3M | 50K | Flash Flood |
| Extremely heavy rainfall amounts of about 8 inches in less than 24 hours caused severe flash flooding. Franklin County was declared a federal disaster area. Close to 100 people were evacuated from their homes by boat. A railroad berm near the West Frankfort sewage treatment plant gave way to rising water, resulting in catastrophic flooding in the city. Very few if any victims of the flash flooding had flood insurance. All flood victims and volunteers were encouraged to receive free tetanus shots. Water was 4 to 6 feet deep in some areas of the city, closing schools and halting most traffic. At one point, the only access into the city of West Frankfort was from Interstate 57. Preliminary damage estimates to public property were between 1 and 2 million dollars. Damage to homes and private property will be in the millions. | | | | | | | | | |
| Jackson County | | | | | | | | | |
| Murphysboro | 28 | 1930CST 2300CST | | | 0 | 0 | 100K | 20K | Flash Flood |
| Heavy rains between 2 and 4 inches in about 4 hours caused extensive road flooding. Parts of U.S. 51 and Illinois 127 were closed by floodwaters. Some basement flooding occurred. | | | | | | | | | |

| Williamson County | | | | | | | | | |
| Marion | 28 | 1930CST 2300CST | | | 0 | 0 | 500K | 50K | Flash Flood |
| This was the first of two major flash flood events. The second occurred on May 10. The combined effect of the two events prompted a federal disaster declaration for the county. Low-lying areas were evacuated, most streets were closed, and a dike collapsed in Marion's flood control project. The dike, which broke about half a mile south of Marion, flooded a farm field and three acres of land. Illinois Route 37 was closed near Johnston City. | | | | | | | | | |
| Jefferson County | | | | | | | | | |
| Mt Vernon | 28 | 2025CST 2330CST | | | 0 | 0 | 20K | | Flash Flood |
| Nearly five inches of rain fell in Mt. Vernon, most of it in a 24 hour period. Several roads were closed. A family voluntarily left its home in Mt. Vernon because of the high water threat. | | | | | | | | | |
| Perry County | | | | | | | | | |
| Pinckneyville | 28 | 2025CST 2330CST | | | 0 | 0 | 220K | | Flash Flood |
| Very heavy rainfall of 4 to 7 inches in less than 24 hours caused major flash flooding. Schools were closed in DuQuoin due to flooded roads and school buildings. Sandbags were placed around the Pinckneyville water filtration plant to stave off a rising creek. Perry County was eventually declared a federal disaster area. | | | | | | | | | |
| Edwards County | | | | | | | | | |
| Albion | 28 | 2030CST 2330CST | | | 0 | 0 | 50K | 40K | Flash Flood |
| Between 4 and 7 inches of rain fell, much of it in a 6 hour period. Flooding of cropland was extensive. A few roads were closed. | | | | | | | | | |
| Hamilton County | | | | | | | | | |
| Dahlgren | 28 | 2030CST 2330CST | | | 0 | 0 | 100K | 40K | Flash Flood |
| Several highways were closed by high water, including State Route 142 north and south of McLeansboro. Rainfall amounts ranged from 3 to 6 inches over a two-day period. Most of the damage to private property was caused by flooded basements. | | | | | | | | | |
| Wabash County | | | | | | | | | |
| Mt Carmel | 28 | 2030CST 2330CST | | | 0 | 0 | 50K | 20K | Flash Flood |
| Rainfall amounts between 4 and 7 inches occurred, mostly in a 6 hour period. Flooding of roads and croplands was the main problem. | | | | | | | | | |
| White County | | | | | | | | | |
| Carmi | 28 | 2030CST 2330CST | | | 0 | 0 | 100K | | Flash Flood |
| Severe flash flooding was caused by rainfall amounts between 4 and 7 inches in 24 hours. A moving vehicle was swept off a road into a field by fast-moving floodwaters. The female driver was able to escape to safety by walking through neck-deep floodwaters. Six families in East Carmi were evacuated from their homes. Numerous roads were closed. | | | | | | | | | |
| Wayne County | | | | | | | | | |
| Fairfield | 28 | 2030CST 2330CST | | | 0 | 0 | 100K | | Flash Flood |
| An unofficial observation of 4.5 inches was received from Fairfield. This resulted in significant flooding of roads. | | | | | | | | | |
| Johnson County | | | | | | | | | |
| Tunnel Hill | 29 | 0400CST 0900CST | | | 0 | 0 | 50K | | Flash Flood |
| About 5 inches of rain fell on saturated ground in less than 24 hours. Rising floodwaters made nine county roads impassable. Sink holes and washouts on roads made travel hazardous. Floodwaters surrounded a restaurant. | | | | | | | | | |
| ILZ076 | | | | | | | | | |
| Wayne | | | | | | | | | |
| | 29 | 0900CST | | | 0 | 0 | 5K | 20K | Flood |
| | 30 | 2359CST | | | | | | | |
| The Skillet Fork River crested at 22.1 feet at Wayne City, well above the flood stage of 15 feet. Thousands of acres of cropland were flooded. | | | | | | | | | |
| ILLINOIS, Southwest | | | | | | | | | |

| | | | | | | | | | A small tornado touched down in an apple orchard northwest of Chester. Numerous trees were destroyed along with a couple of utility sheds. |
| St. Clair County O Fallon | 19 | 1825CST | | | 0 | 0 | | | Hail (1.00) |
| | | | | | | | | | Amateur radio spotters reported 1 inch hail in O'Fallon. |
| Marion County Salem | 19 | 1830CST | | | 0 | 0 | | | Hail (2.75) |
| | | | | | | | | | Emergency management personnel reported baseball size hail in Salem. |
| Marion County Odin | 19 | 1835CST | | | 0 | 0 | | | Hail (2.75) |
| | | | | | | | | | Skywarn spotters reported baseball size hail in Odin. |
| Marion County 2 S Odin to 12 ENE Salem | 19 | 1835CST 1905CST | 20 | 150 | 0 | 7 | 7M | | Tornado (F2) |
| | | | | | | | | | Marion County was declared a Federal Disaster Area as a tornado, reaching F2 strength at its peak, created a 20 mile path of destruction from south of Odin to east of Salem. The bulk of the damage occurred on the south side of the city of Salem. The tornado moved through the county Fairgrounds, destroying numerous buildings and ripping the roofs off others. Two 2-ton trucks were turned 180 degrees by the tornado. Red Cross damage assessment teams determined that 6 mobile homes and 2 homes were destroyed in the Marion area. Another 46 homes and mobile homes were damaged. At least 23 businesses in Marion were damaged, 17 in one shopping center. Power was out to over 4000 residents. Two more homes were destroyed about 5 miles east of Marion. In one of the mobile homes destroyed on the south side of Marion, a mother and her 4 year old son took the ride of their lives. They were on the couch when the tornado struck, and ended up about 100 yards away in the middle of the debris. Both escaped serious injury. Total damage was estimated between 5 and 7 million dollars. There were only 7 injuries, all minor, primarily cuts and bruises. |
| Monroe County Waterloo | 19 | 1840CST | | | 0 | 0 | | | Thunderstorm Wind (G52) |
| | | | | | | | | | Wind gusts over 60 mph downed trees and power lines in Waterloo. |
| Randolph County .5 SSW Baldwin to 1 E Baldwin | 19 | 1859CST 1903CST | 2 | 70 | 0 | 0 | 5K | | Tornado (F0) |
| | | | | | | | | | A small tornado touched down south of Baldwin. Damage was limited to trees and power lines. |
| Marion County 11 E Salem to 14 E Salem | 19 | 1905CST 1910CST | 3 | 50 | 0 | 0 | 70K | | Tornado (F1) |
| | | | | | | | | | A tornado touched down in extreme east Marion County, destroying one farm house, a barn and several other farm buildings. Trees and power lines were also downed. The tornado then crossed the Clay County line and continued for another 2 miles. |
| Randolph County 1.5 SW Tilden to 1.5 E Tilden | 19 | 1912CST 1914CST | 3 | 70 | 0 | 0 | 5K | | Tornado (F0) |
| | | | | | | | | | A small tornado touched down south of Tilden. Damage was limited to trees and power lines. |

| | | | | | | | | | A small tornado touched down in the Bremen area. One home and barn suffered roof damage, otherwise damage was limited to trees and power lines. |
| Washington County Lively Grove | 19 | 1920CST | | | 0 | 0 | | | Hail (0.75) |
| | | | | | | | | | Public reported 3/4 inch hail in Lively Grove. |
| Fayette County 3 E Carlyle Res North to 4 E Carlyle Res North | 19 | 1920CST 1923CST | 1.5 | 80 | 0 | 0 | 75K | | Tornado (F1) |
| Marion County 2 W Patoka to 5 NNE Patoka | 19 | 1923CST 1930CST | 7 | 50 | 0 | 0 | | | Tornado (F1) |
| Fayette County 4 SE Shobonier to 5 ESE Shobonier | 19 | 1930CST 1935CST | 3 | 80 | 0 | 0 | 75K | | Tornado (F1) |
| | | | | | | | | | A small tornado traveled through parts of Fayette and Marion counties, creating an 11 mile damage path ranging from 50 to 80 yards in width. The tornado reached F1 intensity 3 times along the path. One home and barn were destroyed in extreme southeast Fayette County in the early stages of the tornado, a barn and several sheds were destroyed just north of Patoka in Marion County, and another barn and sheds were destroyed when the tornado crossed into Fayette County again southeast of Shobonier. |
| Washington County Nashville | 19 | 1940CST | | | 0 | 0 | | | Hail (0.75) |
| | | | | | | | | | County Sheriff reported 3/4 inch hail in Nashville. |
| St. Clair County Scott Afb | 19 | 2008CST | | | 0 | 0 | | | Hail (2.00) |
| | | | | | | | | | Air Force personnel reported 2 inch hail at Scott Air Force Base. |
| ILZ100>102 Madison - St. Clair - Monroe | 28 | 0800CST 0930CST | | | 0 | 0 | | | High Wind (G61) |
| | | | | | | | | | A significant pressure difference in the vicinity of a line of thunderstorms caused a widespread high wind event with winds gusts around 70 mph behind the line of storms. Major power outages occurred as trees and power lines were toppled. The majority of the damage in Illinois occurred in Madison County. Roofs were damaged in Edwardsville and Wood River. The Bethalto police station lost their roof during the wind. A tractor-trailer was blown off I-270 near the intersection with I-70. Damage across the area was estimated to be near \$1 million. |
| Washington County Okawville | 28 | 1610CST | | | 0 | 0 | | | Hail (1.00) |
| | | | | | | | | | County Sheriff reported 1 inch hail. |
| Clinton County Countywide | 28 29 | 2030CST 0500CST | | | 0 | 0 | | | Flash Flood |
| | | | | | | | | | Rainfall of 4 to 6 inches caused flash flooding across Clinton County. Roads were impassable, including Highway 161 between New Baden and Albers. |
| Madison County Countywide | 28 29 | 2030CST 0500CST | | | 0 | 0 | | | Flash Flood |
| | | | | | | | | | Rainfall of 3 to 6 inches caused flash flooding across much of Madison County. The worst flooding was in the southern part of the county, along the St. Clair County border. Most roads in the Horseshoe Lake State Park area became impassable. |
| St. Clair County Countywide | 28 29 | 2030CST 0500CST | | | 0 | 0 | | | Flash Flood |
| | | | | | | | | | St. Clair County was declared a Federal Disaster Area due to the flash flooding which occurred, the result of a 6 to 8 inch rainfall. A levee along Harding Creek broke flooding numerous homes and businesses. The Washington Park area was especially hard hit as an entire mobile home park had to be evacuated. Interstate highways 70, 64, and 255 were all closed at various times. Flooding also occurred near Freeburg as Silver Creek rose out of its banks closing Highway 13. Much of the floodwater remained standing for several days complicating clean-up activities. County government did not have any damage estimates available. |
| Monroe County Countywide | 28 29 | 2130CST 0500CST | | | 0 | 0 | | | Flash Flood |
| | | | | | | | | | Rainfall of 4 to 6 inches caused widespread flash flooding across Monroe County. Up to 6 inches of water covered most streets in Waterloo during the height of the rainfall. Small streams and creeks rose out of their banks closing several county roads. |

| | | Torrential rains caused the worst flooding since 1959 across many southern Indiana locations. Between 5 and 9 inches of rain fell from the afternoon of April 28 to the morning of April 29. The most notable flooding occurred along the Blue River at Fredericksburg, Milltown and English. Around 70 homes and a few businesses received major damage in Washington, Crawford and Orange counties. Two mobile homes were destroyed in Orange county. Evacuations were made in Milltown, Henryville, English, Paoli and Fredericksburg. The Blue River crested at 27.1 feet at Fredericksburg (20.0 flood stage) at 1800 est on April 29. It crested at 28.9 feet (16.0 flood stage) at Milltown at 0500 est on April 30. | | | | | | | |

| | | Major flooding occurred along the Whitewater river in East-Central and Southeast Indiana. The river level below Brookville lake reached its highest stage since 1968. The heavy rainfall also resulted in the lake level climbing to nearly 4 feet above the previous record pool stage. Flood stage at Brookville was 20 feet and the crest reached 21.86 feet. At least 166 homes and 13 businesses in seven counties had major damage. Numerous roads were washed out and 16 residents were evacuated. | | | | | | | |

