U.S. Drought Monitor

Link to the [latest U.S. Drought Monitor](#)

- There has been some improvement to drought conditions over portions of the southeast U.S. during the past few weeks, however little change has occurred across the western Florida peninsula.

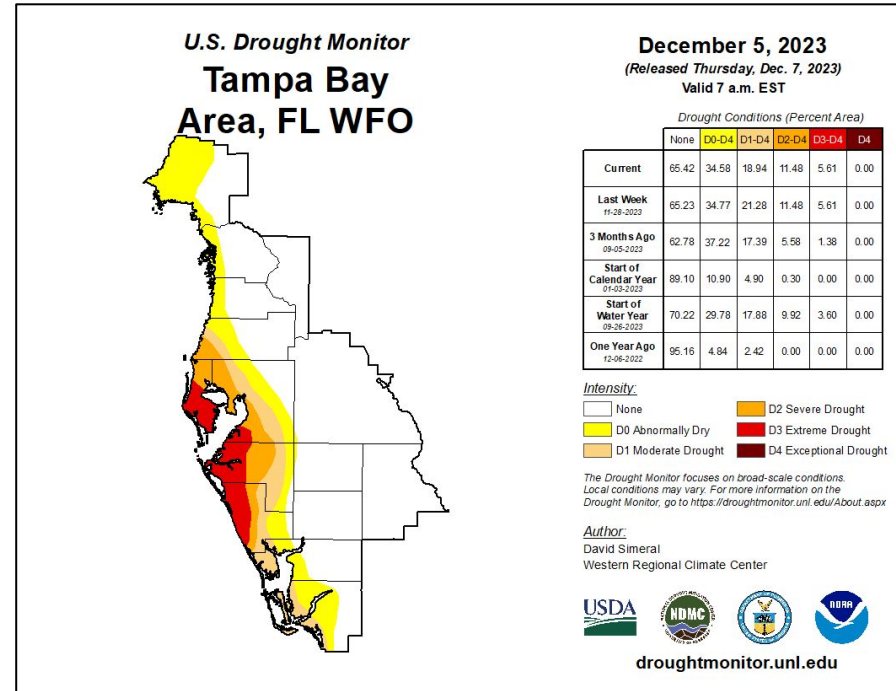

U.S. Drought Monitor for WFO Tampa Bay Area

Link to the [latest U.S. Drought Monitor](#) for Florida

- Drought intensity and Extent
 - **D3 (Extreme Drought)**: along the coast from central Pinellas county south through Manatee county into central Sarasota county.
 - **D2 (Severe Drought)**: bounded the D3 area across southwest Pasco, northern Pinellas, western Hillsborough, and inland portions of Manatee and Sarasota counties
 - **D1 (Moderate Drought)**: bounds the D2 area from western Pasco county and extends south along coastal Charlotte and Lee counties.
 - **D0: (Abnormally Dry)**: extends from western Levy county south along the coastal nature coast, and bounds the remaining D1 region to the south.

