## April 2024 Climate Summary for West Central and Southwest Florida

Temperatures averaged from about 1.5 degrees Fahrenheit below normal to 1 degree Fahrenheit above normal this April. This is thanks to many days with rather dry air across the region which allowed the low temperatures to fall below normal on numerous mornings while several afternoons were above normal.

As far as rainfall, April is usually one of the drier months of the year. This was true across almost all of the area this year, especially south of a line from about Sarasota to Frostproof where many areas ended up less than 50 percent of normal.