| spending three hours in a tree. A 74-year-old man working on a sump pump in his basement suffered a heart attack, collapsed, and drowned. | | | | | | | | | |
| Vanderburgh County Evansville | 28 | 2125CST 2330CST | | | 0 | 0 | 400K | | Flash Flood |
| 7.25 inches of rain fell at Evansville in 24 hours. School openings were delayed for two hours because of floodwaters. Damage to county roads and bridges was estimated to be around 150,000 dollars. So much water overloaded the sewer system that officials released raw sewage into the Ohio River. | | | | | | | | | |
| Gibson County Princeton | 28 | 2135CST 2330CST | | | 0 | 0 | 100K | | Flash Flood |
| Widespread rainfall amounts from 2.5 to 4 inches caused flooding of many county roads. Indiana Route 168 was closed for a time. Several cars were stranded in deep water. Numerous basements were flooded in Princeton. An automobile was swept off State Route 68. Schools were closed due to flooded roads. | | | | | | | | | |
| Pike County Petersburg | 28 29 | 2200CST 0030CST | | | 0 | 0 | 20K | | Flash Flood |
| Widespread rainfall amounts between 4 and 8 inches caused widespread flooding of roads and farm fields. An observer in Stendal measured 7.6 inches of rain in 24 hours. Many roads were closed, including state highways. | | | | | | | | | |
| Spencer County Rockport | 28 29 | 2200CST 0030CST | | | 0 | 0 | 20K | | Flash Flood |
| Very heavy rains in excess of 3 inches in 3 hours resulted in numerous road closures. As much as 8 inches of rain in a 24 hour period caused prolonged flooding problems. | | | | | | | | | |
| IOWA, Central | | | | | | | | | |
| Marshall County 5 E State Center | 18 | 1203CST | | | 0 | 0 | 5K | | Hail (0.75) |
| A strong cold front moved across Iowa during the afternoon of the 18th. Although moisture was lacking with the system, there was enough upper level dynamics in place to aid in thunderstorm development. The first thunderstorms developed shortly after noon CST in central Iowa. These storms were not to become the main area of thunderstorms however. Later in the afternoon a line of intense thunderstorms developed over southeast Iowa along the cold front. By that time, dew point temperatures had pushed into the 50s across the area. The main feature with the storms was hail. Most of the hail was three quarter to one and one half inches in diameter. Later thunderstorms produced some hail up to golf ball and even baseball in size over the southeast counties. Three quarter inch diameter hail covered the ground east of State Center in Marshall County and also at Traer in Tama County. | | | | | | | | | |
| Marshall County Marshalltown | 18 | 1210CST | | | 0 | 0 | 10K | | Hail (0.75) |
| Tama County Traer | 18 | 1310CST | | | 0 | 0 | 10K | | Hail (0.75) |
| Monroe County 9 E Albia | 18 | 1400CST | | | 0 | 0 | 5K | | Hail (0.75) |
| Davis County 4 N Drakesville | 18 | 1415CST | | | 0 | 0 | 5K | | Hail (0.75) |
| Davis County 6 E Drakesville | 18 | 1428CST | | | 0 | 0 | 10K | | Hail (1.25) |
| Wapello County 4 S Blakesburg | 18 | 1440CST | | | 0 | 0 | 10K | | Hail (0.90) |
| Wapello County 1 S Ottumwa | 18 | 1441CST | | | 0 | 0 | 20K | | Hail (1.75) |
| Wapello County 1 SW Ottumwa | 18 | 1445CST 1453CST | | | 0 | 0 | 10K | | Hail (0.75) |
| Three quarter inch diameter hail fell one mile southwest of Ottumwa for a full 8 minutes, nearly covering the ground. | | | | | | | | | |
| Wapello County Eldon | 18 | 1450CST | | | 0 | 0 | 100K | | Hail (2.75) |
| A large thunderstorm began taking on supercell characteristics as it moved across southeast Wapello County. The cell dropped baseball size hail in Eldon. | | | | | | | | | |
| Wapello County 1 W Batavia | 18 | 1455CST | | | 0 | 0 | | | Funnel Cloud |
| As the storm moved east-northeast a funnel cloud was sighted west of Batavia. Earlier there were unconfirmed reports of a tornado near Drakesville, however surveys suggested there was no touchdown. | | | | | | | | | |
| Taylor County New Market | 19 | 2012CST | | | 0 | 0 | 35K | | Thunderstorm Wind (G52) |
| Thunderstorms developed over southwest Iowa. The storms were off the north edge of a very large mesoscale convective system located to the south of the state. The storms produced high winds over several counties. A roof was blown off a school building in New Market. Power lines were also taken down by the high winds. There were several reports of winds around 60 MPH. | | | | | | | | | |

| | 25 | 0930CST | | | 0 | 0 | 750K | | High Wind (G59) |
| | 26 | 0300CST | | | | | | | |

A very intense low pressure system moved to the north of Iowa. It actually passed over northern Minnesota and was near 980 mb central pressure. From the low a cold front extended south. As it passed through Iowa, strong subsidence combined with the tight pressure gradient produced strong winds. The strong winds entered northwest Iowa during the morning hours. The winds continued into the evening hours as an Arctic front pushed south across the state. The high winds spread east and south across the state during the day, reaching the southeast part of Iowa around mid afternoon. Winds were sustained 30 to 35 MPH with frequent gusts to near 60 MPH. By late afternoon the winds produced widespread blowing dust. Visibility was reduced statewide to between 1 and 3 miles at times. Occasionally visibility was reported down to 100 feet in blowing dust in open areas. The reduced visibility resulted in several automobile accidents. Fortunately, the leaves were not yet on the trees or damage would have been extensive. As it was, scattered reports of trees being downed by the high winds were received. Falling trees and branches also caused scattered power outages. In Des Moines for example, electricity was out in over 1000 homes during the early evening hours. There was also damage to many homes as shingles were blown off. A few roofs were also partially removed by the extended period of high winds. Damage was also reported to gutters and awnings. Some of the higher wind speeds reported from observing sites included a 68 MPH gust at the National Weather Service Office in Johnston, 65 MPH at the Des Moines International Airport, and 61 MPH at the Ottumwa Airport.

| | | | | | Killed | Injured | Property | Crops | |
| KENTUCKY, Central | | | | | | | | | |
| Pulaski County Bee Lick to 1 E Bee Lick | 20 | 0429EST 0430EST | 1 | 100 | 0 | 0 | 20K | | Tornado (F1) |
| | | | | | | | | | A tornado knocked over barns, houses and trees as it moved through the Bee Lick community off east Ky. 70. The tornado toppled large trees on one house in Pulaski county. Significant damage was done to the house. In Rockcastle county, the tornado moved a house trailer 30 feet in the air from its foundation. The flying trailer took out several power lines and dropped onto another mobile home. A church steeple in the Bee Lick community also was damaged. |
| Garrard County Harmon'S Lick to 6 NW Berea | 20 | 0430EST 0440EST | 6 | 200 | 0 | 0 | 12K | 4K | Tornado (F1) |
| | | | | | | | | | Thunderstorm winds and an embedded F1 tornado ripped a path of downed trees and destroyed a dozen barns across southern Garrard County. Also, a farmer lost 6 cows as a barn collapsed on them. |
| Pulaski County Eubank | 20 | 0430EST | | | 0 | 0 | 15K | | Thunderstorm Wind (G55) |
| | | | | | | | | | A garage, a mobile home and 3 barns were demolished due to straight-line winds. |
| Pulaski County 4 N Science Hill | 20 | 0430EST | | | 0 | 0 | 10K | | Lightning |
| | | | | | | | | | Lightning set a mobile home ablaze. |
| Madison County Berea | 20 | 0445EST 0450EST | 2 | 200 | 0 | 10 | 12.8M | | Tornado (F2) |
| | | | | | | | | | A tornado touched down on the on the East side of interstate 75 at the Ky 21 exit at 445 am est. There the tornado destroyed a Sunoco gasoline station and ripped the roof of a Howard Johnson's motel. The tornado moved East-Northeast across the South side of Berea to just East of Ky 25 before dissipating around 450 am est. The tornado damaged around 800 homes and 40 businesses. 35 houses were destroyed or received major damage, while 26 businesses were destroyed or received major damage. Home damage was estimated at 6.7 million dollars...while damage to businesses was estimated at 6.1 million dollars. There were only minor injuries reported with the most serious being a broken collar bone. The tornado caused a storage tank to topple on the Parker Seal plant which produces O-rings for the space shuttle mission. Also damaged were parts of Berea College. Most of the damage there was due to fallen and uprooted trees. The "Old Town" section of Berea, where craftspeople make and sell high quality furniture and other goods saw several businesses badly damaged. The roof of the town's old train depot, now a tourist center, caved in. Many homes were reported as flattened. The Red Cross, Salvation Army and 130 members of the National Guard were sent to aid the cleanup effort. The National Weather Service storm survey the damage path revealed an F2 tornado embedded in straight-line winds. |
| Estill County Red Lick to Barnes Mountain | 20 | 0455EST 0505EST | 5 | 100 | 0 | 0 | 200K | | Tornado (F1) |
| | | | | | | | | | Downburst winds and an embedded F1 tornado damaged 40 homes and 20 barns on a 5 mile path from Red Lick to Barnes Mountain. The Barnes Mountain area recieved the worst damage. The DES reported 3 homes were destroyed with pieces of the homes blown into the valley. There was also severe damage to farm machinery, and 12 barns were destroyed. No injuries were reported. |
| Fleming County Poplar Grove | 20 | 0530EST | | | 0 | 0 | 30K | 20K | Thunderstorm Wind (G60) |
| | | | | | | | | | 3 cows were killed, and considerable damage was done to a farm. The owner's car was also damaged as a tree fell on it. Hay damage was estimated at 20 K. |
| KYZ074 Barren | 22 | 1200EST 1203EST | | | 0 | 0 | 50K | | High Wind (G52) |
| | | | | | | | | | High winds did extensive damage to downtown Glasgow. A roof and bricks were blown off one side of a print shop. The bricks were thrown against a few cars. A museum sustained window and roof damage. A roof was blown off a house onto cars. A storage trailer was overturned, and several other minor cases of damage were reported. |
| Hancock County Weberstown | 23 | 0700EST | | | 0 | 0 | 2K | | Thunderstorm Wind (G50) |
| | | | | | | | | | The Weber store at the intersection of Hwy. 144 and 169 and a workshop across the street received major roof damage due to straight-line winds. |
| KYZ047 Mercer | 23 | 0950EST 1000EST | | | 0 | 0 | 1K | | High Wind (G50) |
| | | | | | | | | | A garage was destroyed, and a home received minor damage in Harrodsburg to high gradient winds. |
| Scott County Stamping Ground | 23 | 1000EST | | | 0 | 0 | 5K | | Thunderstorm Wind (G52) |
| | | | | | | | | | A mobile home was flipped over, and trees were blown down due to 60 mph winds. Report from the DES. |
| Scott County Georgetown | 23 | 1000EST | | | 0 | 0 | 80K | | Thunderstorm Wind (G52) |
| | | | | | | | | | Five airplanes were damaged at the Marshall Field Airport in |

| Power lines were down. | | | | | | | | | |
| Fulton County Hickman | 21 | 1545CST | | | 0 | 0 | 20K | | Thunderstorm Wind |
| Downed trees and power lines blocked roads. Some roof damage was reported. | | | | | | | | | |
| KYZ018 | Henderson | | | | | | | | |
| | 23 | 0500CST 0700CST | | | 1 | 0 | 25K | | High Wind |
| An 84-year-old woman was killed in Reed when her camper trailer was flipped several times by high winds. The winds peeled a tarpaper roof off a Henderson County school. F84CA | | | | | | | | | |
| Union County Morganfield | 29 | 1500CST 1800CST | | | 0 | 0 | | | Flash Flood |
| Very heavy rainfall from 2 to 3 inches in less than 3 hours caused flooding of streets and highways. | | | | | | | | | |
| Webster County Providence | 29 | 1500CST 1800CST | | | 0 | 0 | | | Flash Flood |
| Very heavy rainfall from 2 to 3 inches in less than 3 hours caused flooding of streets and highways. | | | | | | | | | |
| Henderson County Henderson | 29 | 1500CST 1800CST | | | 0 | 0 | 50K | | Flash Flood |
| Between 3 and 5 inches of rain fell across the county on the 28th and 29th. This brought the monthly total to near 9 inches. Many homes, especially those near creeks and streams, received water damage. Canoe Creek rose well out of its banks, submerging a vehicle almost to its roof. Numerous streets and roads were closed. Several families became stranded when high water closed off access roads to their houses. | | | | | | | | | |
| Daviess County Owensboro | 29 | 1500CST 1800CST | | | 0 | 0 | | | Flash Flood |
| Widespread rainfall amounts between 2 and 3 inches in less than 3 hours caused flooding of streets. | | | | | | | | | |
| McLean County Calhoun | 29 | 1500CST 1800CST | | | 0 | 0 | | | Flash Flood |
| Rainfall amounts between 2 and 3 inches in less than 3 hours caused street and highway flooding. | | | | | | | | | |
| KYZ014 | Union | | | | | | | | |
| | 30 | 0300CST 2359CST | | | 0 | 0 | | | Flood |
| The Ohio River rose just above flood stage at Uniontown Lock and Dam on the last day of the month. | | | | | | | | | |

|---|---|----------------------------|---------------------------|--------------------------|----------------------|---------|---------------------|-------|--------------------|
| | | | | | Killed | Injured | Property | Crops | |
| MAINE | | | | | | | | | |
| MEZ011-015-017-022 | Central Penobscot - Southern Penobscot - Interior Washington - Interior Waldo | | | | | | | | |
| | 08 | 0600EST 1600EST | | | 0 | 0 | | | Heavy Snow |
| | A low pressure system moving northeast well off the coast dropped 6 to 9 inches of wet snow over interior sections of eastern Maine. | | | | | | | | |
| MEZ001>029 | Northwest Aroostook - Northeast Aroostook - Northern Somerset - Northern Piscataquis - Northern Penobscot - Southeast Aroostook - Northern Oxford - Northern Franklin - Central Somerset - Southern Piscataquis - Central Penobscot - Southern Oxford - Southern Franklin - Southern Somerset - Southern Penobscot - Interior Hancock - Interior Washington - Interior York - Interior Cumberland - Androscoggin - Kennebec - Interior Waldo - Coastal York - Coastal Cumberland - Sagadahoc - Lincoln - Knox - Coastal Waldo - Coastal Hancock | | | | | | | | |
| | 09 11 | 2000EST 0200EST | | | 0 | 0 | | | Heavy Snow |
| | A strong low pressure center traveling northeast just off the coast dumped 10 or more inches of snow over most of Maine. Accumulations ran as high as 21 inches in the western mountains, but were only a few inches, at most, along the immediate downeast coast, where the snow changed to rain. Wet, heavy snow caused tree branches to fall onto power lines, cutting power to at least 15,000 customers. | | | | | | | | |
| MEZ027 | Knox | | | | | | | | |
| | 16 | 0000EST | | | 0 | 0 | 570K | | Landslump |
| | The combination of saturated soil conditions, abnormally high tides and wave action contributed to a landslump in a coastal area of Rockland very early on the 16th. Two houses that were located on top of a seaside embankment were destroyed and sections of a highly traveled road and the public utilities that were buried beneath it were also damaged or destroyed. | | | | | | | | |
| MEZ012>013-018>021-023>026 | Southern Oxford - Southern Franklin - Interior York - Interior Cumberland - Androscoggin - Kennebec - Coastal York - Coastal Cumberland - Sagadahoc - Lincoln | | | | | | | | |
| | 16 | 0700EST 2300EST | | | 0 | 0 | | | Heavy Rain |
| | A low pressure center that developed near Wilmington, Delaware and tracked north-northeastward along the Connecticut River Valley in western New England brought strong south to southeast flow to the state. This flow from this low transported moisture-laden air from the Atlantic to Maine, dropping 3 to 5 inches of rain in 16 hours over southwest and central sections of the state. | | | | | | | | |
| MEZ012-014-018>021-023>024 | Southern Oxford - Southern Somerset - Interior York - Interior Cumberland - Androscoggin - Kennebec - Coastal York - Coastal Cumberland | | | | | | | | |
| | 16 18 | 2000EST 0900EST | | | 0 | 0 | 2.3M | | Flood |
| | Low pressure moving through western New England caused flooding to parts of the state. Stream and rivers were already high from normal spring runoff and the ground was saturated. Copious heavy rains and mountain snowmelt sent streams and rivers over their banks. Roads and embankments were severely damaged, basements were flooded, and two small dams failed. | | | | | | | | |
| | Storm damage to non-federal public property was estimated at \$2.5 million from the storm, including river and coastal flooding damage and the landslump damage to public property. A Federal disaster was declared for the counties of Androscoggin, Cumberland, Knox, Oxford, and York. | | | | | | | | |

