Hail larger than baseball size damaged homes, businesses, and vehicles.

FRANKLIN COUNTY --- 3.0 SSE MEG [35.36, -93.86]				
	04/11/22 16:44 CST		0	Hail (1.00 in)
	04/11/22 16:44 CST		0	Source: Social Media

SEBASTIAN COUNTY --- 1.4 N BEVERLY [35.40, -94.10]				
	04/11/22 16:48 CST		0	Hail (0.75 in)
	04/11/22 16:48 CST		0	Source: Public

Severe thunderstorms developed across west central Arkansas during the afternoon and evening hours of the 11th, as a cold front moved through the area. The air mass ahead of the front had become very unstable by mid afternoon. This instability, combined with strong wind shear, promoted the development of supercell thunderstorms that produced hail up to baseball size and a couple tornadoes.

WASHINGTON COUNTY --- 3.0 ENE SONORA [36.19, -94.00]				
	04/13/22 08:28 CST		0	Hail (0.88 in)
	04/13/22 08:28 CST		0	Source: Trained Spotter

BENTON COUNTY --- 2.7 NNE SILOAM SPGS [36.22, -94.52], 2.9 N SILOAM SPGS [36.22, -94.52], 3.0 NNE SILOAM SPGS [36.22, -94.52], 2.7 NNE SILOAM SPGS [36.22, -94.52]				
	04/13/22 08:39 CST		0	Flash Flood (due to Heavy Rain)
	04/13/22 12:00 CST		0	Source: Public

Portions of Country Club Drive were reported flooded and closed.

WASHINGTON COUNTY --- 0.6 E GOSHEN [36.10, -93.99], 0.4 E GOSHEN [36.10, -93.99], 0.4 ENE GOSHEN [36.10, -93.99], 0.7 ENE GOSHEN [36.10, -93.99]				
	04/13/22 08:40 CST		50K	Flash Flood (due to Heavy Rain)
	04/13/22 14:00 CST		0	Source: Broadcast Media

Portions of several roads were flooded, and flood water entered a business.

Storm Data and Unusual Weather Phenomena - April 2022

Portions of several roads were flooded by heavy rainfall.				
CARROLL COUNTY --- 3.0 N CABANAL [36.32, -93.53], 1.9 N CABANAL [36.31, -93.53], 2.1 ENE CABANAL [36.29, -93.50], 2.2 WSW GREEN FOREST [36.31, -93.49]				
	04/13/22 14:00 CST	1	0	Flood (due to Heavy Rain)
	04/13/22 21:00 CST		0	Source: Emergency Manager
A vehicle driven into a flooded low water crossing near the intersection of county roads 705 and 741 was swept away, with the driver drowning in the flood water. Heavy rainfall had ended by early afternoon, but some low water crossings remained flooded well after the rain had stopped.				
Direct Fatalities: F71VE				
A line of thunderstorms developed into northwestern Arkansas during the morning of the 13th, as a cold front moved into the area. A strong thunderstorm within the line produced hail up to nickel size. More impactfully, this line of showers and thunderstorms was slow-moving, with individual cells within the line moving northeasterly repeatedly across the same areas, which resulted in locally heavy rainfall. Two to four inches of rain occurred locally, which subsequently resulted in flash flooding across portions of Benton, Washington, Carroll, and Madison Counties. After the rainfall had ended, some low water crossings remained flooded for hours, and a woman drowned when she attempted to drive through one of these low water crossings in Carroll County.				
WASHINGTON COUNTY --- 1.0 SW SPRINGDALE [36.17, -94.14]				
	04/16/22 03:00 CST		50K	Hail (1.50 in)
	04/16/22 03:00 CST		0	Source: Public

Storm Data and Unusual Weather Phenomena - April 2022

Location	Date/Time	Deaths & Injuries	Property & Crop Dmg	Event Type and Details
----------	-----------	-------------------	---------------------	------------------------

Half dollar size hail damaged homes, businesses, and vehicles.

WASHINGTON COUNTY --- 1.0 W SPRINGDALE [36.18, -94.15]

04/16/22 03:01 CST			0.10M	Hail (2.00 in)

Hen egg size hail damaged homes, businesses, and vehicles.

WASHINGTON COUNTY --- SPRINGDALE [36.18, -94.13]

04/16/22 03:05 CST			0.15M	Hail (2.50 in)
04/16/22 03:05 CST			0	Source: Broadcast Media

Tennis ball size hail damaged homes, businesses, and vehicles.

SEBASTIAN COUNTY --- 1.5 NNE BEVERLY [35.40, -94.09]

04/16/22 05:09 CST			0	Hail (0.75 in)
04/16/22 05:09 CST			0	Source: Public

CRAWFORD COUNTY --- 2.0 N ALMA [35.51, -94.23]

04/16/22 07:33 CST			0	Hail (0.75 in)
04/16/22 07:33 CST			0	Source: Public

Severe thunderstorms developed into northwestern Arkansas during the early morning hours of the 16th. The combination of moderately strong instability and strong deep layer wind shear resulted in some of the thunderstorms becoming supercells. These storms produced hail up to tennis ball size.

CARROLL COUNTY --- EUREKA SPGS [36.40, -93.73]

04/20/22 23:18 CST			0	Hail (0.75 in)
04/20/22 23:18 CST			0	Source: Public

Strong thunderstorms developed along a cold front that moved into northwestern Arkansas during the early morning hours of the 21st. The strongest storms produced hail up to penny size.

