

Winter Weather Training

- We don't just do weather training for warm season convective weather, we also do it for winter weather!
- Learn about
 - The hazards from different types of winter precipitation
 - Snowfall climatology across our region
 - The winter outlook and what are the driving factors
 - The difference between watches, warnings, and advisories
 - Criteria for watches, warnings, and advisories
 - How to properly measure snowfall
- The presentation is planned for Saturday December 13, 2025 at 10am:
 - <https://attendee.gotowebinar.com/register/2009553664415494742>