**07 1800EST 0 0 Heavy Snow
08 1000EST**

A low pressure system developed off the North Carolina coast and a nor'easter accompanied by heavy, wet snow began during the late afternoon and early evening on Easter Sunday. The maximum snowfall accumulation of 6 to 10 inches from this storm was measured on grassy surfaces and snow boards and was reported from several parts of the state, including a small area on western Cape Cod near Falmouth and Sandwich, which had 6 inches. Other areas on the Cape and Martha's Vineyard had from 2 to 5 inches. Parts of Bristol and Norfolk Counties and most of Worcester and Middlesex Counties had 6 to 8 inches. Similar totals were reported from higher elevations of Franklin, Hampshire, and Hampden Counties. The maximum amounts included: West Townsend, 8.0 inches; Shrewsbury, 7.8 inches; Blue Hill Observatory - Milton, 7.0 inches; and Norton, 6.7 inches. Boston had only 1.3 inches. Road surfaces and other pavements had only slushy accumulations, except in higher elevations. Temperatures remained slightly above freezing and snow stuck to trees and wires, resulting in a few scattered power outages.

**09 1800EST 0 0 Heavy Snow
10 1500EST**

A low pressure system developed along the middle Atlantic coast and intensified to 984 mb (29.06 in.) as its center passed right over Nantucket Island at 10 AM on April 10. This storm brought a record late-season snowfall to most of the state, except right along the immediate coast. New snowfall records were established, especially at inland locations and even at those locations along the coast which had some elevation. Some of the records set included the greatest April snowfall in a single storm, for a 24-hour period in April, and for a late-season storm. Seasonal snowfall totals reached all-time new record maxima of well over 100 inches. The greatest totals for this storm of 15 to 21 inches occurred across central Massachusetts from the Rhode Island/Connecticut border to the New Hampshire border. Some totals included: West Townsend, 21.0 inches; West Boylston and Shrewsbury, 17.4 inches; Grafton and Worcester, 16.0 inches. Blue Hill Observatory-Milton, elevation 635 feet, received 15.0 inches. Also, at Blue Hill, the maximum snow depth on the ground reached 18 inches, setting a record for April and for so late in the season. A general snowfall of 4 to 8 inches was observed near sea level, except within several miles of the coast, where less than 4 inches fell. However, Boston's Logan International Airport had 6 inches, pushing the seasonal total to 107.6 inches, beating the old record of 101.6 inches set just a few days earlier. There was little accumulation on Nantucket Island or outer Cape Cod, however Martha's Vineyard received 3 to 5 inches. All slightly higher terrain locations, especially above 500 feet had totals of 12 to 20 inches. Since this was a late-season event, snowfall on pavements was much less.

Accumulation of heavy, wet snow on trees and power lines and gusty winds up to 30 to 40 mph resulted in many power outages. There were numerous reports of lightning in the eastern part of the state between 8 PM on the 9th and 5 AM on the 10th. A peak wind gust of 50 mph was recorded at Gloucester at 955 AM on the 10th. The Blue Hill Observatory in Milton reported a peak gust to 53 mph. A 129-year-old elm tree crashed down on Commonwealth Avenue in Boston, crushing one car and severely damaging another. Up to 10,000 electric customers lost power inside Route 128 in the immediate Greater Boston area and up to 40,000 customers lost power in towns south of Boston. An arcing fallen power line in Waltham set a house on fire and prevented firefighters from putting out the flames...the family was left homeless.

Some final seasonal snowfall totals after this storm included: Worthington, 152.5 inches; West Granville, 146.4 inches; West Townsend, 146.0 inches; Blue Hill Observatory-Milton, 144.4 inches (old record 136.0 inches in 1947-1948); Shrewsbury, 141.3 inches; Randolph, 136.7 inches; Methuen, 135.6 inches; Worcester, 132.9 inches (old record 120.1 inches in 1992-1993); Reading, 125.5 inches; Easton, 124.0 inches; Taunton, 112.3 inches; Hingham, 112.3 inches (old record 95.1 inches in 1993-1994); Acushnet, 112.2 inches; and Boston 107.6 inches (old record 96.3 inches in 1993-1994).

A strong low pressure system moving through southern New England brought two to three and one-half inches of rainfall on April 16th to central and western Massachusetts. Amherst received 3.27 inches and Worcester reported 3.23 inches. The ground had remained saturated from melting of a record-breaking snowfall during the previous week and there was considerable runoff from this heavy rainfall. In Auburn, a 70-foot section of Route 12 collapsed and the resulting hole was up to 6 feet deep. The crater in the roadway was near the Massachusetts Turnpike. The rising Middle River prompted Worcester officials to open a diversion channel located in Auburn for the first time in three years. Minor flooding was reported along the Ware River in Barre. There were a number of road closures in cities and towns in Worcester County, including Bolton, Fitchburg, Leominster, Lunenburg, and Westminster. Many basements were reported flooded. The Connecticut River crested at Montague City at 30.78 feet at 2:30 PM on the 17th; flood stage is 28 feet. The Blackstone River crested at Northbridge at 9.29 feet at 12:43 AM on the 18th; flood stage is 9 feet. The Merrimack River crested at Lowell at 52.98 feet at 12:45 AM on the 18th; flood stage is 52 feet. The Nashua River crested at East Pepperell at 10.29 feet at 9:45 AM on the 18th; flood stage is 8 feet.

Severe weather developed north of a stationary front on the 12th. The strongest storms moved across the far southern part of Michigan during the late afternoon on the 12th. The most damage was done in Lenawee county, where hailstones with diameters of up to 2.5 inches did widespread damage to windows, roofs and alluminum siding. One man was injured when large hail broke through the windshield of his car. In western Lenawee county, haildrifts of up to a foot deep were reported. In addition, wind associated with the storms downed trees, flattened a few barns, and knocked down a quansit hut. A tornado was reported near Ottawa Lake, in Monroe county, but no damage occurred. Farther north, several reports of large hail and strong winds were received in the Saginaw/Midland area, where power outages affected over 2000 customers late in the afternoon.

Low pressure tracked northeast across the western Great Lakes during the evening of the 19th and early morning on the 20th, bringing locally heavy rains to southeast Michigan. A rainfall total of 1.22 inches was measured at Detroit's metro airport. As a result, the Middle Rouge River near Garden City went over its 7.0 foot flood stage at around 8 am on the 20th. The river crested at 8.5 feet around 10 pm on the 20th, then fell below flood stage at 6 am on the 21st. The Edward Hines parkway near Garden City was closed during the flood event, but no damage was reported.

A low pressure system moved northeast from Iowa on the afternoon of Friday April 12 to Southeast Lower Michigan on the morning

of Saturday April 13. Snow developed over West Upper Michigan during Friday afternoon and spread into North Central Upper Michigan Friday night. Meanwhile, a mix of sleet and freezing rain developed over South Central Upper Michigan. The snow became heavy...especially over Marquette and Baraga counties around 10 pm Friday as strong northeast winds developed. The precipitation exited the region between noon and 3 pm EDT on Saturday. The heaviest snow totals were over Marquette and Baraga counties where northeast winds blowing off of Lake Superior boosted snow totals to 12 inches at Marquette and Herman, 10 inches at L'anse and 9 inches at Watton. Other snow totals included 8 inches at Au Train and Newberry, 7 inches at Pelkie, Munising, Channing and Michigamme and 6 inches at Watersmeet, Rockland and Ironwood. Areas south of Iron River and Newberry received mostly sleet and freezing rain.

| | 12 | 1430CST 2030CST | | | 0 | 0 | | | Ice/Snow |
| A low pressure system moving across Iowa and northern Illinois brought a late-season mix of snow, sleet, rain, and freezing rain to northeast Minnesota, mainly south of Duluth, from Brainerd to Hinckley. Two to three inches of snow fell on roads glazed by sleet and freezing rain, resulting in numerous traffic accidents. The 1.5 inches of snow that fell in Duluth pushed that city's total seasonal snowfall to a new record. | | | | | | | | | |
| MNZ010>012-021 | Koochiching - Northern St. Louis - Northern Cook / Northern Lake - Southern Cook | | | | | | | | |
| | 25 | 0330CST 1500CST | | | 0 | 0 | | | Heavy Snow |
| A late-season winter storm dumped almost 10 inches of snow on extreme northeast Minnesota. The 9.6 inches that fell at International Falls pushed that city's total seasonal snowfall to a new record. Six inches of new snow fell at Little Fork and Babbitt, and 5 inches at Embarrass. | | | | | | | | | |

MINNESOTA, Northwest

MNZ001>005-007-029 West Polk - Norman - Clay - Kittson - Roseau - West Marshall - Wilkin

| | | | | | | | | |
|----|---------|---|---|--|--|--|--|--------------|
| 10 | 1300CST | 0 | 0 | | | | | Flood |
| 30 | 2300CST | | | | | | | |

Moderate to severe flooding occurred on the Red River of the North and many of its tributaries in Minnesota. Above normal precipitation was observed over the basin for the 6 months prior to the flood. In addition, heavy snow cover, with drifts up to 12 feet, lingered into early April. This combined with a rapid snowmelt to produce a memorable spring flood, despite below average precipitation from mid-March through April. Ice jams contributed to the flooding. The flooding was, for many areas, the worst since 1979, which for some, was the most devastating on record. On April 19th at 7 pm, a 19-year-old man from Warroad, Minnesota, drowned while attempting to cross the Robin bridge over the Red River at Drayton, North Dakota. The man unfortunately did not heed a road closed sign, which clearly marked the flooding hazard. The governor of Minnesota activated the National Guard to assist with the flood. On the Roseau River, a record stage was observed. On the Red River, the most extensive damage was from Grand Forks downstream. Many roads and bridges were closed.

MNZ005>006

Roseau - Lake Of The Woods

| | | | | | | | | |
|----|---------|---|---|--|--|--|--|-------------------|
| 25 | 0300CST | 0 | 0 | | | | | Heavy Snow |
| | 1800CST | | | | | | | |

A powerful spring snowstorm dumped from 4 to 6 inches of snow along the Canadian border from Roseau to International Falls. Up to 10 inches of snow was reported in the Baudette area. Winds of 15 to 25 mph created whiteout conditions, forcing the International Falls airport to close for only the second time in its history.

MINNESOTA, Southeast

NONE REPORTED.

MINNESOTA, Southwest

| Iron County Countywide | 22 | 0500CST 0900CST | | | 0 | 0 | | | Flash Flood |
| Heavy rain caused widespread flash flooding across the county. Highways 72 and 21 were closed near Ironton. | | | | | | | | | |
| Madison County Countywide | 22 | 0500CST 0900CST | | | 0 | 0 | | | Flash Flood |
| Numerous county roads were flooded, mainly across the northeast part of the county. Highway 72 had to be closed near Roselle. | | | | | | | | | |
| Reynolds County Countywide | 22 | 0500CST 0900CST | | | 0 | 0 | | | Flash Flood |
| Heavy rain caused creeks and small streams to rise out of their banks. The West Fork of the Black River flooded Highway KK east of Bunker. Highway J was also flooded. | | | | | | | | | |
| MOZ061>063-065 | St. Charles - Franklin - St. Louis - Jefferson | 28 | 0800CST 0930CST | | | 0 | 0 | | High Wind (G61) |
| A large pressure difference in the vicinity of a line of thunderstorms produced a widespread high wind event across the St. Louis area with wind gusts up to 70 mph reported behind the line of storms. Union Electric, the major electric utility in the area, reported nearly 200,000 customers lost power. A company spokesperson called the storm the worst "in more than a decade". Trees were toppled throughout the area, some falling on homes and vehicles. A major hospital in St. Louis suffered roof damage from the wind and a large furniture store was destroyed by fire caused by downed electric lines. Damage at the furniture store was in excess of \$1 million. Damage across the area was estimated to approach \$5 million. | | | | | | | | | |
| Jefferson County House Spgs | 28 | 1525CST | | | 0 | 0 | | | Hail (1.00) |
| Reported by observers for KTVI-TV. | | | | | | | | | |

