# Annual temperature records for the Reno area

Data for the Reno area are archived at NCEI (formerly NCDC) and in xmACIS from January, 1893 through the present. It should be noted, however, that many residents of Reno are aware that the record coldest temperatures for Reno occurred in January, 1890. While these are unofficial they should be kept in mind, especially when discussing records with knowledgeable local persons in academia or the media.

The following are the unofficial record low temperatures that have occurred in Reno before January, 1893. Reno's all-time record low temperature of -19 occurred on January 8, 1890.
