The purpose of these briefings is to give you an idea of what to expect weather-wise for the time period indicated above, and to give you a heads-up as to what types of weather hazards and weather impacts, if any, are possible.
The Upcoming Weather Pattern

Key Points:

- Showers and storms today and Tuesday, much like what was seen over the weekend (some moisture associated with T.S. Fred on Tuesday)
- Afternoon showers/storms from Wednesday onward – typical summerlike pattern
- Tropical impacts not anticipated this week, but the tropics are heating up
Accumulated Precipitation Forecasts Through the Next 7 Days

Courtesy of the Weather Prediction Center (www.wpc.ncep.noaa.gov)

Key Points:

- Scattered showers/storms today, locally heavy rainfall
- Moisture associated with T.S. Fred could produce locally heavy rainfall across western NC on Tuesday
- Lesser rainfall totals Wednesday onward
WPC’s Excessive Rainfall Outlook
Courtesy of the Weather Prediction Center (www.wpc.ncep.noaa.gov)

Key Points:
- Slow moving showers/storms could result in locally heavy rainfall, especially on Tuesday
- Flooding potential on Tuesday will be contingent on how many storms develop today – stay aware for updates in the next day or two
Key Points:

- Thunderstorms expected each day this week, but widespread severe weather is not anticipated
8 to 14 day outlook courtesy of the Climate Prediction Center
Summary for the Week

- Showers and storms today and Tuesday, much like what was seen over the weekend (some moisture associated with T.S. Fred on Tuesday)

- Afternoon showers/storms from Wednesday onward – typical summerlike pattern

- Tropical impacts not anticipated this week, but the tropics are heating up