| Crawford County | | | | | | | | | |
| Steelville | 28 | 1836CST | | | 0 | 0 | | | Hail (0.88) |
| | | | County Sheriff reported nickel size hail. | | | | | | |
| Gasconade County | | | | | | | | | |
| Countywide | 28 | 1900CST | | | 0 | 0 | | | Flash Flood |
| | 29 | 0200CST | Heavy rain of 4 to 6 inches caused widespread flash flooding across the county. Several county roads were washed out. | | | | | | |
| Franklin County | | | | | | | | | |
| Countywide | 28 | 1900CST | | | 0 | 0 | | | Flash Flood |
| | 29 | 0200CST | Heavy rain of 4 to 6 inches caused widespread flooding across the county. Numerous roads were flooded with some washed out. Water up to 2 feet deep covered many roads in Union during the peak of the flooding. The Meramec River which runs across the southwest part of the county rose over 10 feet in less than 24 hours. | | | | | | |
| Jefferson County | | | | | | | | | |
| Countywide | 28 | 1900CST | | | 0 | 0 | | | Flash Flood |
| | 29 | 0200CST | Rainfall averaging 6 inches...with some local amounts over 8 inches in less than 24 hours caused widespread flash flooding across Jefferson County. The Meramec and Big Rivers, and all other smaller streams and creeks rose over their banks. Some rises exceeded 10 feet in less than 24 hours. Evacuations were necessary in some areas as residents became isolated. Mud slides occurred in the Barnhart area closing roads. Some fields were covered with 6 to 8 feet of water trapping cattle. | | | | | | |
| St. Charles County | | | | | | | | | |
| Countywide | 28 | 1900CST | | | 0 | 0 | | | Flash Flood |
| | 29 | 0200CST | Rainfall of 4 to 6 inches caused widespread flash flooding across St. Charles County. County roads B, C, and N were all closed at various times due to flooding. Basements flooded from the rain, many because of storm sewer back-ups. | | | | | | |
| St. Louis County | | | | | | | | | |
| Countywide | 28 | 1900CST | | | 0 | 0 | | | Flash Flood |
| | 29 | 0200CST | Rainfall of 4 to 6 inches caused widespread flash flooding across St. Louis County. Numerous roads, including Trampe, Missouri Bottom, Aubuchon, Creve Coeur Mill, Pritchard Farm, Hanley, Marshall, Hillsboro, Meramec Station, Butler Hill, Meramec Bottom, and Gregg Road were all closed at various times. Basements flooded as storm water drainage systems became overwhelmed. | | | | | | |
| St. Louis (C) | | | | | | | | | |
| Citywide | 28 | 1900CST | | | 0 | 0 | | | Flash Flood |
| | 29 | 0200CST | Rainfall of 4 to 6 inches caused widespread flash flooding across the city of St. Louis. Roads flooded and underpasses became impassable due to the rapid runoff of water. Basements flooded as storm water drainage systems became overwhelmed. | | | | | | |
| Warren County | | | | | | | | | |
| Countywide | 28 | 2000CST | | | 0 | 0 | | | Flash Flood |
| | 29 | 0200CST | Rainfall of 3 to 6 inches caused flash flooding across Warren County. Numerous county roads were closed, some damaged due to water runoff. | | | | | | |

| | | | A small car was blown out of its lane. | | | | | | |
| Perry County 1 N Perryville to Menfro | 19 | 2030CST 2105CST | 11.5 | 175 | 0 | 0 | 5M | | Tornado (F3) |
| | | | The tornado destroyed 13 homes and caused major structural damage to 5 others. 63 other homes received minor or moderate structural damage. A total of 69 outbuildings and 6 businesses were damaged or destroyed. The Salvation Army and Red Cross were called in to provide food and shelter. State highways and county roads were cleared of tornado debris and open for travel within 24 hours. Extensive damage to utility lines resulted in prolonged power outages lasting a day or two. The F3 damage occurred just west of Menfro, shortly before the tornado dissipated. | | | | | | |
| Ripley County 3 WSW Doniphan to 5 ESE Doniphan | 19 | 2100CST 2115CST | 10 | 100 | 0 | 0 | 100K | | Tornado (F2) |
| | | | A mobile home was overturned. Large trees fell on cars and homes. | | | | | | |
| Ripley County 6 N Doniphan to 8 NE Doniphan | 19 | 2100CST 2110CST | | | 0 | 0 | 80K | | Thunderstorm Wind |
| | | | Large trees were blown down on houses and cars. A few outbuildings were damaged by wind. | | | | | | |
| Ripley County Ponder | 19 | 2105CST | | | 0 | 0 | 5K | | Thunderstorm Wind |
| | | | Straight line winds brought down numerous trees and power lines. | | | | | | |
| Ripley County Ponder | 19 | 2105CST | | | 0 | 0 | | | Hail (1.75) |
| Butler County 8 WNW Poplar Bluff to 4 WNW Poplar Bluff | 19 | 2105CST 2109CST | 2.5 | 75 | 0 | 0 | 300K | | Tornado (F2) |
| | | | The tornado destroyed numerous barns, damaged several houses, and uprooted hundreds of trees. At one farmstead, the tornado lifted a 40-foot section of a 1 by 2 foot concrete base that had been under a wooden barn. Farm equipment such as tractors and hay balers were damaged. Large grain bins and other items were blown over a hundred feet. 18 utility poles were destroyed, knocking out power for 12 to 18 hours. A portion of U.S. Highway 60 was closed for several hours because of debris in the road. | | | | | | |
| Wayne County Lake Wappapello | 19 | 2110CST | | | 0 | 0 | | | Hail (1.75) |
| Bollinger County Marble Hill | 19 | 2115CST | | | 0 | 0 | 20K | | Thunderstorm Wind (G60) |
| | | | A 1200 square foot machine shop lost its roof and three walls. The front porch of a nearby house was extensively damaged. | | | | | | |
| Wayne County Silva | 19 | 2115CST | | | 0 | 0 | | | Thunderstorm Wind (G52) |
| Stoddard County .5 W Bernie to Bernie | 19 | 2203CST 2204CST | 0.6 | 50 | 0 | 0 | 700K | | Tornado (F1) |
| | | | This short-lived tornado damaged several houses. A house trailer was destroyed. A couple schools in Bernie lost their roofs. In the city park, many trees were blown down, and a pavilion collapsed. A large grocery store lost part of its roof. Signs were blown down. | | | | | | |
| Stoddard County Bernie to 1 NE Essex | 19 | 2206CST 2215CST | | | 0 | 0 | 400K | | Thunderstorm Wind |
| | | | Straight-line winds demolished a mobile home, 2 large tool storage sheds, and 2 large grain bin systems. | | | | | | |
| New Madrid County 1 NE Catron | 19 | 2244CST | | | 0 | 0 | 10K | | Thunderstorm Wind |
| | | | Trees were blown down. A building sustained minor structural damage. | | | | | | |

| An F1 tornado struck the south and southeast part of Joplin along the Jasper and Newton county line. The damage path was centered one-half mile north of the intersection of South Range Line Road and I-44. Eight businesses were heavily damaged, including three hotels. A dozen other businesses suffered minor damage, such as broken winds and trees downed on roofs. Minor wind damage, mostly confined to trees and signs down, occurred throughout the rest of the city. | | | | | | | | | |

| 16 | 0500EST 2100EST | | | 0 | 0 | | | Heavy Rain |
|-----------|----------------------------|--|--|----------|----------|--|--|-------------------|

A low pressure system that developed near Wilmington, Delaware, and tracked north-northeastward along the Connecticut River Valley through western New England brought a strong south to southeast flow of moisture laden air from the Atlantic. Over 3 inches of rain fell during a 16-hour period over portions of central and southeast New Hampshire. At the time, the ground was still saturated from previous rainfall and snowmelt. Streams and rivers, already high from the spring runoff, overflowed their banks. Roads, fields, parking lots, and some residences were flooded. The heavy rains also caused some road washouts.

| | 07 2000EST 08 1200EST | | | 0 | 0 | | | Heavy Snow |
|--|----------------------------------|--|--|----------|----------|--|--|-------------------|

A low pressure system developed off the North Carolina coast and a nor'easter accompanied by heavy, wet snow began during the late afternoon and early evening on Easter Sunday. Snow accumulated to the maximum amounts on grassy surfaces and the greatest reported snowfalls were 10 inches in Jaffrey in Cheshire County and 6.5 inches at Hancock in Hillsborough County. Nashua had only 4.0 inches. The snow melted to a slushy accumulation on pavements.

| | 09 1800EST 10 1700EST | | | 0 | 0 | | | Heavy Snow |
|--|----------------------------------|--|--|----------|----------|--|--|-------------------|

A low pressure system developed along the mid-Atlantic coast and intensified to 984 mb (29.06 in.) as its center passed right over Nantucket Island, MA at 10 AM on April 10th. This storm brought a record late-season heavy snowfall to the region. In Cheshire County, Jaffrey had a total of 21.0 inches, pushing the seasonal total up to a record 168.0 inches. Snowfall amounts varied considerably with elevation, with downtown Jaffrey receiving only 16 inches for the storm. Most other locations in Cheshire County reported 4 to 8 inches. In Hillsborough County, New Ipswich had 19.0 inches and Weare had 14.0 inches. Peterborough recorded a total of 11.0 inches and Nashua had 10.0 inches. Since this was a late-season snowfall event, accumulations on pavements were considerably less, but the heavy, wet snow stuck to trees and wires, resulting in scattered power outages.

|--|----------------------------------|--|--|----------|----------|--|--|--------------|

A strong storm system moving through southern New England brought two to three and one-half inches of rainfall on April 16th to southern New Hampshire. The ground had remained saturated after snowmelt of a record snowfall during the previous week. Heavy runoff from this rainfall flooded homes and roads in some communities. In Nashua, an overflowing storm drain caused flooding of at least two homes. A large sinkhole developed on a Nashua street. In Goffstown, about a dozen homes were evacuated and about 30 people were asked to voluntarily move to higher ground along the Piscataquog River as water levels rose to knee-deep around some of the homes. In Peterborough, a cellar collapsed at one home but no injuries were reported. The Piscataquog River crested at Goffstown at 9.93 feet at 4 AM on the 17th; flood stage is 9 feet. The Merrimack River crested at Goffs Falls at 12.29 feet at 12:26 AM on the 18th; flood stage is 11 feet. Minor flooding was reported along the Souhegan River at Merrimack and along the Contoocook River at Peterborough in Hillsborough County.

With moist unstable air in place, as a cold front moved southeast toward the area during the evening of Tuesday April 23rd, a line of scattered to broken severe thunderstorms developed.

As this line moved across the area, severe thunderstorms produced high winds (measured at 52 knots at Harrison in Hudson County) that knocked down trees, snapped telephone poles, and downed wires in Clifton of Passaic County and knocked down trees elsewhere.

Late Snow

A low pressure system developed near Cape Hatteras the morning of the 9th, intensified and moved slowly northeast during the next 24 hours. It reached Cape Cod the morning of the 10th. This caused a late season rain and snow storm across New Jersey with the heaviest accumulations along Coastal New Jersey. Precipitation started as rain in Southern New Jersey and a rain and snow mixture farther north during the predawn hours on the 9th. Precipitation type became intensity dependent during the day on the 9th. When precipitation became heavier, it fell as snow; when its intensity decreased, it changed back to rain. Nevertheless above freezing temperatures plus indirect radiation from the April sun caused much of the snow to melt as it reached the ground during the day.

As sunset arrived (after 7 p.m. EDT), the snow began to accumulate mainly on grassy areas and overpasses across the area. But, this was not the case across coastal New Jersey where bands of heavy wet snow began accumulating on all surfaces including roadways. By the evening hours, the heaviest precipitation was mainly confined to the east of the New Jersey Turnpike. Accumulations averaged around 2 inches with the lightest accumulations in Sussex County. Roads and overpasses became slippery and this caused some accidents.

Specific accumulations included 4 inches in Belle Mead and Flemington, 3 inches in Wrightstown, 2 to 3 inches in the hills of Morris County, 2 inches in New Brunswick and Mount Laurel, 1 inch in Hackettstown and less than an inch in Wantage.

This was the last measurable snow of the season for New Jersey. The following are seasonal snowfall accumulations, many are records, but the state snowfall record of 108 inches remained intact. Wantage (Sussex) 107 inches, Newton (Sussex) 98.5 inches, Knowlton (Warren) 93.5 inches, Rockaway Township and Chatham (Morris) 90.8 inches, Long Valley (Morris) 87 inches, Fords (Middlesex) 81.6 inches, Schooley's Mountain (Morris) 80.4 inches, Belle Mead (Somerset) 76.8 inches, New Brunswick (Middlesex) 76.5 inches a new record, Bridgewater (Somerset) 70.7 inches, Mount Laurel (Burlington) 69 inches, Mount Holly (Burlington) 67 inches, Flemington (Hunterdon) 65.9 inches, Hightstown (Mercer) 64.7 inches, Estelle Manor (Atlantic) 53.1 inches, Woodstown (Salem) 51.4 inches, Downstown (Gloucester) 50 inches, Seabrook (Cumberland) 47.6 inches and Cape May City (Cay May) 44.3 inches.

A low pressure system developed near Cape Hatteras the morning of the 9th, intensified and moved slowly northeast during the next 24 hours. It reached Cape Cod the morning of the 10th. This caused a late season rain and snow storm across New Jersey with the heaviest accumulations along Coastal New Jersey. Precipitation started as rain in Southern New Jersey and a rain and snow mixture farther north during the predawn hours on the 9th. Precipitation type became intensity dependent during the day on the 9th. When precipitation became heavier, it fell as snow; when its intensity decreased, it changed back to rain. Nevertheless above freezing temperatures plus indirect radiation from the April sun caused much of the snow to melt as it reached the ground during the day.

As sunset arrived (after 7 p.m. EDT), the snow began to accumulate mainly on grassy areas and overpasses across the area. But, this was not the case across coastal New Jersey where bands of heavy wet snow began accumulating on all surfaces including roadways. By the evening hours, the heaviest precipitation was mainly confined to the east of the New Jersey Turnpike. Accumulations inland averaged around 2 inches, but along the coast increased to 5 to 8 inches. Roads and overpasses became slippery and this resulted in accidents. Along coastal New Jersey, the accumulating snow started causing power outages as the heavy wet snow pulled tree limbs and power lines down. Hardest hit were Point Pleasant, Point Pleasant Beach, Toms River, Brick, Lakewood, Seaside Heights, Manchester, Lakehurst, Waretown and Tuckerton. In all about 59,000 Jersey Central Power and Light customers lost power, mainly in southern Ocean County. About 15,000 still did not have power 24 hours later. A Red Cross Shelter was opened in Manchester. In Atlantic County, about 10,000 customers lost power starting at about 645 pm EDT on the 9th. All but 600 had power restored by 4 a.m. EDT on the 10th.

Specific accumulations included 8 inches in Egg Harbor City, Cape May, Toms River, Brick Township and Matawan; 7 inches in Mays Landing; 5 inches in Pomona (Atlantic City International Airport), Ocean City, Freehold and Estelle Manor and 4 inches in Vineland.

|-----------|----------------------------|----------|----------|-------------|--------------------------------|

A small line of severe thunderstorms caused wind damage across eastern parts of Ocean County. Hardest hit was the Forked River Beach area of Lacey Township where about 100 homes suffered damage and many dry docked boats were blown off supports. Many windows were damaged, deck railings, shingles and aluminum siding were ripped from homes and sheds were destroyed. A wind gust to 78 mph was recorded at Seaside Park. A gust of 58 mph was recorded at Bay Head.

