Key Messages

- Widespread dense fog across eastern and northeastern Kansas this morning.
- Visibilities of ¼ mile or less will occur.
- A Dense Fog Advisory is in effect through 10:00 A.M. for the counties shown on the map.
- Use caution when driving and use low beam headlights.
**What We Know**

- There is the potential for winter weather impacting the region *Christmas evening through Tuesday*.
- A mix of rain and snow are the main impacts at this time, with perhaps all snow in northern and north central Kansas.
- The highest potential (30-40% chance) for accumulating snowfall currently appears to be across far northern KS.

**Unanswered Questions**

- Exact track of the storm
- Snow amount details
- Location of rain/snow mix versus all snow areas

**What You Can Do Now**

- Monitor forecast closely in the coming days