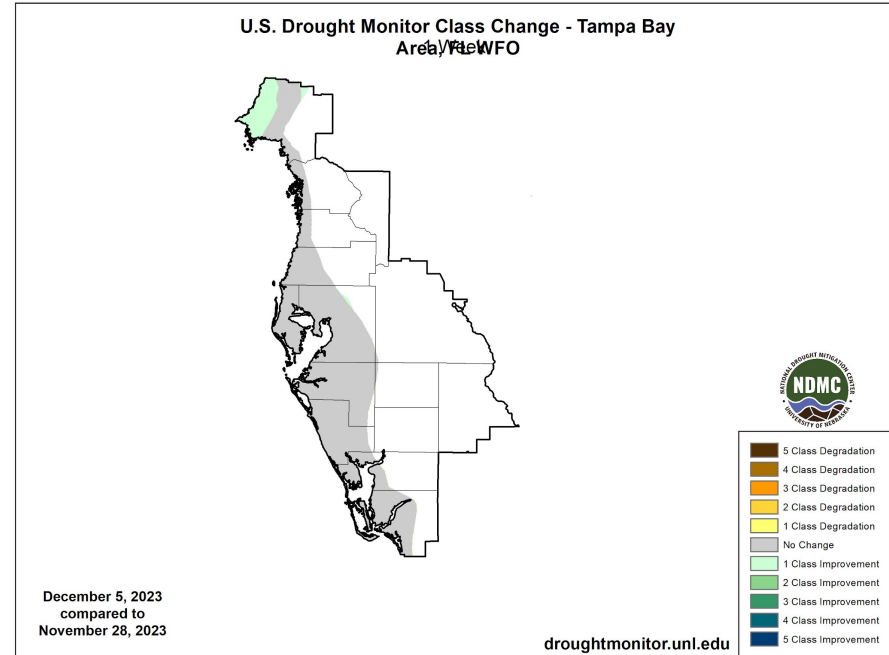

Recent Change in Drought Intensity

Link to the latest [1-week change map](#) for Florida

- One Week Drought Monitor Class Change.
 - In the last week ending Tuesday December 5, a category improvement to D0 occurred across western Levy county. Otherwise, there was no change to the remainder of west central and southwest Florida.

Precipitation

Table of Accumulated Rainfall (inches) for Select Locations - January 1 to December 6, 2023

The following table gives the rainfall from January 1, 2023 to December 6, 2023:

Station	Site Id	Observed Rainfall	30 Yr Normal	Dep fm Normal	Percent of Normal
Tampa Area	TPA:	33.00	47.33	-14.33	70%
St Pete/Clearwater	PIE:	*28.49	51.19	-22.70	56

St Leo	STLF1:	43.14	50.93	-7.79	85%
Bartow	BARF1:	45.39	48.72	-3.33	93%
Mountain Lake	LWLF1:	40.12	50.32	-10.20	80%
Wauchula 2 N	WAUF1:	40.85	49.87	-9.02	82%
City 8 SW	DSOF1:	56.65	50.28	+6.37	113%

Summary of Impacts

Links: See/submit [Condition Monitoring Observer Reports \(CMOR\)](#) and view the [Drought Impacts Reporter](#)

Hydrologic Impacts

- Rivers and streams over the interior are near climatological normals. The Withlacoochee, Anclote, and Myakka rivers, along with Cypress Creek, continue to run in the lowest 15th percentile. The Alafia and Little Manatee rivers are running in the lowest 25th percentile.

Agricultural Impacts

- There are no known impacts at this time.

Fire Hazard Impacts

- There are no known impacts at this time.

Mitigation Actions

- Water conservation techniques are strongly encouraged in drought areas. One day a week watering restrictions are in effect for Hillsborough, Pinellas, and Pasco counties, along with Cape Coral and unincorporated Lee county. Please refer to your municipality and/or water provider for mitigation information. Local water restriction ordinances may be in place.

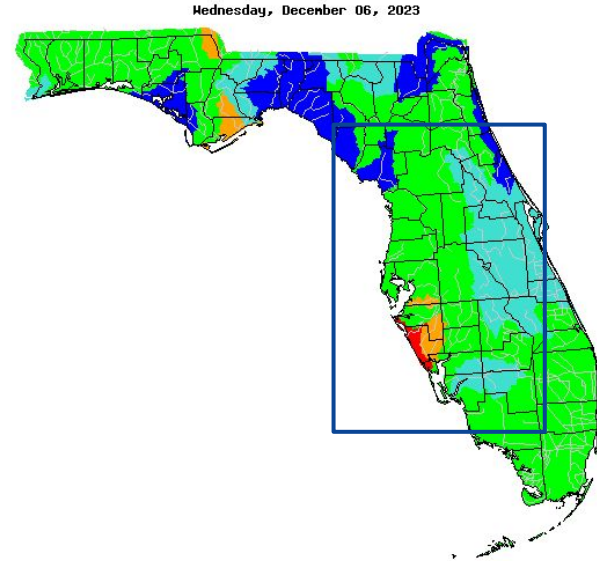

Hydrologic Conditions and Impacts

USGS 7 day average streamflow HUC map valid December 6, 2023

- Generally a half inch or less of rain fell across the region this past week. Rainfall was not sufficient to prevent rivers and streams from slowly falling.