Damage in the county was reported from Bayville southwest to Little Egg Harbor Township. In Barnegat Township, the wind blew over about a dozen dry docked boats including a 5 ton yacht. A 300 pound catamaran was tossed into a pine tree. The line uprooted trees in Tuckerton, Little Egg Harbor Township, Manahawkin and on Mystic Island. At least one car was damaged. No serious injuries were reported. About 7,400 homes lost power because of downed trees and power lines, with a large concentration along State Route 72 west of Manahawkin.

| Central/Northern | 30 | 1630EST 1645EST | | | 0 0 | 100K | Thunderstorm Wind |
|------------------|----|--------------------|--|--|--------|------|--------------------------|

Severe thunderstorms caused wind related damage in central and northern Somerset Counties. The hardest hit locations were Branchburg, Far Hills and Peapack. In Far Hills a small microburst (A concentrated downburst of damaging winds from a thunderstorm) caused extensive tree damage in about a quarter acre area. A few of them fell on houses. A couple of roofs were torn off and downed power lines forced the closure of Lake Road. In Peapack mainly smaller trees were uprooted. One large tree was uprooted and dented a roof. In Branchburg shingles were torn from two houses. Downed trees damaged several homes and garages mostly on Narraganset and Yuma Trails. The damaging winds also blew over a fence and shed. A few trees were also uprooted in Bound Brook and Hillsborough on East Mountain Road. No serious injuries were reported.

| 01 | 0000MST | | | | 0 0 | | Drought |
| 30 | 2359MST | | | | | | |

Drought conditions intensified throughout New Mexico with many locations reporting little measureable rainfall and warmer than normal temperatures through April. By the end of the month rainfall totals since January 1 ranged from only 10-15 percent of normal across most eastern counties to 40-60 percent of normal elsewhere. Fuel moisture conditions in the national forests were at their lowest levels in 30 years. Fire danger climbed to and then remained at extreme levels throughout the month. Agricultural losses were estimated in the millions of dollars as farmers suffered 80 to 90 percent losses of the typical wheat harvest. Ranchers in many areas were being forced to liquidate herds in lieu of no grassland grazing and high feeding costs.

Winds and extremely dry conditions on the 26th and 27th exacerbated small fires into a ranging firestorms which grew from less than several hundred acres to 2000-3000 acres in less than 6 hours. The Dome Fire, south of Los Alamos, was sparked by embers from an unattended camp fire on the 25th. By early afternoon of the 26th the fire had spread to about 200 acres. The fire then intensified explosively during the mid and late afternoon in low humidity of 5 percent and gusty winds of 25 to 35 mph to engulf 3500 acres by early evening. Erratic and gusty winds fanned the flames throughout the night and on through the 27th. The Dome Fire spread to over 14000 acres by the 28th but slowed considerably in cooler temperatures and light winds which allowed aerial tanker attack and effective backfires on the 29th and 30th. At the peak, over 1000 fire fighters with 11 planes and helicopters were used to fight the Dome blaze and cost estimates for fire control had reached \$4 million. No structures or houses were lost, but several remote Indian artifact sites were damage when the fire raced into western areas of the Bandelier National Monument. Two other human caused fires northwest of Raton and south of Socorro were also whipped out of control by dry, gusty winds. Each consumed about 2500 acres.

As a low pressure system over the midwest on Monday April 15th, moved northeast, its' associated warm and cold fronts moved across the area during the evening of Tuesday, April 16th.

With abundant moisture and unstable air in place, heavy rain and southeast winds gusting over 34 knots preceded the frontal passages.

Heavy rain caused rapid and widespread small stream and urban (street, poor drainage and low-lying area) flooding. The Mahwah River at Suffern NY in Rockland County rose above flood stage. Significant flooding occurred at Bronxville in Southern Westchester County.

Here are selected rainfall amounts:

- o For Orange County - from 1.57 inches at Greenwood Lake to 2.07 inches at Port Jervis.
- o For Putnam County - less than 2 inches.
- o For Rockland County - from 1.84 inches at Suffern to 2.66 inches at Pearl River.
- o For Westchester County - from 1.23 inches at Ossining to 3.21 inches at White Plains.

| Wake County Wendell to Wakefield | 15 | 1708EST 1723EST | 2 | 200 | 0 | 0 | 10K | | Tornado (F0) |
| An F0 tornado initially touched down off Hwy 64 in Wendell. The tornado width was initially only 50 feet where several trees were taken down. The tornado increased in width to 200 yards as it paralleled Hwy 64 and moved into the west side of the town of Zebulon. The storm damaged the Courtesy Car Dealership and tossed a showroom car across the highway. Numerous trees were twisted and felled. The tornado then crossed the highway and narrowed significantly as it reached Hwy 96 and Greenspace Road about 0.3 miles west of the Wakefield community where it lifted. | | | | | | | | | |
| Wake County Wendell to Zebulon | 15 | 1725EST 1745EST | 3 | 50 | 0 | 26 | 3M | | Tornado (F1) |
| The second is a series of three tornadoes began about 100 yards to the SE of where the first tornado began (off Hwy 64 in Wendell). The storm was initially less than 25 yards wide as it moved NNE and twisted trees and blew shingles off several houses. About one half mile from the initial touchdown, the storm widened to 50 yards as it approached the town of Zebulon. Trees were | | | | | | | | | |

Storm Data and Unusual Weather Phenomena

April 1996

| Location | Date | Time Local/ Standard | Path Length (Miles) | Path Width (Yards) | Number of Persons | | Estimated Damage | | Character of Storm |

| | | | | | Killed | Injured | Property | Crops | |
| <u>NORTH CAROLINA, Central</u> | | | | | | | | | |
| | | | | | | | | | <p>downed and the roof was blown off a brick home near the railroad tracks. Another home and a manufactured home were damaged as the storm crossed a street and moved up a hill. The storm then preceded over and down the hill into a mobile home park. Damage was extensive to all the trailers in the park that were directly in the path. The storm continued moving NNE into downtown Zebulon where it downed numerous large trees. Houses in the direct path of the storm were all brick and sustained only roof damage. The Zebulon Middle School sustained major roof damage to the main building. The tornado was last noted at Karial and Old Bunn Roads where minor damage occurred to a frame house and several trees were twisted.</p> |
| Franklin County Pilot | 15 | 1745EST 1805EST | 2 | 400 | 0 | 5 | 1M | | Tornado (F2) |
| | | | | | | | | | <p>The storm moved into Franklin county and destroyed a cement block building 1 mile SW of the community of Pilot. The storm then crossed over Hwy 64 where numerous trees were twisted and downed. Several outbuildings were also destroyed. The storm then entered Pilot where the damage path reached 250 yards across.</p> <p>A frame house was rotated, lifted off its foundation, and moved 30 feet. Cars were thrown into a local farm pond along with other debris. As the tornado left Pilot and approached HWY 39, the tornado reached it greatest width of nearly 400 yards. Damage was evident at every home in its path. The storm then weakened before it moved into Nash county.</p> |
| Nash County Spring Hope | 15 | 1745EST 1805EST | 4 | 50 | 0 | 0 | 50K | | Tornado (F1) |
| | | | | | | | | | <p>The third tornado moved into Nash county from Franklin. Damage was sporadic as the storm moved up the western edge of the county. The storm finally lifted about 5 miles north of Spring Hope. Trees were blown down, roofs blown off trailers, and numerous farm buildings destroyed.</p> |

NORTH CAROLINA, Southwest

Severe thunderstorms developed in the western North Carolina mountains and moved east. Trees and power lines were blown down at several locations from Swain county to Union county. Around Maggie Valley and Lake Junaluska a porch was blown off a house and landed on a car. Power was out to about 5700 people in that area. Another area of damage was near the Blue Ridge Parkway where trees and signs were blown down. Around Cashiers a number of trees were downed causing damage to homes and a pickup truck was blown off an embankment. Also shingles were blown off houses and roofs were blown off of some utility buildings. Near Brevard there was a damage swath about 200 yards wide and 3/4 mile long where a mobile home was blown off its foundation. Nine other mobile homes and two houses were damaged by the wind. In Gaston county shingles were blown off homes in a couple of locations, large trees were downed by the wind and a trampoline was blown into power lines. A damaging storm traversed Union county, blowing over a mobile home, destroying a barn and downing a number of large trees. Trees and power lines were downed near Charlotte.

Cavalier - Pembina - Walsh - Nelson - Grand Forks - Griggs - Steele - Traill - Barnes - Cass - Ransom - Sargent - Richland

10 1300CST
30 2300CST 0 0 Flood

Moderate to severe flooding occurred on the Red River on the North and many of its tributaries in North Dakota. Above normal precipitation was observed over the basin for the 6 months prior to the flood. In addition, heavy snow cover, with drifts up to 12 feet, lingered into early April. This combined with a rapid snowmelt to produce a memorable spring flood, despite below average precipitation from mid-March through April. Ice jams contributed to the flooding, particularly along the Pembina River near the Canadian border. The flooding was, for many areas, the worst since 1979, which for some, was the most devastating on record. In Grand forks, the fifth highest stage was recorded. On April 19th at 7 pm, a 19 yr. old man from Warroad, MN, drowned while attempting to cross the Robin bridge over the Red River at Drayton, ND. The man unfortunately did not heed a road closed sign, which clearly marked the flooding hazard. Residents along the Sheyenne River were hit particularly hard. At Kindred, ND, a flood disaster was declared by Governor Schafer. The governor of ND activated the National Guard to assist with the flood. In Grafton, the Park River swamped a mobile home court and flooded many basements in the city. On the Red River, the most extensive damage was from Grand forks downstream. Many roads and bridges, including I-29 just north of Grand forks, were closed.

| Harrison County Jewett | 29 | 1940EST | | | 0 | 0 | | | Hail (0.75) |
| Carroll County 4 SW Carrollton | 29 | 1945EST 2000EST | | | 0 | 0 | 1K | | Thunderstorm Wind |
| Thunderstorm winds downed a tree and a few branches southwest of Carrollton. | | | | | | | | | |
| Columbiana County Lisbon | 29 | 1955EST | | | 0 | 0 | | | Hail (0.75) |
| A Skywarn spotter reported 0.50 to 0.75 inch diameter hail. | | | | | | | | | |
| Carroll County 4 SW Carrollton | 29 | 1955EST | | | 0 | 0 | | | Hail (0.75) |
| Columbiana County 2 N Wellsville | 29 | 2017EST | | | 0 | 0 | | | Hail (0.75) |
| Coshocton County 7 NW Coshocton | 30 | 0640EST 1959EST | | | 0 | 0 | | | Flash Flood |
| Flood waters rose on the Killbuck Creek. Route 60, north of Blissfield, was closed by 400 PM EST. County Road 343 was also closed. In the northwest part of the county, County Road 206 was closed above the Mohawk Dam. This flood event turned into a prolonged event, affecting mainly the northwest part of the county for several more weeks. | | | | | | | | | |
| OHZ048 | | | | | | | | | |
| Coshocton | 30 | 2000EST 2359EST | | | 0 | 0 | | | Flood |
| A flash flood event earlier in the day turned into a prolonged flood that lasted through the end of April and continued into May. Numerous state, county, and township roads, especially in the northern and western part of the county were closed. | | | | | | | | | |
| OHIO, North | | | | | | | | | |
| Lucas County Countywide | 12 | 1545EST | | | 0 | 0 | | | Thunderstorm Wind (G52) |
| Wind gusts of 60 mph were reported near Sylvania and other locations. Trees were downed, some on power lines. | | | | | | | | | |
| Ottawa County Countywide | 12 | 1555EST | | | 0 | 0 | | | Tstm Wind/Hail |
| Hail, three quarter inch in diameter fell in Oak Harbor. Trees were downed. | | | | | | | | | |
| Sandusky County Countywide | 12 | 1647EST | | | 0 | 0 | 120K | | Thunderstorm Wind (G52) |
| Winds estimated to 60 mph downed trees on power lines. Localized higher gusts as high as 80 mph occurred. Bellevue was hard hit. Roof damage was common with Bellevue's high school roof blown off. The roofs were also blown off a barn and an unoccupied house. A boat storage building and a grain bin were destroyed. An outbuilding was destroyed at the Yogi Bear Campground. In Fremont, an outbuilding was blown from one neighbor's yard to the next and roads were closed from fallen trees. An outbuilding was destroyed in Clyde. | | | | | | | | | |
| Erie County Bellevue | 12 | 1650EST 1651EST | 0.3 | 20 | 0 | 0 | | | Tornado (F0) |
| A small tornado touched down in a field in extreme southwest Erie County near State Route 269. It was witnessed by a deputy sheriff who watched it move across the field and lift back into the storm cloud. No damage occurred from the tornado although straight line wind damage occurred in nearby areas from the storm. | | | | | | | | | |
| Erie County Countywide | 12 | 1712EST | | | 0 | 0 | 50K | | Thunderstorm Wind (G52) |
| Huron County Countywide | 12 | 1720EST | | | 0 | 1 | 60K | | Thunderstorm Wind (G55) |
| Numerous trees were downed, some on power lines, cars and structures. A Monroeville (Huron County) man was seriously injured by a downed tree. Also, a press box was destroyed at a varsity baseball game in Monroeville. Roof damage was reported at a number of locations. Some trailers were damaged in Florence (Erie County). | | | | | | | | | |

| | <p>A squall line of powerful thunderstorms, a derecho, roared across extreme north central and northeast Ohio producing microbursts. Numerous trees were downed with some communities reporting hundreds of downed trees, blocked roads, and power outages, some lasting for several days. Wind gusts were measured at 84 mph in Elyria (Lorain County) and Solon (Cuyahoga County) and it is likely some of the gusts approached 100 mph locally. Structures and automobiles were damaged by downed trees. A barn was blown down in Vermilion (Lorain) and a parking garage was badly damaged in Willoughby Hills (Cuyahoga). The roof was blown off a shopping center in Beachwood but none of the shoppers were injured. A truck was blown off the turnpike in Lorain County. Much of the roof was blown off a school in Kirtland (Lake) and a barn was blown down in Austinburg (Ashtabula). A woman was injured by a falling tree in East Cleveland. Four people received minor injuries at the Maple Festival in Geauga County. A 75 year old woman was killed on the southeast side of Cleveland when she was struck with an awning swinging in the strong winds. Two fisherman died on Pymatuning Reservoir in Ashtabula County when the sudden storm caught them on the lake and capsized their boat into the 40 degree water. One man was killed and two injured in York Township in Medina County when a tremendous wind gust lifted a car partially off the highway. Witnesses reported that the car came down and careened across the center line and was immediately struck by oncoming traffic. Large hail covered the ground in Middlefield (Gauga). Funnel clouds were sighted at a number of locations but no touchdown was confirmed. The temperature before the storm was in the 70s and dropped dramatically into the 40s with the passage of the storm with some 30 degree readings reported near Lake Erie.</p> | | | | | | | | |

| | | | One to two inches of rain on top of saturated ground caused flooding of streams, basements, low lying areas and poor drainage areas. High water was reported on many roads and some had to be closed including Ohio Route 13 and Route 30 in Richland County, Pitts Boulevard in Lorain County, and Route 700 in Hiram Township (Portage County). A man had to be rescued from his truck which stalled in high water on Route 13 near Mansfield. Flooding decreased gradually during the afternoon as the rain changed to snow, but high water remained in some areas into the 24th. | | | | | | |
| OHZ009 | | Erie | | | | | | | |

Severe thunderstorms moved across eastern Oklahoma during the afternoon and evening of April 21st and early morning of April 22nd. The storms spawned 7 tornadoes in eastern Oklahoma, and also produced damaging winds and large hail.

