

## June 2022 Climate Summary for West Central and Southwest Florida

Temperatures this June were generally near to above normal with several days having Heat Advisories in effect for parts of the region where heat indices climbed to between 108 and 112 degrees. These warm temperatures placed several locations in the Top Ten Warmest for June.

Graphics Source: NOAA Regional Climate Centers

As for rainfall, it was a pretty typical June as our rainy season got underway with scattered to numerous showers and thunderstorms on many days. However, not that uncommon thanks to the random nature of our thunderstorms during the rainy season, we saw a wide range in rainfall amounts with some spots well below normal while others were well above normal.
