

Winter Precipitation Possible Sunday

December 12, 2024
5:17 AM

OVERVIEW

- Precipitation will be returning to the area on Sunday
- Some freezing rain or wintery mix is possible before changing all to rain

TIMING

- Precipitation will spread from west to east across the area Sunday morning

HAZARDS & IMPACTS

- Precipitation may start as freezing rain or a wintery mix (freezing rain/sleet)
- Any winter type precipitation will be light
- **Hazardous travel** will be more likely rather than downed tree limbs and power outages
- Temperatures warm above freezing during the day as rain continues into Sunday night
- Main impacts will be west of the Blue Ridge

ADDITIONAL INFORMATION

- **Low Confidence in timing and amounts**
- Model trends has been slowing the arrival time of the precipitation
- It is possible that precipitation begins late enough Sunday that more locations will already have warmed above freezing
- This forecast is still evolving and details will change

NEXT BRIEFING

- As needed