The first tornado touched down at 1800CST in the town of Barnsdall. The tornado partially destroyed the new fire department building in Barnsdall and damaged a few homes in town. The tornado was on the ground for 1/2 mile, was 100 yards wide, and was rated as F1 in intensity.

The second tornado touched down briefly at 1828CST 4 miles northwest of Nowata. No damage occurred with this F0 tornado.

The third tornado touched down briefly at 1915CST 2 miles west of Fairland. The tornado overturned several tractor trailers on Interstate 44 and was rated as F1 in intensity.

Tornadoes 4 through 7 were all produced by the same supercell thunderstorm which moved across southeast Oklahoma. The fourth tornado touched down at 2015CST in the city of McAlester. The tornado damaged 4 homes and 77 businesses in McAlester, and 9 people who injured in McAlester. The 100 yard wide tornado remained on the ground for 3 miles before lifting at 2020CST 3 miles east northeast of McAlester and was rated as F0 in intensity.

The fifth tornado touched down at 2030CST 7 miles east northeast of McAlester and remained on the ground for 5 miles before lifting at 2040CST 12 miles east northeast of McAlester. The 100 yard wide tornado damaged several homes and was rated as F1 in intensity.

The sixth tornado touched down at 2100CST 2 miles north of Kinta and remained on the ground for 1 mile before lifting at 2102CST 2 miles north northeast of Kinta. Trees were downed by this 75 yard wide tornado, but no structural damage occurred, and the tornado was rated as F1 in intensity.

The seventh tornado touched down at 2212CST in the town of Moffett and quickly crossed the Arkansas River into Arkansas. Trees and power lines were downed by this tornado in Oklahoma, but no structural damage occurred in Oklahoma. The tornado was 50 yards wide in Oklahoma and was rated as F1 in intensity in Oklahoma. The tornado strengthened as it moved into Arkansas, where 2 young children were killed in Fort Smith.

Damaging straight-line winds also occurred with the storms. Strong thunderstorm winds damaged roofs and downed numerous large trees 5 miles north of Barnsdall, and a tractor trailer was overturned by the high winds on Interstate 40 1 mile south of Warner. Windows were blown out in Okemah, a roof was blown off a barn near Eufaula, a tin roof was blown off a shed 5 miles south of South Coffeyville, and grain silos were blown over in South Coffeyville. A roof was blown off a building and power lines were blown down in Keota, trees were blown down in Stigler, and trees, fences, and power lines were blown down 5 miles west of Kinta and throughout all of Haskell County. Trees were blown down in Shady Point, and power lines were blown down 1 mile south of Quinton and in Bristow.

Thunderstorm winds gusted to 70 miles an hour in Bartlesville and in Boley, to 60 to 70 miles an hour in Henryetta, and to 65 miles an hour on the northwest side of Muskogee. Thunderstorm winds gusted to 63 miles an hour at an automated observing site 3

| | | | | | | | | | miles northwest of Stigler, to 61 miles an hour at an automated observing site 8 miles north of Ashland, and to 60 miles an hour 2 miles east of Castle. |
| | | | | | | | | | Large hail also accompanied the storms. Baseball size hail fell at Braggs, and 2 inch diameter hail fell at Panama. Golfball size hail fell 2 miles northeast of Mannford, 8 miles west of Sand Springs, 7 miles west of Welch, at Stigler, at Muldrow, at Okay, at Oktaha, and at Marble City. Half dollar size hail fell 2 miles south of Quinton, and quarter to half dollar size hail fell at Miami. Dime to quarter size hail fell at numerous other locations in eastern Oklahoma. |
| | | | | | | | | | Very heavy rainfall from the thunderstorms also resulted in flash flooding in Tahlequah. Several downtown streets were blocked off due to street flooding, and water entered a few businesses in downtown Tahlequah. |

| | | | | | | | | | Thunderstorms during the evening of April 21st and morning of April 22nd produced very heavy rainfall which resulted in flash flooding in Latimer, Haskell, Pittsburg, and Le Flore Counties in southeast Oklahoma. In Latimer County, parts of State Highway 82 in the Red Oak area were flooded, and numerous county roads were also flooded. In Haskell County, San Bois Creek overflowed its banks two different times during the morning of the 22nd and flooded a couple county roads each time. In Pittsburg County, State Highway 31 and U.S. Highway 270 were closed west of McAlester due to high water, and U.S. Highway 69 was closed south of McAlester due to high water. In Le Flore County, roads were flooded west of Panama and west of Shady Point. |

Severe thunderstorms moved across extreme northeast Oklahoma during the very late evening of April 27th and early morning of April 28th. Thunderstorm winds estimated at 100 to 115 miles an hour caused extensive damage in the Carpin, Picher, and Quapaw areas in Ottawa County. Several mobile homes were blown over, roofs were damaged, and trees were uprooted in these areas. U.S. Highway 69 was closed from Picher to the Kansas state line due to debris across the roadway. In Picher, 1 mobile home was destroyed, numerous utility poles were downed, windows were blown out, and numerous trees were downed. Some of the fallen trees damaged houses in Picher. A broken gas main in Picher was also caused by an uprooted tree.

Strong thunderstorm winds damaged a residential roof 2 miles west of Copan, and a barn roof was torn off 8 miles west of Nowata. Windows were blown out of a home 5 miles west of Welch, and many telephone poles were broken off by the wind in Lenapah. Numerous trees and power lines were blown down in Miami, and trees were blown down in Nowata and in Welch. Thunderstorm winds gusted to 100 miles an hour in Bowring, to 76 miles an hour at an automated observing site 2 miles northeast of Nowata, to 70 miles an hour in Copan, and to 68 miles an hour in Shidler. Thunderstorm winds gusted to 60 miles an hour 3 miles east of Burbank, 4 miles west of Nowata, and 10 miles west of Vinita, and to 59 miles an hour at an automated observing site 2 miles east northeast of Copan.

Large hail also accompanied the storms. Golfball to tennis ball size hail fell 1 mile north of Shidler, golfball size hail fell 1 mile west of Foraker, and half dollar size hail fell 10 miles west of Pawhuska and 8 miles north of Pawhuska. Quarter size hail fell 2 miles east of Foraker and at Copan, and nickel size hail fell at Lenapah.

| | 21 | 1340CST | | | 0 | 0 | | | Summary Of April 21 |
| | 22 | 0415CST | | | | | | | |
| Severe thunderstorms formed during the afternoon along a low-pressure trough in western Oklahoma and a warm front moving northward across the state. The storms moved into central and southeastern Oklahoma during the afternoon and evening, before weakening during the early morning hours of the 22nd. In all, ten tornados, baseball-sized hail, straight-line wind damage, and lightning damage were reported. | | | | | | | | | |
| The first tornado was reported 2 miles east of Perry in Noble County. The following 5 tornados occurred in Carter County in Ratliff City, in Jefferson/Carter Counties from north of Ringling to west of Healdton, 8 miles north of Healdton, 5 miles south of Healdton, and 5 miles southeast of Fox. The final 4 tornados occurred in Murray County 5 miles northwest of Sulphur, 2.5 miles southeast of Davis, 2 miles west of Sulphur, and near Hickory. (See individual reports for more information.) | | | | | | | | | |
| Hail as large as baseballs was reported in Tipton in Tillman County, near Waurika in Jefferson County, in Bethany in Oklahoma County, and south of Thackerville in Love County. | | | | | | | | | |
| Significant thunderstorm wind damage was reported in Frederick and near Tipton in Tillman County, in Temple in Cotton County, southeast of Ratliff City in Carter County, in Stonewall, in Lula, northwest of Roff, and northwest of Fitzhugh in Pontotoc County, in Maud in Seminole County, northwest of Albany in Bryan County, near Boswell in Choctaw County, and near Stratford in Garvin County. | | | | | | | | | |
| Lightning injured one man near Frederick in Tillman County, and set destructive fires west of Mead in Bryan County and in Oil Center in Pontotoc County. | | | | | | | | | |
| Payne County | | | | | | | | | |
| 5 N Stillwater | 21 | 1400CST | | | 0 | 0 | | | Hail (1.75) |
| Payne County | | | | | | | | | |
| 8 N Stillwater | 21 | 1405CST | | | 0 | 0 | | | Hail (2.50) |
| Tillman County | | | | | | | | | |
| 2 S Tipton | 21 | 1426CST | | | 0 | 0 | | | Hail (1.25) |
| Winds estimated at 50 mph drove half dollar sized hail into windows. Residential windows and car windshields were broken. | | | | | | | | | |
| Tillman County | | | | | | | | | |
| Frederick | 21 | 1430CST | | | 0 | 0 | 31K | | Thunderstorm Wind |
| Severe thunderstorm winds in Frederick peeled away a 30-foot X 50-foot section of the roof of the S-Mart building. Damage was estimated at \$30,000. | | | | | | | | | |
| Also, a shed was blown through a power line along Highway 183 near town. | | | | | | | | | |
| Tillman County | | | | | | | | | |
| Tipton | 21 | 1440CST | | | 0 | 0 | | | Hail (2.75) |
| Kiowa County | | | | | | | | | |
| Snyder | 21 | 1445CST | | | 0 | 0 | | | Hail (1.00) |

| ORZ001-003 | Northern Oregon Coast - Southern Oregon Coast | | | | | | | | |
| | 21 | 1500PST | | | 0 | 0 | | | High Wind (G56) |
| | 22 | 1000PST | | | | | | | |
| | High winds along the Oregon coast. Cape Blanco recorded 65 mph winds and 40 mph winds were reported near the mouth of the Columbia River. | | | | | | | | |
| ORZ001>003 | Northern Oregon Coast - Central Oregon Coast - Southern Oregon Coast | | | | | | | | |
| | 22 | 1200PST | | | 0 | 0 | | | High Wind (G75) |
| | 23 | 0800PST | | | | | | | |
| | The Oregon Coast continued to record high winds as another weather disturbance moved into Oregon. Cape Blanco 65 mph, Sea Lion Caves 74 mph, and Netarts gusted to 75 mph. | | | | | | | | |
| ORZ001>003-006-008-010 | Northern Oregon Coast - Central Oregon Coast - Southern Oregon Coast - Northern Cascades - North Central - Columbia Basin Plateau | | | | | | | | |
| | 23 | 0600PST | | | 0 | 0 | | | High Wind (G101) |
| | 24 | 0000PST | | | | | | | |
| | The strongest in a series of Pacific storms moved into Oregon on April 23rd. This storm brought heavy winds to most of Western Oregon, Central Oregon and the Columbia Basin. Cannon Beach recorded sustained winds of 60 mph with a gust to 116 mph. Newport 52 mph gusting to 62 mph, Gold Beach 45 mph gusting to 74 mph. Inland, Umpqua reported 51 mph winds, Bandon 40 mph gusting to 59 mph. Downed trees and power outages were reported at Salem, Woodburn and Beaverton. In Jackson County part of a roof was blown off of a school. In Eastern Oregon, a 48 mph gust was recorded at Redmond, with a 56 mph gust at Condon. | | | | | | | | |
| ORZ001>002-004-010>011 | Northern Oregon Coast - Central Oregon Coast - Willamette Valley - Columbia Basin Plateau - Northeast Mountain Areas | | | | | | | | |
| | 23 | 0800PST | | | 0 | 0 | | | Flood |
| | 25 | 2300PST | | | | | | | |
| | Heavy rainfall occurred on the 22nd of April over the Coast Mountains of Northwestern Oregon. 4.35 inches of rain in 24 hours was recorded at Elsie, and 5.98 inches in 24 hours at Laurel Mountain. This rain caused rivers draining this region to flood. Gaged rivers which recorded flooding problems included the Siletz, Wilson, and Nehalem Rivers. Heavy rains also fell over the Northern Cascades, swelling rivers draining the western slopes. In Eastern Oregon lesser amounts of rain fell, but still enough to cause the Umatilla River to reach flood stage along with other rivers draining the Northeast Mountains. The Columbia River crested slightly above flood stage at Vancouver, WA. Most rivers and streams receded to below flood stages by April 26th. | | | | | | | | |
| ORZ001 | Northern Oregon Coast | | | | | | | | |
| | 24 | 0000PST | | | 0 | 0 | | | Mudslide |
| | 26 | 0000PST | | | | | | | |
| | Heavy rains softened hillsides enough to trigger numerous mudslides in the Coast Range of Northwestern Oregon. In Kerry a manufactured home was pushed 200 yards. Buildings were also damaged in Woodson while 3 homes were destroyed by a mudslide in Clatskanie. | | | | | | | | |
| OREGON, Southeast | | | | | | | | | |
| | NONE REPORTED. | | | | | | | | |

PENNSYLVANIA, East

between 6 and 10 p.m. on the 1st.) combined with the lack of vegetation and saturated grounds from a snowy and wet winter caused flooding of numerous smaller streams throughout the two county area. The Perkiomen Creek in Graterford reached its flood stage of 11 feet at about 2 a.m. on the 2nd, crested at 11.7 feet at 430 a.m. and was back within bankfull by 7 a.m. No serious damage or injuries were reported. Storm totals included 3.00 inches in Collegeville, 2.05 inches in Valley Forge, 2.00 inches in Phoenixville, 1.95 inches in Green Lane, 1.54 inches in Glenmoore and 1.51 inches in Crum Creek.

