May and Spring 2025 Weather Summary for West Central and Southwest Florida

This May we saw above normal temperatures with averages running about 1.5 to 3.5 degrees above the 1991-2020 normals. This placed several locations in the Top Ten Warmest Mays since records began. As for meteorological Spring 2025 (March/April/May), temperatures averaged from near normal to about 2.5 degrees above normal with a few sites ending up in the Top Ten Warmest for Spring.

The graphic below depicts the high and low temperature departure from normal for each day during Spring (March/April/May) 2025 at Tampa International Airport. You'll notice that there are more days with lows that were well above normal (orange bars) compared to the high temperatures which had numerous days that were near to slightly below normal (white/light blue bars). This helped push average temperatures above normal during May and slightly above normal for the Spring.

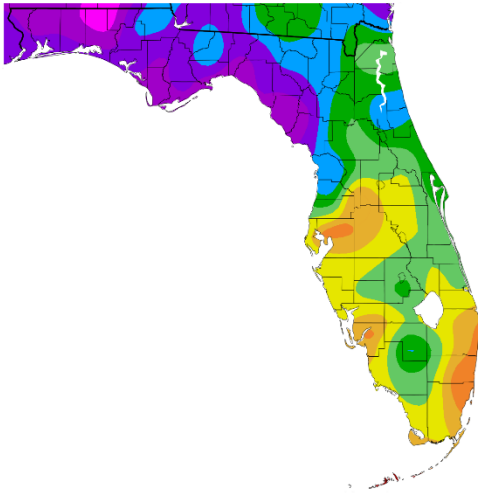

MAY TEMPERATURE RANKINGS (°F) :

Location	Rank	May 2025 Avg Temp	Normal May Temp	Dep fm Normal	Records Began
Tampa Area	2nd Warmest	82.6°	79.5°	+3.1°	Apr 1890

Graphics Source: NOAA Regional Climate Centers

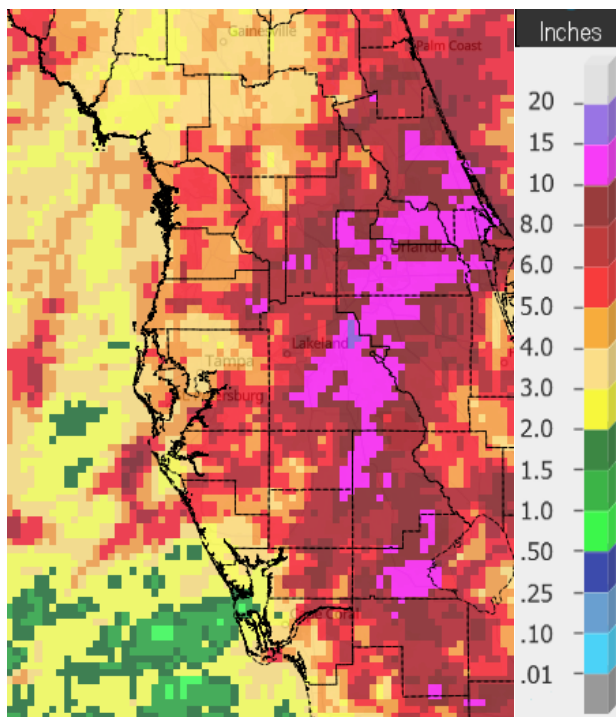

As for rainfall, March and April were rather dry with less than 25 percent of normal rainfall across much of West Central and Southwest Florida, but parts of the northern Nature Coast were above normal. As for May, the interior and eastern half of the Florida peninsula saw above normal rainfall thanks to many days of southwest to west flow, while closer to the west coast remained rather dry.
