## January 2019 Climate Summary for West Central and Southwest Florida

January 2019 saw a wide range of temperatures from day to day as cold fronts moved through every 4 to 6 days with warm days and temperatures several degrees above normal ahead of them followed by much cooler drier air and temperatures several degrees below normal. Overall though the average temperatures for the month were close to normal and about 2.0°F below normal to 1.0°F above normal.

Temperature (F)  
1/1/2019 - 1/31/2019

Departure from Normal Temperature (F)  
1/1/2019 - 1/31/2019

Rainfall on the other hand was generally above normal as the El Niño like pattern continued bringing the storm systems further south leading to showers and thunderstorms with locally heavy rainfall on three different days. Areas from around southern Sarasota County to central Highlands County southward saw two to three times the normal rainfall with Fort Myers and Archbold Bio Station in the Top Ten Wettest for January, with several other locations in the Top Twenty Wettest.

Rainfall January 2019

Percent of Normal

Following are tables of the Top Ten Warmest, Coolest, Wettest, and Driest Januarys at some official NWS locations, which include the average/total for this January, and the 1981-2010 Normal (average) temperature and rainfall for the month of January.

**CHIEFLAND 5 SE** (Records began in June 1956):