OKLAHOMA, Eastern

(OK-Z049) PUSHMATAHA, (OK-Z053) CHOCTAW, (OK-Z054) OSAGE, (OK-Z055) WASHINGTON, (OK-Z059) PAWNEE, (OK-Z073) PITTSBURG

04/01/22 00:00 CST			0	Drought
04/30/22 23:59 CST			0	

A number of widespread precipitation events occurred across eastern Oklahoma during April. As a result, much of the area received above normal precipitation for the month. Much of the region south of a Bristow to Jay line received between four and ten inches of rain during the month, which was 110 percent to 250 percent above the average precipitation for the month. This rainfall resulted in the elimination of severe drought (D2) and extreme drought (D3) conditions across portions of Choctaw, Pushmataha, and Pittsburg Counties during the month. Much of the region north of a Bristow to Jay line experienced below average precipitation for the month, with portions of Osage and Pawnee Counties only receiving between 10 and 25 percent of average values. Severe drought (D2) conditions continued across portions of Osage, Pawnee, and Washington Counties, and even worsened to extreme drought (D3) conditions across portions of Osage and Pawnee Counties. Monetary damage estimates as a result of the drought conditions were not available.

(OK-Z068) CHEROKEE, (OK-Z073) PITTSBURG

04/10/22 10:00 CST			0	Wildfire
04/11/22 20:00 CST			0	

Unseasonably warm temperatures, strong south to southwest wind gusts, and low humidity combined with dormant, dry fine fuels to promote conditions that supported the rapid spread of wildfire across eastern Oklahoma during mid April. Numerous wildfires occurred across the region during this period, but the largest fires affected Cherokee County where over 1300 acres were burned, and Pittsburg County where over 350 acres were burned.

PAWNEE COUNTY --- 5.0 NW PAWNEE [36.38, -96.86]

Storm Data and Unusual Weather Phenomena - April 2022

<p>Strong to severe thunderstorms developed across northeastern Oklahoma during the late evening of the 10th and early morning hours of the 11th, as a cold front moved into the area. The strongest thunderstorms produced hail up to penny size, and damaging wind gusts.</p> <p>Additional thunderstorms developed along and ahead of the cold front during the afternoon and evening hours as it moved into southeastern Oklahoma. The air mass ahead of the front had become very unstable by mid afternoon. This instability, combined with strong wind shear, promoted the development of supercell thunderstorms that produced hail up to golf ball size.</p>				
ADAIR COUNTY --- 1.6 W STILWELL [35.82, -94.66], 4.3 E STILLWELL ARPT [35.84, -94.55]				
	04/13/22 07:50 CST		0.30M	Tornado (EF1, L: 6.50 mi , W: 700 yd)
	04/13/22 07:59 CST	1	0	Source: NWS Storm Survey
<p>This tornado developed south of the E 820 Road and west of the S 4700 Road, where large tree limbs were snapped and homes were damaged. It moved east-northeast across the cemetery snapping softwood trees. The tornado then moved across the northwest and north sides of Stilwell, where the roofs of a number of apartment buildings were damaged, homes were damaged, outbuildings were destroyed, trees were uprooted, and power poles were blown down. Several businesses were damaged as it crossed Highway 59, a semi truck was blown over, and trees were uprooted. As the tornado moved east-northeast from Stilwell, numerous trees were uprooted, outbuildings were damaged, and some trees and power poles were snapped from the S 4720 Road to near the S 4757 Road. The tornado appeared to dissipate just east of the S 4757 road. Based on this damage, maximum estimated wind in the tornado was 95 to 105 mph.</p>				
LATIMER COUNTY --- 1.8 NNE WILBURTON [34.95, -95.31]				
	04/13/22 08:39 CST		25K	Thunderstorm Wind (EG 70 kt)
	04/13/22 08:39 CST		0	Source: NWS Storm Survey
<p>A shallow vortex, known as a gustnado, developed along the leading edge of thunderstorm outflow and damaged the roof of a church, snapped large tree limbs, and blew down a power pole. This vortex was recorded by a security camera.</p> <p>A line of strong to severe thunderstorms moved through eastern Oklahoma during the morning hours of the 13th, ahead of a cold front that moved through the area. Wind damage occurred with the stronger storms within the line. Very strong low level wind shear combined with marginally strong instability to result in a few strong low level circulations along the leading edge of the line of thunderstorms as it moved eastward. One such circulation produced a tornado in Adair County.</p>

<hr/>				
<p>Severe thunderstorms developed ahead of the dry line over portions of eastern Oklahoma during the evening of the 15th. The combination of moderately strong instability and strong deep layer wind shear resulted in some of the thunderstorms becoming supercells. These storms produced hail up to tennis ball size as they moved across eastern Oklahoma during the evening of the 15th, and early morning hours of the 16th.</p>

	04/25/22 08:00 CST		0	Flood (due to Heavy Rain)
	04/27/22 01:45 CST		0	Source: Official NWS Observations
<hr/>				
<p>The Poteau River near Panama rose above its flood stage of 29 feet at 9:00 am CDT on April 25th. The river crested at 33.12 feet at 5:15 am CDT on the 26th, resulting in moderate flooding. Agricultural lands and rural roads were flooded. The river fell below flood stage at 2:45 am CDT on the 27th.</p>				
<hr/>				
<p>Thunderstorms became widespread across southeastern Oklahoma by early evening of the 24th, as a cold front moved slowly into the region. The moisture content of the air ahead of the cold front was unseasonably high, and the thunderstorms moved repeatedly across some of the same areas due to the middle and upper level winds being parallel to the front. Widespread rainfall continued through the morning hours of the 25th, with two to six inches of rain occurring across much of southeastern Oklahoma. This rainfall, combined with the previous day's rain, resulted in rises along area creeks and rivers, with moderate flooding occurring along the Poteau River near Panama.</p>