A slow moving cold front and a separate low pressure system that moved off the Middle Atlantic Coast combined to produce heavy rain. The heavy rain combined with saturated soil to produce the flooding of smaller streams in the eastern part of the county. This included Cedar Creek in the Allentown Area. Storm totals averaged around 1.5 inches and included 1.91 in Springtown and 1.30 inches at the Lehigh Valley International Airport.

|------------------|----------------------------|----------|----------|--|--|--|--|--|------------------|

A low pressure system developed near Cape Hatteras the morning of the 9th, intensified and moved slowly northeast during the next 24 hours. It reached Cape Cod the morning of the 10th. This caused a late season rain and snow storm across Eastern Pennsylvania. Precipitation started as rain in Southeast Pennsylvania and rain and snow farther north during the predawn hours on the 9th. Precipitation type became intensity dependent during the day on the 9th. When precipitation became heavier, it fell as snow; when its intensity decreased, it changed back to rain. Nevertheless above freezing temperatures plus indirect radiation from the April sun caused much of the snow to melt as it reached the ground during the day.

Once the sun set (after 7 p.m. EDT), the snow began to accumulate mainly on grassy areas and overpasses across the area. By evening, the heaviest precipitation was confined to Southeast Pennsylvania. Grassy area accumulations averaged 1 to 3 inches across the region. Roads and overpasses became slippery and resulted in accidents. Within Philadelphia two fatal accidents occurred. At 6 p.m. on the 9th, an 83-year-old female passenger was killed at the intersection of 68th Street and Media when a vehicle crashed into a tree. At 720 p.m. a 23-year-old male was killed by a vehicle at the intersection of Erdrick and Cottman Streets. According to police reports slippery roadways were contributing factors in both accidents.

An estimated (Because it melted as it fell.) 2.4 inches of snow FELL at Philadelphia International Airport bringing the record breaking season SNOWFALL total to 65.5 inches. At the Lehigh Valley International Airport, 0.2 of an inch of snow fell. This left the seasonal total 0.1 of an inch short of the record 75.9 inches set just two winters ago. Accumulations included 3 inches in Tobyhanna, Green Lane, Perkasio, Exton and Glenmoore, 2 inches in Springtown and 1 inch in Valley Forge. For most locations this was the last measurable snow event of the season.

Heavy rain...which averaged around 2 inches caused the flooding of several streams throughout the county. About an inch fell between 1030 p.m. EDT on the 15th and 130 a.m. EDT on the 16th. Small streams in Valley Township were the first to flood 115 a.m. EDT. Most of the rain was over by 7 a.m. EDT on the 16th, but not before the Brandywine Creek exceeded its banks at both Downingtown and Chadds Ford. In Downingtown, the East Branch of the Brandywine Creek reached its flood stage of 7 feet at 5 a.m. EDT on the 16th, and crested at 9.81 feet at 9 a.m. EDT. The Brandywine Creek at Chadds Ford reached its flood stage of 9 feet at 11 a.m. EDT.

No serious damage or injuries were reported, but in neighboring Montgomery County, the United States Coast Guard Helicopter rescued four young men (Ages 20 to 23) from the rain swollen Perkiomen Creek in Lower Providence Township the morning of the 16th. Their fishing boat's tie to the shore broke, the boat hit a tree and capsized. The four young men were rescued from tree tops.

Storm totals included 2.23 inches in Glenmoore, 2.20 inches in Palm, 2.06 inches in Palm, 1.91 inches in Valley Forge and 1.81 inches in Norristown. A slow moving cold front was responsible for the heavy rain. Weak low pressure systems moving north along the frontal boundary enhanced the heavy rain across Eastern Pennsylvania.

| PENNSYLVANIA, East | | | | | | | | | |
| | | | | | | | | | Heavy rain...which averaged around 2 inches caused the flooding of several streams in Berks, Carbon, Western Lehigh and Monroe Counties. Hardest hit was Monroe County where pockets of 3 to 4 inches of rain fell and forced many streams out of their banks and resulted in several road closures. Heavy rain moved in from south to north beginning in Berks County a little after midnight EDT on the 16th. Most of the heavy rain was over by 7 a.m. EDT, except it lingered in Monroe County through the morning. No serious injuries were reported. |
| | | | | | | | | | Storm totals included 2.63 inches in Pottstown, 2.45 inches in Tannersville, 2.42 inches in Hopewell Village, 2.40 inches in Walnutport, 2.35 inches in Tobyhanna, 2.28 inches in Hamburg, 2.05 inches in Palm, 2.00 inches in Reading and 1.89 inches in Allentown. A slow moving cold front was responsible for the heavy rain. Weak low pressure systems moving north along the frontal boundary enhanced the heavy rain across Eastern Pennsylvania. |
| Delaware County Western | 16 | 1000EST 2000EST | | | 0 | 0 | | | Flash Flood |
| | | | | | | | | | Heavy rain...which averaged 1.5 to 2 inches caused the flooding of the Brandywine Creek along the Chester County border. Several other small streams in the western part of the county also exceeded their banks. Heavy rain fell mainly between 1 a.m. and 6 a.m. EDT on the 16th. The Brandywine Creek at Chadds Ford reached its flood stage of 9 feet at 11 a.m. EDT, crested at 9.8 feet at 4 p.m. EDT on the 16th and was back within bankfull at 8 p.m. EDT that evening. No serious damage or injuries were reported. |
| | | | | | | | | | Storm totals included 2.23 inches in Glenmoore and 1.55 inches in Chadds Ford. Weak low pressure systems moving north along the frontal boundary enhanced the heavy rain across Eastern Pennsylvania. |

| A severe thunderstorm caused wind damage in Richlandtown and Nockamixon and destroyed or badly damaged about a dozen homes and businesses in both locations. Damage estimates were around \$550,000. No serious injuries were reported. The storm struck Richlandtown first about 415 p.m. EDT. Dan's Auto Service was badly damaged as concrete block walls were pushed over. Part of their roof was found two fields away. Four other homes along Richlandtown Pike were damaged. One was immediately condemned as it was pushed off its foundation. Another house lost its roof. The deck was ripped from another house. Shingles were removed from another house. The outer walls of three garages were also blown down. | | | | | | | | | |
| Farther east in Bucks County the same thunderstorm caused wind damage in Nockamixon Township near the intersection of Pennsylvania State Routes 412 and 611 at 425 p.m. EDT. Damage started at Aspen Ford as the thunderstorm blew away a couple of showroom doors and a display tent. Damage then followed Route 611 as five homes suffered roof damage, two completely lost them. Two garages and two sheds were also badly damaged sending debris flying. One home lost a porch. Wind damage also occurred at the local drive-in. No serious injuries were reported. | | | | | | | | | |
| Montgomery County | | | | | | | | | |
| Horsham | 30 | 1536EST | | | 0 | 0 | | | Thunderstorm Wind |
| A severe thunderstorm uprooted trees and tossed lawn furniture in Horsham. One house was damaged by a tree in the Hidden Creek Development as a unearthed willow tree punctured a hole in the roof. About 2 miles northeast of Horsham the same severe thunderstorm uprooted two large oak trees and ripped the siding from one house. | | | | | | | | | |

Northwest Providence - Southeast Providence - Eastern Kent

| | | | | | | | | | |
|------------------|----------------------------|--|--|--|----------|----------|--|--|-------------------|
| 07 08 | 1800EST 1000EST | | | | 0 | 0 | | | Heavy Snow |
|------------------|----------------------------|--|--|--|----------|----------|--|--|-------------------|

A low pressure system developed off the North Carolina coast and a nor'easter accompanied by heavy, wet snow began during the late afternoon on Easter Sunday. The maximum snowfall accumulation of 6 to 8 inches fell in the higher elevations in the northern part of the state. The greatest reported totals included: North Foster, 8.0 inches; West Warwick, 7.0 inches; Woonsocket, 6.1 inches; and Johnston, 6.0 inches. Temperatures remained slightly above freezing during this storm, except in the higher elevations. Snow melted to only slushy accumulations on pavements but stuck to trees and wires. No significant travel problems were reported.

RIZ001>006

Northwest Providence - Southeast Providence - Western Kent - Eastern Kent - Bristol - Washington

| | | | | | | | | | |
|------------------|----------------------------|--|--|--|----------|----------|--|--|-------------------|
| 09 10 | 1800EST 1500EST | | | | 0 | 0 | | | Heavy Snow |
|------------------|----------------------------|--|--|--|----------|----------|--|--|-------------------|

A low pressure system developed along the mid-Atlantic coast and intensified to 984 mb (29.06 in.) as its center passed right over Nantucket Island, MA at 10 AM on April 10th. The storm brought a record late-season snowfall to much of the state and especially to the higher elevations of northern Rhode Island. North Foster had the maximum total of 21.5 inches, followed by North Smithfield with 16.9 inches and Clayville with 16.0 inches and a water equivalent of 2.05 inches. Providence had 7 inches, Block Island had 7 inches, yet less than 6 inches of snow fell in Newport County.

New snowfall records were established for a single April storm and for a 24-hour period during the month of April. At Providence, a new record monthly total for April was established at 12.9 inches. Snow depths on the ground reached new record maxima for April and for so late in the season. Seasonal snowfall totals hit all-time new record highs of well over 100 inches in many locations, especially in northern Rhode Island. Since this was a late-season event, considerably less snow accumulated on pavements, but the heavy, wet snow stuck to trees and power lines, which resulted in scattered power outages. There were numerous reports of lightning accompanying the snow between 8 PM on the 9th and 5 AM on the 10th. Some final seasonal totals included: North Foster, 129.1 inches; Warwick (T.F. Green Airport), 106.1 inches (old record 75.6 inches in 1947-1948); and Woonsocket, 93.7 inches.

| 17 | 1030EST 1745EST | | | | 0 | 0 | | | Flood |
|-----------|----------------------------|--|--|--|----------|----------|--|--|--------------|

A strong storm system moving through southern New England brought two to three and one-half inches of rainfall on April 16th to central and northern Rhode Island. In addition, strong winds accompanied this system along the south coast in Newport County. Tiverton reported a gust to 60 mph and Barrington had a gust to 58 mph from the east-southeast. The heavy rain fell on ground that had been saturated by heavy snowmelt from a record April snowfall the previous week. This resulted in minor flooding along the Patuxent River in Providence and Kent Counties between 3 PM and 5 PM on April 17th, or about 24 hours after the rain ended. The Blackstone River crested at Woonsocket at 9.1 feet at 2:30 PM on the 17th; flood stage is 9 feet.

| | 25 | 0700CST 2000CST | | | 0 | 0 | | | High Wind (G70) |
| | | | An intense area of low pressure brought high winds of 30 to 50 mph with isolated gusts to 80 mph to central and north central South Dakota from the morning to the evening of the 25th. The dry April soil was picked up by the high winds lowering visibilities in blowing dust. Some places experienced duststorm conditions with low visibilities and drifting dust. Many roofs lost shingles due to the high winds. In Eagle Butte, the Vietnam Vet's Center roof was blown off. Other buildings were also damaged across the area along with some broken windows. Some power poles and lines were downed west of Fort Pierre. Some trees and branches were also downed. Near Isabel, a cattle trailer was tipped over and two calf shelters were destroyed. Also, a twenty foot Conoco sign was blown down near Isabel along with other signs damaged across the area. The duststorm reminded many of the 1930s. Some wind gusts include, 60 mph at Mobridge and Selby, 70 mph at Miller, Pierre, and Murdo, and 80 mph at Isabel and Eagle Butte. | | | | | | |

| | | | Strong gradient winds with frequent gusts of 50 to 70 mph occurred for most of the day. Widespread minor tree damage was reported and a few large trees were blown down. Some power lines and poles were blown down. Other damage included television antennas and roof shingles blown off. The winds caused damage to a convenience store and a church near Menno in Hutchinson County. The roof of a school was blown off at Bonesteel in Gregory County while the school was in session. The roof damaged 8 cars when it fell in a parking lot but there were no injuries. The wind also damaged a home under construction at Avon in Bon Homme County. Blowing dust reduced visibility in many areas. There was significant damage to farmland and crops, especially wheat, caused by soil erosion, but the amount of damage could not be determined until the amount of crop recovery was known. | | | | | | |

| Power lines were down. Report was by law enforcement. | | | | | | | | | |
| Lawrence County .5 S Barnesville to .6 SE Barnesville | 20 | 0545CST 0546CST | 0.5 | 200 | 0 | 12 | 1.3M | | Tornado (F2) |
| A strong line of thunderstorms entered middle Tennessee Saturday morning, April 20. The storms moved from northwest to southeast. Some of these storms produced tornadoes, but a significant part of the damage occurred from straight line winds. Many homes...mobile homes and businesses were damaged. Damage estimates from the Tennessee Emergency Management Agency (TEMA) was placed at 1.25 million dollars across middle Tennessee during this storm event. | | | | | | | | | |
| The tornado started at Barnesville and then went back up as a funnel cloud. It touched down again at Summertown, Waco and Cornersville. Areas east of Cornersville toward Bell Buckle received straight line wind damage. The distance from Barnesville to Cornersville is about 33 miles. Lengths and widths are estimated at Barnesville, Summertown, Waco and Cornersville. Cornersville was the hardest hit. | | | | | | | | | |
| An eyewitness saw the funnel come down and take the roof off a basement house about 1/2 mile south of Barnesville on Barnesville Rd. The tornado went up as a funnel cloud but came down again later as a tornado at Summertown and did some damage to 25 homes...2 severe. Trees were uprooted, including a large oak tree and a cherry tree with a diameter of 12 to 14 inches. The tornado went up as a funnel cloud, and touched down briefly at Waco, in Giles county. The tornado damaged a brick structure that was used as a store. The building lost its roof and most of its walls. A mobile home was leveled across the street. Straight line winds appeared to have damaged a cabinet and wood shop business at the junction of highway 31 and highway 129. Storm damage estimate for Giles county is about \$400,000. | | | | | | | | | |
| The tornado came down again for the final time at Cornersville, at 0615 CST, and was on the ground for an estimated 1.5 miles. Its width was estimated about 1/4 mile. The tornado started at 1.5 miles northwest of the junction of U.S. Route 31A and Coleman Rd. or 1.3 miles southwest of Cornersville. The tornado damage ends near the junction of Coleman Rd. and U.S. Route 31A. | | | | | | | | | |
| The tornado demolished a mobile home park. 7 mobile homes were totally destroyed and 10 others damage. 7 people were injured in the mobile home park, one critically. Another person was injured in Marshall county. 2 high tension towers were bent in half and telephone poles were snapped along Coleman Rd. The Cornersville School auditorium was damaged, but it was not from the tornado. | | | | | | | | | |
| There were 2 injuries in Coffee county and 2 injured in Bedford county, for a total of 12 injuries from the storm. | | | | | | | | | |
| TEMA estimates of the number of homes, mobile homes and businesses that were destroyed or sustained severely damage from the tornado and the straight line winds for the following counties are in the respective order: Marshall County...5, 10, 14 Lawrence County...10, 1. and zero. Coffee County...4, 10, 1. Giles County...6, 2, 2. Bedford County...0, 4, 0. | | | | | | | | | |
| Lawrence County Summertown to 5.2 SE Summertown | 20 | 0550CST 0556CST | 1 | 440 | 0 | 0 | | | Tornado (F2) |