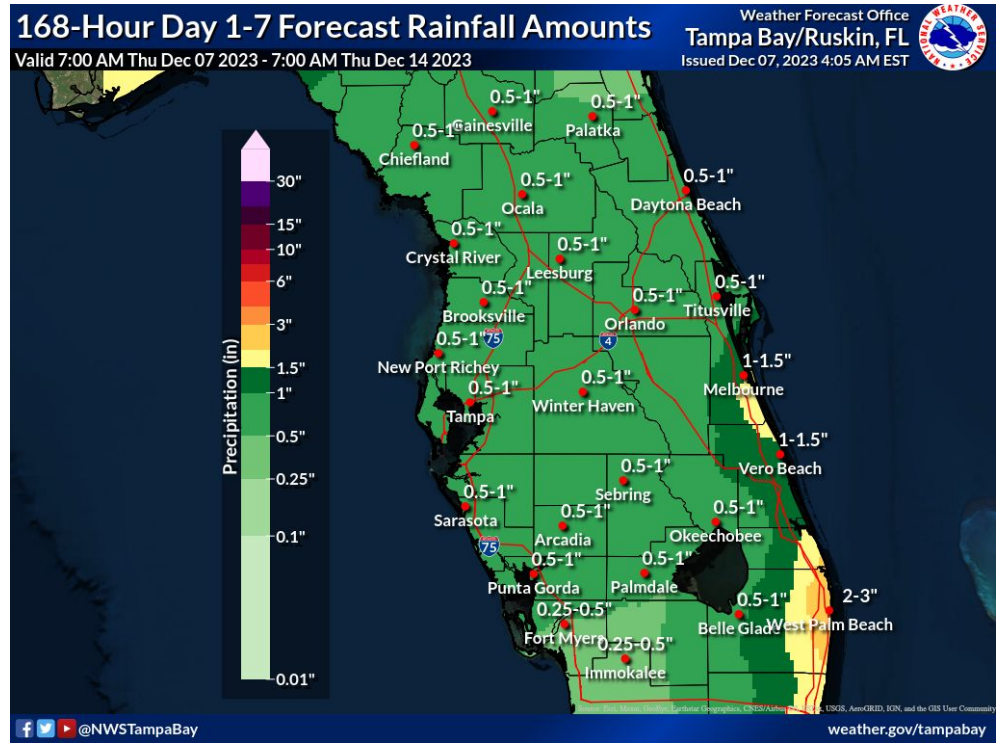

Explanation - Percentile classes							
Low	<10	10-24	25-75	76-90	>90	High	No Data
	Much below normal	Below normal	Normal	Above normal	Much above normal		

Seven Day Precipitation Forecast

- Rainfall during the next week is expected to generally range from about 0.50 to 1 inch across the region.

