

Storm Data and Unusual Weather Phenomena - June 2025

Location	Date/Time	Deaths & Injuries	Property & Crop Dmg	Event Type and Details
ARKANSAS, Northwest				
SEBASTIAN COUNTY --- 2.0 WSW FT SMITH TWIN CITY A [35.41, -94.35], 1.2 WSW FT SMITH TWIN CITY A [35.41, -94.34]				
	06/06/25 06:45 CST		0	Tornado (EFU, L: 0.80 mi , W: 250 yd)
	06/06/25 06:46 CST		0	Source: NWS Storm Survey
This is the first segment of a two segment tornado. This tornado developed just west of the Arkansas River , south of I-540 in an open area, and traveled across the river to the Port of Van Buren . No known damage occurred west of the river in Sebastian County, thus this segment of the tornado was rated EF-unknown.				
CRAWFORD COUNTY --- 0.0 SE VAN BUREN [35.43, -94.35], 0.8 ENE VAN BUREN [35.43, -94.34]				
	06/06/25 06:46 CST		0.50M	Tornado (EF1, L: 0.80 mi , W: 120 yd)
	06/06/25 06:47 CST	1	0	Source: NWS Storm Survey
This tornado developed in southeast Van Buren , near S 4th Street and Wood Street. The tornado moved rapidly northeast into the area just south of the Baptist Health-Van Buren complex. A commercial building was damaged, along with multiple homes on Ozier Street, Mulberry Street, and S 19th Street. Winds that reached near 105 mph blew in walls that contained windows of two homes. This over-pressured the two homes, resulting in one home losing its entire roof, and the other losing a substantial portion of its roof. The tornado also uprooted trees and blew down power poles. The tornado quickly dissipated, lasting a little more than one minute.				
CRAWFORD COUNTY --- 1.2 SSE VAN BUREN [35.41, -94.34], 1.3 SE VAN BUREN [35.42, -94.33]				
	06/06/25 06:46 CST		15K	Tornado (EF0, L: 0.40 mi , W: 250 yd)
	06/06/25 06:47 CST		0	Source: NWS Storm Survey
This is the second segment of a two segment tornado. The tornado crossed the Arkansas River and moved into the Port of Van Buren . It damaged a fabric and metal storage building, and damaged the roof of another building. The tornado dissipated as it left the port area. It produced a tornadic debris signature from the KSRX WSR-88D radar. Based on this damage, maximum estimated wind in this segment of the tornado was 80 to 85 mph.				
CRAWFORD COUNTY --- 1.0 SW SHIBLEY [35.44, -94.31], 0.4 SE SHIBLEY [35.45, -94.30]				
	06/06/25 06:49 CST		5K	Tornado (EF0, L: 1.10 mi , W: 550 yd)
	06/06/25 06:51 CST		0	Source: NWS Storm Survey
This tornado traveled near the Union Pacific Railroad line, north of Kibler Road and west of Shibley Road. The tornado snapped large limbs from some trees, and produced minor damage to the roofs of some homes. Based on this damage, maximum estimated wind in the tornado was 80 to 85 mph.				
SEBASTIAN COUNTY --- 2.0 SSE HACKETT [35.15, -94.40]				
	06/06/25 06:51 CST		0	Thunderstorm Wind (EG 65 kt)

Strong thunderstorm wind blew down trees.

Storm Data and Unusual Weather Phenomena - June 2025

Location	Date/Time	Deaths & Injuries	Property & Crop Dmg	Event Type and Details
Scattered strong to severe thunderstorms developed across portions of northwestern Arkansas during the late afternoon and evening of the 13th, as warm, moist and unstable air was drawn over a stationary front across the area. The strongest storm produced damaging wind and hail up to half dollar size.				

BENTON COUNTY --- 2.5 NNE MAYSVILLE [36.43, -94.56], 0.4 NNE BEATY [36.45, -94.52]				
	06/18/25 00:20 CST		0	Tornado (EF1, L: 3.20 mi , W: 800 yd)
	06/18/25 00:24 CST		0	Source: NWS Storm Survey

This tornado developed south of Leonard Ranch Road and east of School House Road. It moved east, uprooting numerous trees along Leonard Ranch Road, and then turned northeast as it approached Beaty Road. Numerous trees were uprooted as it crossed Beaty Road and Big Spring Road, before the tornado dissipated. Based on this damage, maximum estimated wind in the tornado was 100 to 105 mph.

