December 2018 Climate Summary for West Central and Southwest Florida

December 2018 started and ended warm with several days in between well below normal. The warmer temperatures did out do the cooler days so we saw averages end up about 0.5°F below normal to 3°F above normal.

Temperature (F)
12/1/2018 - 12/31/2018

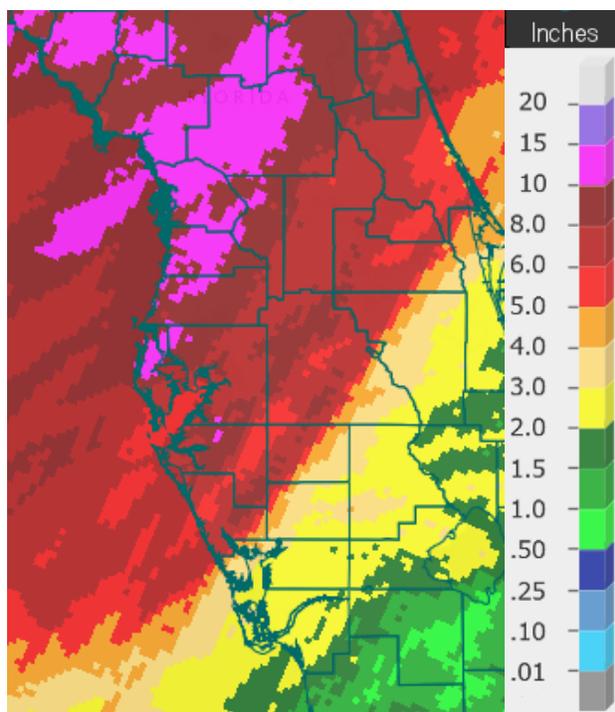

Departure from Normal Temperature (F)
12/1/2018 - 12/31/2018

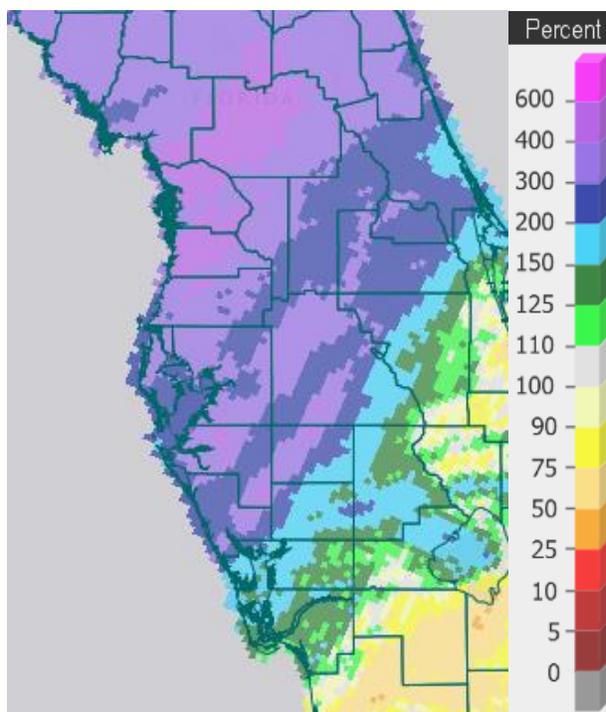

Rainfall on the other hand was well above normal across much of the region as an El Niño like pattern setup bringing the storm systems further south leading to showers and thunderstorms with locally heavy rainfall on three different days. Areas from around Sarasota County to Polk County northward saw three to four times the normal rainfall with some locations, listed below, in the Top Ten Wettest for December.