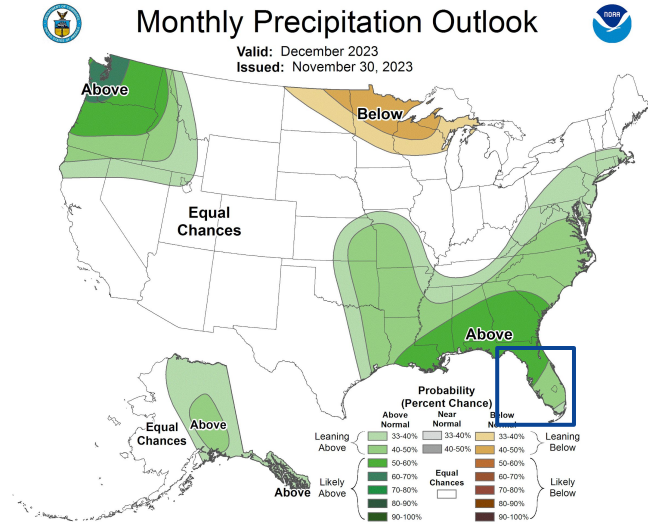

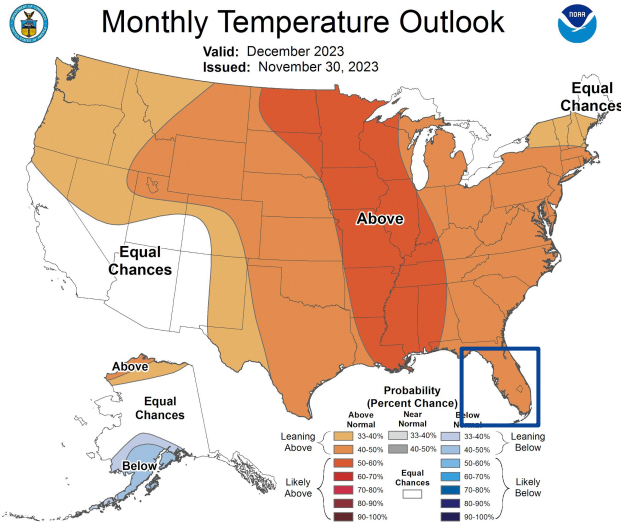

Long-Range Monthly Outlook

The latest monthly and seasonal outlooks can be found on the [CPC homepage](#)

- Above normal temperatures and precipitation are favored across the Florida peninsula during the month of December.

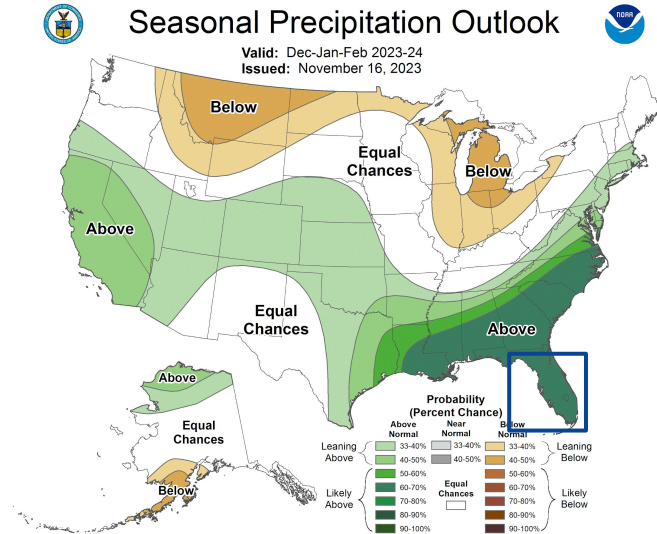

Long-Range Seasonal Outlook

The latest monthly and seasonal outlooks can be found on the [CPC homepage](#)

- Equal chances of above, below, and near normal temperatures are forecast for December through February.
- Above normal precipitation is likely during December through February.

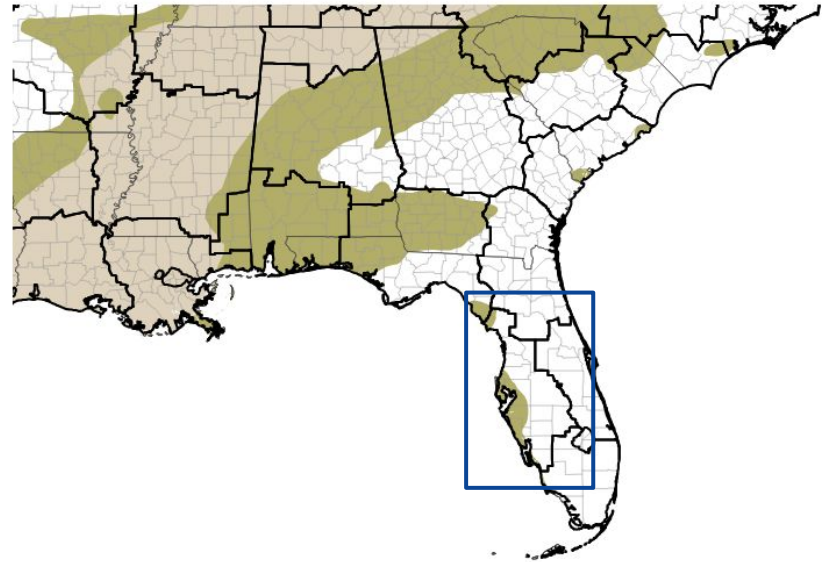

Drought Outlook

Seasonal Drought Outlook through February

- The outlook for wetter than normal weather during the upcoming winter should ease Drought conditions.