BENTON COUNTY --- 2.5 N HIGHFILL [36.31, -94.35], 1.4 W VAUGHN [36.32, -94.32]				
	06/18/25 00:29 CST		0.50M	Tornado (EF1, L: 1.70 mi , W: 300 yd)
	06/18/25 00:32 CST		0	Source: NWS Storm Survey

This tornado developed just west of True Road, south of Daniels Road, where trees were uprooted. It moved northeast, severely damaging the northern portion of five chicken houses, and then crossed Daniels Road into a subdivision of homes. Several homes in the southeast section of this subdivision received significant structural damage to their roofs, and numerous others received minor damage to their roofs. The tornado continued to move east-northeast after it crossed Mason Valley Road, and uprooted trees near the intersection of Vaughn Road and Wagner Road, before dissipating. Based on this damage, maximum estimated wind in the tornado was 95 to 105 mph.

WASHINGTON COUNTY --- 3.0 SW TONTITOWN [36.15, -94.27]				
	06/18/25 00:38 CST		0	Thunderstorm Wind (EG 65 kt)
	06/18/25 00:38 CST		0	Source: Public

Strong thunderstorm wind blew down a large tree.

WASHINGTON COUNTY --- 1.2 ENE WEST FORK [35.94, -94.16], 3.1 WNW HICKS [35.94, -94.12]				
	06/18/25 00:54 CST		25K	Tornado (EF1, L: 2.30 mi , W: 300 yd)
	06/18/25 00:58 CST		0	Source: NWS Storm Survey

This tornado developed east of Highway 71, along Mineral Springs Road. It moved east along Mineral Springs Road, severely damaging a couple outbuildings, uprooting multiple trees, and snapping numerous large tree limbs. Based on this damage, maximum estimated wind in the tornado was 90 to 100 mph.

Thunderstorms developed over north central and northwestern Oklahoma during the early evening of the 17th, near an outflow boundary from earlier thunderstorms, and north of a developing warm front that stretched across the area. The atmosphere ahead of the thunderstorms over eastern Oklahoma and northwestern Arkansas had become very unstable. The strong instability combined with strong wind fields and strong wind shear associated with an intense upper level disturbance moving through the region, resulted in a few supercells that evolved into a severe squall line that moved into northwestern Arkansas during the late evening of the 17th, and early morning hours of the 18th. Damaging wind and a several tornadoes occurred as the storms moved through the area.

BENTON COUNTY --- 3.0 S HIWASSE [36.39, -94.33]				
	06/28/25 18:17 CST		0	Hail (0.75 in)
	06/28/25 18:17 CST		0	Source: Public

Isolated thunderstorms developed across portions of northwestern Arkansas during the evening of the 28th, the strongest of which produced hail up to penny size.

BENTON COUNTY --- 1.0 WSW CENTERTON [36.34, -94.30]				
	06/29/25 17:20 CST		0	Thunderstorm Wind (EG 65 kt)
	06/29/25 17:20 CST		0	Source: Local Official

Strong thunderstorm wind blew down a tree.

Strong to severe thunderstorms organized over eastern Kansas and western Missouri during the morning and afternoon of the 29th. These storms moved south-southeast and into far northwestern Arkansas during the evening. The strongest storms produced damaging wind.

OKLAHOMA, Eastern

Storm Data and Unusual Weather Phenomena - June 2025

Strong thunderstorm wind blew down power lines in and around town.				
SEQUOYAH COUNTY --- 2.5 W VIAN [35.50, -95.01], 0.5 NW MC KEY [35.49, -94.89]				

Storm Data and Unusual Weather Phenomena - June 2025

Location	Date/Time	Deaths & Injuries	Property & Crop Dmg	Event Type and Details
	06/06/25 05:52 CST		30K	Tornado (EF1, L: 7.60 mi , W: 1100 yd)
	06/06/25 06:02 CST		0	Source: NWS Storm Survey

This tornado developed west of Vian, between I-40 and Highway 64. The tornado moved east-southeast along and just north of I-40 to the vicinity of the Vian exit on I-40. The tornado continued east-southeast down I-40, and then crossed Highway 64 near the E 1060 Road. It then turned east, moving along the E 1060 Road for about 1.6 miles before turning the northeast and dissipating near McKey Road, southwest of the community of McKey. The tornado uprooted trees, and damaged barns and homes. Based on this damage, maximum estimated wind in the tornado was 90 to 95 mph.

