Preliminary October 2024 Climate Summary for West Central and Southwest Florida

October 2024 started out rather hot and humid, but during the second week Hurricane Milton moved across the area followed by some drier air and more seasonable temperatures. As a result, temperatures are averaging near to slightly above normal so far this month.

Temperature (F)
10/1/2024 - 10/27/2024

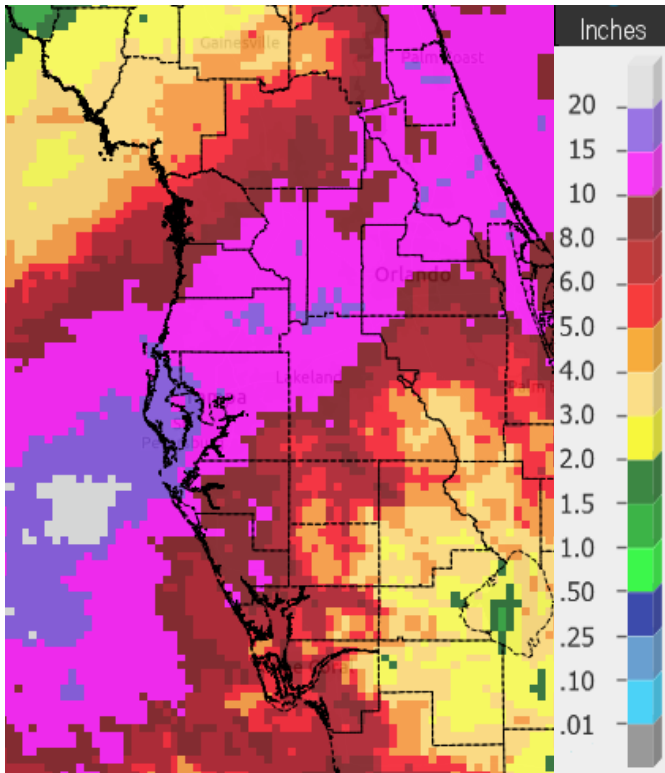

Departure from Normal Temperature (F)
10/1/2024 - 10/27/2024

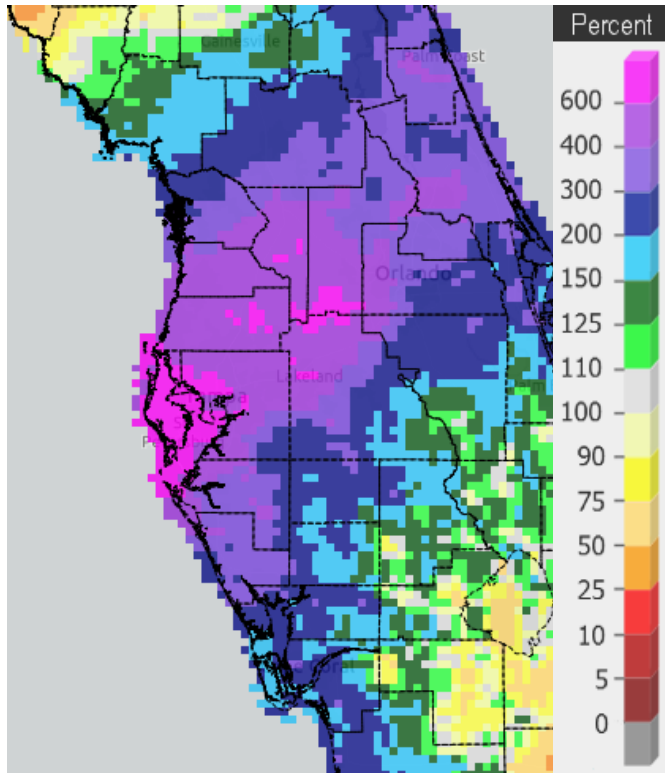

Graphics Source: NOAA Regional Climate Centers

Rainfall in October 2024 has been well above normal across much of the area thanks to Hurricane Milton, with some locations setting a new daily and a new monthly rainfall record for October. However, a few of these sites did go out during the Milton and the total amount during the event is unavailable. As can be seen in the images below much of the Nature Coast south through Tampa Bay and Interstate 4 corridor is running more than 300 percent of normal (purple areas on right image), with some areas over 600 percent of normal (fuchsia color on right image).

Rainfall October 1-27, 2024

Percent of Normal

On the following pages are tables of the Top Ten Warmest, Coolest, Driest, and Wettest Octobers at some official NWS locations, which include the average/total so far for this October where available, and the 1991-2020 Normal (average) temperature and rainfall for the month of October.

CHIEFLAND 5 SE (records began in July 1956):

Warmest Octobers		Coolest Octobers		Wettest Octobers		Driest Octobers
