Graphics Source: NOAA Regional Climate Centers

As for rainfall it was mostly well above normal, especially thanks to Hurricane Ian which moved across the region dropping heavy rainfall from Sarasota and western Charlotte counties northeast across Manatee, Hardee, Desoto and Polk counties. This placed several locations in the Top Ten Wettest for September. The exception to this was across the northern Nature Coast which did not receive much rainfall from Ian and ended up being less than 75 percent of normal (orange areas on right image below) for the month.