HASKELL COUNTY --- 3.0 ENE WHITEFIELD [35.27, -95.18]

06/06/25 05:55 CST	0	Thunderstorm Wind (MG 58 kt)
06/06/25 05:55 CST	0	Source: Mesonet

The Oklahoma Mesonet station near Stigler measured thunderstorm wind gusts up to 67 mph.

SEQUOYAH COUNTY --- 0.3 NE MC KEY [35.48, -94.88], 1.6 WNW SALLISAW [35.48, -94.82]

06/06/25 06:04 CST	0	Tornado (EF1, L: 3.00 mi , W: 650 yd)
06/06/25 06:07 CST	0	Source: NWS Storm Survey

This tornado formed southwest of the community of McKey, and moved southeast initially, before turning to the northeast and dissipating northwest of Sallisaw. The tornado uprooted trees, and snapped large tree limbs along its path. Based on this damage, maximum estimated wind in the tornado was 90 to 95 mph.

SEQUOYAH COUNTY --- 2.0 ENE SALLISAW [35.48, -94.77], 3.0 S AKINS [35.48, -94.70]

06/06/25 06:12 CST	20K	Tornado (EF1, L: 4.00 mi , W: 650 yd)
06/06/25 06:17 CST	0	Source: NWS Storm Survey

This tornado formed between North Wheeler Avenue and the S 4640 Road, to the north of the E 1060 Road. The tornado traveled east-southeast, crossing the E 1060 Road near the S 4650 Road, and continued to the S 4670 Road before dissipating. It uprooted trees and damaged outbuildings. Based on this damage, maximum estimated wind in the tornado was 90 to 95 mph.

LE FLORE COUNTY --- 2.9 SSW COWLINGTON [35.26, -94.80]

06/06/25 06:30 CST	0	Thunderstorm Wind (EG 65 kt)
06/06/25 06:30 CST	0	Source: Emergency Manager

Strong thunderstorm wind blew down a tree onto Highway 9.

SEQUOYAH COUNTY --- 0.4 SE LIBERTY [35.48, -94.57], 1.5 E REMY [35.48, -94.50]

06/06/25 06:31 CST	20K	Tornado (EF1, L: 3.60 mi , W: 900 yd)
06/06/25 06:35 CST	0	Source: NWS Storm Survey

This tornado developed in the western sections of the community of Liberty. It moved along and just south of the E 1060 Road. The tornado produced minor damage to the school roof, uprooted trees, and blew down power poles. Based on this damage, maximum estimated wind in the tornado was 85 to 90 mph.

Strong to severe thunderstorms developed during the evening of the 5th over southeast Colorado, southwest Kansas, and the western Oklahoma Panhandle. The storms moved southeast through the early morning hours of the 6th, evolving into a well-organized squall line by the time they moved into eastern Oklahoma. The line of strong to severe thunderstorms produced several tornadoes and damaging wind across eastern Oklahoma.

PAWNEE COUNTY --- 2.7 NE PAWNEE [36.36, -96.77]

Strong thunderstorm wind blew down trees and power lines.

PITTSBURG COUNTY --- 4.3 NE ARPELAR [34.97, -95.91], 0.9 ENE NORTH MC ALESTER [34.95, -95.76]

06/07/25 04:52 CST	0.10M	Tornado (EF1, L: 8.90 mi , W: 2000 yd)
06/07/25 05:01 CST	0	Source: NWS Storm Survey

A line of thunderstorms approaching McAlester rapidly organized and developed a strong push of wind as it approached Pyle Mountain . Those winds contributed to the development of a large squall line circulation (QLCS), and resulted in the development of a tornado near Pyle Mountain. The tornado traveled east-southeast, crossing the Indian Nation Turnpike, and moved into the area around the State Penitentiary. Minor damage occurred at the McAlester-Pittsburg County Emergency Operations Center. The strong push of wind, which initially contributed to the development of the tornado, strengthened further and became the dominate feature. The tornado dissipated in north McAlester after crossing north Main Street. It uprooted numerous trees, and damaged homes, buildings and businesses. Based on this damage, maximum estimated wind in the tornado was 90 to 95 mph.

