In the Room

- Need to have more careful management regarding data - inputs and obs used for verification. Tiger team or cross-WG focused on observations: requirements, QC, community obs database, priorities, interfacing with JEDI. Project 3.3 focuses on data portals. Who? Infrastructure folks, data portal folks, knowledgeable in components, data, obsproc
- Replacement for SREF - weaknesses of GEFS fixed before it's viable. What are the performance targets?
- Post-processing testbed. IDSS future role of the forecaster, and supporting that. Dave Novak/WPC
- Are there planning documents for the Annexes where needed, e.g., V&V?
 - Is the funding aligned with this?