| | 05 06 | 0600CST 0100CST | | | 0 | 0 | | | Heavy Snow |
| A late season winter snowstorm dumped record snowfall over much of the Big Country and Concho Valley on the afternoon and evening of the 5th. The storm began early Friday morning (the 5th), but did not reach its peak until the middle of the afternoon, before finally tapering to an end after midnight Saturday morning. The 9.3 inches of snow in Abilene shattered the all-time 24 hour record snowfall for the city. The snowfall was even heavier to the west of Abilene in Nolan County, where Sweetwater picked up an incredible 18 inches of snow and Maryneal received 12 inches. | | | | | | | | | |
| The snowstorm came as a result of a nearly stationary upper-level system over southern New Mexico. Weak upper-level disturbances spreading out from this system were riding up and over the warm, moist air from the Gulf of Mexico which also rode over the top of the cold air. In this case, the weak disturbances collided with the cold air at the surface and the warm air above the surface to create widespread clouds and precipitation across central and west Texas. | | | | | | | | | |
| The heavy wet snow brought Easter holiday travel to a halt across parts of the Big Country when I-20 was closed in Nolan County. Warehouses collapsed under the weight of the snow. The combination of rain and melting snow left streets and underpasses covered with standing water. On the positive side, the snow and the rain that preceded it did help alleviate the very dry conditions across the area. | | | | | | | | | |

| | 01 | 0000CST | | | 0 | 0 | | | Drought |
| | 30 | 2359CST | | | | | | | |
| The winter of 1995-1996 had below normal precipitation over all of Southeast Texas. This trend continued into April of 1996. Conditions have become so serious that this dry spell is now being referred to the drought of 1996. Through the first 4 months of 1996 the rainfall amounts have been less than 50% normal with some areas only receiving only 30% of their normal rainfall. The lack of rainfall has created hazardous conditions for wildfires throughout Southeast Texas especially in the forests of East Texas. If the drought continues, losses to agricultural products will be in the billions of dollars. Estimated property damage for Southeast Texas so far is \$2 million, with agricultural losses at \$8 million. | | | | | | | | | |

| | | | A cold airmass that settled over North Texas early on the 5th was overridden by warm, moist air ahead of a strong upper level disturbance. Widespread rain and occasional sleet changed to snow west of a Montague to Weatherford to Eastland line during the morning. The snow continued over this area throughout the day with 3 to 6 inches reported by evening. Isolated snowfall amounts of up to ten inches occurred in Stephens and Young Counties. Sixty-year-old snowfall records were broken by this late season event. | | | | | | |
| Young County Newcastle | 12 | 0909CST | | | 0 | 0 | | | Hail (0.88) |
| | | | Explosive thunderstorm development occurred along a cold front from Cooke County to Parker County. This activity developed south and east during the late afternoon. Several supercells moved across the region with widespread large hail to golfball and baseball size. A few tornadoes also occurred during the evening over the south central counties. | | | | | | |

| Throckmorton County 6 W Throckmorton | 21 | 1422CST | | | 0 | 0 | | | Hail (0.88) |
| Severe thunderstorms developed during the late afternoon along a dry line. Widespread large hail up to baseball size was produced by these storms over several counties in the northwestern portion of North Texas. As the evening progressed, the main focus for development shifted to just south of the Red River. The development of the low level jet increased the low level shear and inflow into the storms, thus increasing their tornadic potential. Several large high precipitation supercell thunderstorms repeatedly moved across Montague, Cooke and Grayson Counties for several hours producing widespread hail to softball size, damaging downbursts, heavy rain and at least 10 weak tornadoes. | | | | | | | | | |

| | 30 | 2359CST | | | | | | | |
| | Rainfall continues well below normal. NWS Amarillo is now in it's longest dry period on record. The month of April had two trace events and no measurable rain. During the past seven plus months the region has only received 15 to 25 percent of its normal rain. Agriculture has been seriously effected with estimated losses at 25 million dollars. Most of the loss is due to the total loss of dry land wheat pasture and increased feed cost. Further losses were from the forced sale of livestock in a depressed price cycle due to lack of feed availability. | | | | | | | | |

| 30 | 2359CST | | | | | | |
| Very dry weather continued to plague the South Plains of West Texas in April. On average, South Plains cities received only 0.26 inches of precipitation this month, bringing the year-to-date precipitation to just 0.90 inches (which is about 33 percent of normal). | | | | | | | |
| The drought will likely impact the area's agriculture significantly. However, this impact will be more noticed in later months since the area's main crop (cotton) is not planted until May and/or June. | | | | | | | |

| TXZ047>048-051>052-057-062>063-070 | Borden - Scurry - Martin - Howard - Van Horn And Salt Flat Basin - Midland - Glasscock - Reagan | | | | | | |
| 05 | 0500CST 1700CST | | | | 0 0 | | Heavy Snow |
| Rain fell across the Permian Basin during the early morning hours, but by daybreak had changed mostly to snow. Heavy snow fell over all but the southern Permian Basin during the middle and late morning hours and continued in the eastern parts of the region into the afternoon. More snow moved into the transpecos region during the afternoon, but by sunset only a few flurries remained. | | | | | | | |
| Snow amounts ranged from traces in the western and southern Permian Basin, to 2-3 inches in the central Basin, to generally 6-8 inches in the eastern areas. Within the Midland area of responsibility the heaviest totals were in southeastern Scurry County where 10-11 inches of snow were reported at Inadale. In northwestern Howard County U.S. Highway 87 was closed for a few hours due to heavy snows and slick conditions. | | | | | | | |

Although officially only 2 inches of snow was recorded at the Midland NWS office this was the biggest snow on record for the month of April. The latest measurable snow on record was 1/2 inch on 4/7/83. The home-opening baseball game for the Midland Angels was snowed out, the first ever for a Texas League game.

| Synopsis for evening of April 21 and early morning of April 22: A cold front which had pushed south through the Permian Basin on the 20th began to return northward as a warm front during the evening of the 21st in response to a short-wave trough approaching West Texas in a moderately strong southwesterly mid-level flow. Shortly after 7pm CDT, a southward moving surface boundary collided with the warm front, which was now over Upton and Glasscock Counties. By 10pm, convection was initiated over Central Upton and southern Glasscock counties. Initially the cells moved with the mean flow along the warm frontal boundary, however by about midnight two cells in the northern half of Upton County developed supercellular characteristics and began to move to the right of the mean wind. The two supercells moved east into northern Reagan County producing hail between 1.75 and 2.00 inches. Meanwhile, a third supercell developed in northeastern Glasscock County at approximately 1250 am and moved quickly into Sterling County. By 150 am, outflow boundary interactions reinitiated convection over Northern Upton county with additional convective development further southwest over Northern Pecos county. These cells quickly became outflow-dominated and merged together to form a mesoscale convective complex. This complex increased in areal coverage as it moved northeast over Upton and Reagan counties producing hail of up to 1.75 inches in diameter. | | | | | | | | | |

UTAH, North, Central and South

| | | | | | | | |
|---|----|---|--|--|--------|------|--------------------------------|
| Washington County (Sgu)St George Muni | 12 | 1800MST 1930MST | | | 0 0 | | Thunderstorm Wind (G66) |
| A fast moving cold front swept through Utah during the late afternoon and evening hours. Along this cold front in southwest Utah several strong thunderstorms and one severe thunderstorm developed. Microburst winds and lightning were the main hazards from these storms. Many locations had wind gusts in excess of 50 mph (43 kts). Numerous power outages were reported. The severe thunderstorm put down a wind gust that measured 76 mph (66 kts) at the St. George Municipal Airport. Only minor damage was reported. The same thunderstorm produced a wind gust estimated at 65 mph (56 kts) in the town of Virgin about 20 minutes later. Lightning damage to several trees was also noted by the weather spotter in Virgin. | | | | | | | |
| UTZ006-009 | | Southwest Valleys And Deserts - Utah'S Dixie 18 0930MST 1400MST | | | 0 0 | | High Wind (G53) |
| The cold front that brought snow to northern Utah's Mountains created strong, gusty winds elsewhere in the state. Among the reports were a 61 mph (53 kts) wind gust at the St. George Municipal Airport and a 60 mph (52 kts) gust at Pinto Junction (6 miles west of Cedar City). No damage was reported from these winds. | | | | | | | |
| UTZ010 | | Northern Mountains 18 1300MST 2100MST | | | 0 0 | | Heavy Snow |
| Another weather system rapidly swept a cold front through Utah on this date. Generally Utah's northern mountains received from 6-8" in this 8-hour period. Brighton ski resort measured 9" and Nordic Valley 11" for the most in the state. | | | | | | | |
| UTZ010 | | Northern Mountains 20 0400MST 1600MST | | | 0 0 | | Heavy Snow |
| Another weather system in a series of disturbances swept through northern Utah on this date. The northern mountains averaged from 6-9" during this 12-hour period. The Alta ski resort measured the highest total with 10" during this event. | | | | | | | |
| UTZ004 | | Uinta Basin 24 1600MST 2100MST | | | 0 0 | 100K | High Wind (G52) |
| A cold front moved through northeast Utah this afternoon and evening stirring-up some strong westerly winds. The strongest wind gust in the Uinta Basin of 60 mph (52 kts) occurred at the Veranal Airport. Minor tree damage was reported there. About 3 miles west of Vernal in the town of Maesser, the gusty winds rapidly spread a fire through a lumberyard. Damage estimates for that blaze were at \$100,000. | | | | | | | |

above the 1000 foot elevation with slippery roads across North Central and Northeast Vermont. A few automobile accidents were reported in Washington County.

Across Vermont between 1 and 2 inches of rain fell...except an inch or less across northwest Vermont. The heaviest rain fell across southern Vermont and along and east of the Green Mountains. The rain tapered off to rain and snow showers Tuesday night into Wednesday (4/17/96).

Many rivers reached bankful with some minor field flooding. Most notably the North Branch of the Winooski (Washington County), The Otter Creek (Rutland County), The Black River (Windsor County) and the Lamoille Rivers (Lamoille County) resulted in flooding of low lying areas. A few roads were closed in Pittsford (Rutland County) due to flooding.

| | 30 | 1400CST | | | | | | | |
| | A late season snowstorm brought 6 to 14 inches of heavy, wet snow to much of central and north central Wisconsin. The heaviest snow fell across eastern Vilas, eastern Oneida and northeast Lincoln counties, where a foot or more of snow was measured. Some of the higher accumulations included: 13.3 inches at Rhinelander (Oneida county), 13 inches at Harrison (Lincoln county), 12 inches at Lac Vieux Desert (Vilas county), 11 inches at Rosholt (northeast Portage county) and 10 inches at Wausau (Marathon county) and Eagle River (Vilas county). Tree branches that were weighed down by snow snapped off and fell on power lines, resulting in power outages for at least 3000 people in north central Wisconsin. | | | | | | | | |

| | 22 | 1020CST | | | | | | | |
| | The combination of melting snowpack, ice jams, and heavy rain caused flooding of creeks, streams, and small rivers across northwest Wisconsin. The most serious flooding occurred along the Bad River where 15-20 homes near the community of Odanah were flooded. High water near Odanah also closed a 300 yard stretch of U.S. Highway 2, the main east-west traffic carrier across northern Wisconsin. Minor flooding also occurred along other area waterways, including the Montreal River on the Wisconsin-Michigan border, the Nemadji and Amnicon Rivers in Douglas County, and Devils Creek in Mellen. | | | | | | | | |

| | | | | | Killed | Injured | | | |
| <u>WISCONSIN, Southeast</u> | | | | | | | | | |
| The Walworth county bow echo moved into Kenosha county and continued to generate downbursts with damaging winds. Dozens of large trees were toppled around Twin Lakes, and a summer cottage was flattened. A missionary building in Twin Lakes was destroyed. East of Twin Lakes on the way to Wilnot several barns, machine sheds, and mobile homes were damaged or leveled. | | | | | | | | | |
| Kenosha County Pleasant Prairie | 19 | 2222CST | | | 0 | 0 | 1.1M | | Thunderstorm Wind |
| As the bow echo tore east/northeast through Kenosha county on the way to Pleasant Prairie, its powerful west/southwest winds, estimated to be 80 to 100 mph, leveled or damaged several more barns and machine sheds. In addition, major building damage was sustained at St. Benedicts Abby on Benet Lake. The city of Pleasant Prairie was hard hit as many buildings sustained damage, and numerous large trees were pushed over. The storm continued through the south part of the city of Kenosha, pushing some cars sideways, pulling down power lines, and felling large trees. In scattered spots along the damage path, small hail accumulated to a depth of 6 to 12 inches. On the backside of the bow echo there were numerous reports of an easterly wind gust of 40 to 50 mph. | | | | | | | | | |
| Racine County Burlington | 19 | 2226CST | | | 0 | 0 | | | Hail (0.75) |
| Racine County Racine | 19 | 2245CST | | | 0 | 0 | 5K | | Thunderstorm Wind |
| On the north side of the bow echo the powerful winds toppled a large tree onto a house, damaging its siding and roof, and tore many large limbs out of neighborhood trees. | | | | | | | | | |