PITTSBURG COUNTY --- 0.5 NW MC ALESTER [34.94, -95.78]

06/07/25 05:00 CST	0.10M	Thunderstorm Wind (EG 70 kt)

Storm Data and Unusual Weather Phenomena - June 2025

Location	Date/Time	Deaths & Injuries	Property & Crop Dmg	Event Type and Details
	06/17/25 23:36 CST		0.30M	Tornado (EF1, L: 4.30 mi , W: 350 yd)
	06/17/25 23:41 CST		0	Source: NWS Storm Survey

This tornado developed on the east side of Pryor, south of Highway 20 and east of S Bailey Street. It moved northeast across Highway 20 and NE 1st Street, where a metal building structure was severely damaged, and the roof of a funeral home was damaged. Numerous trees were uprooted and snapped. The tornado continued to move northeast, crossing the W 480 and W 470 Roads, before turning more easterly. It then crossed the N 434 and N 435 Roads before dissipating. The roof of a home was damaged, several outbuildings were damaged or destroyed, and large tree limbs were snapped in the portion of the tornado north of NE 5th Street. Based on this damage, maximum estimated wind in the tornado was 100 to 105 mph.

MAYES COUNTY --- 1.9 SSW BOATMAN [36.24, -95.19], 4.6 NNW ROSE [36.28, -95.05]

06/17/25 23:42 CST	0	Tornado (EF1, L: 8.20 mi , W: 750 yd)
06/17/25 23:52 CST	0	Source: NWS Storm Survey

This tornado began south of Boatman, west of the S 439 Road. It moved east-northeast, uprooting trees and snapping numerous large tree limbs as it crossed the S 439 and S 440 Roads, as well as the E 530 Road. It moved across Lake Hudson, and then Highway 82. The tornado moved northeast, roughly paralleling the E 523 Road, and then crossed the S 4437th Road, and the E 508 Road before dissipating. Numerous trees were snapped or uprooted in the path east of Lake Hudson. This tornado produced a tornadic debris signature from the KINX WSR-88D. Based on this damage, maximum estimated wind in the tornado was 105 to 110 mph.

ROGERS COUNTY --- 4.7 NW TALALA [36.57, -95.75]

06/17/25 23:45 CST	0	Thunderstorm Wind (MG 63 kt)
06/17/25 23:50 CST	0	Source: Mesonet

The Oklahoma Mesonet station near Talala measured thunderstorm wind gusts from 62 mph to 72 mph for over five minutes.

ROGERS COUNTY --- 4.0 WSW OOLOGAH [36.43, -95.77]

06/17/25 23:47 CST	0	Thunderstorm Wind (MG 52 kt)
06/17/25 23:47 CST	0	Source: Emergency Manager

Thunderstorm wind gusts were measured to 60 mph.

CHEROKEE COUNTY --- 2.0 NE THOMPSON CORNER [35.94, -95.06], 2.3 NW TAHLEQUAH ARPT [35.95, -95.02]

06/17/25 23:53 CST	10K	Tornado (EF1, L: 1.80 mi , W: 700 yd)
06/17/25 23:55 CST	0	Source: NWS Storm Survey

This tornado developed west of Baker Road and south of Grandview Road. It moved east-northeast, uprooting numerous trees and damaging an outbuilding. Based on this damage, maximum estimated wind in the tornado was 95 to 105 mph.

CHEROKEE COUNTY --- 0.1 SE SCRAPER [36.10, -94.83]

06/17/25 23:55 CST	20K	Thunderstorm Wind (EG 65 kt)
06/17/25 23:55 CST	0	Source: Amateur Radio

Strong thunderstorm wind blew down a tree onto a house.

CHEROKEE COUNTY --- 2.5 NNW TAHLEQUAH ARPT [35.95, -95.02], 2.8 NNW ROBBINS [35.94, -94.89]

06/17/25 23:56 CST	50K	Tornado (EF1, L: 6.90 mi , W: 600 yd)
06/18/25 00:02 CST	0	Source: NWS Storm Survey

This tornado developed north of Burchett Road and west of Bryant Road. It moved east-southeast across the northern portion of Tahlequah, and then crossed Highway 10 and the Illinois River east of town. The tornado snapped and uprooted numerous trees along its path, some of which fell onto homes. This tornado produced a tornadic debris signature from the KINX and KSRX WSR-88Ds. Based on this damage, maximum estimated wind in the tornado was 105 to 110 mph.

DELAWARE COUNTY --- 1.3 NW TOPSY [36.46, -94.99], 3.4 NE TOPSY [36.49, -94.93]

06/17/25 23:59 CST	20K	Tornado (EF1, L: 3.70 mi , W: 700 yd)
06/18/25 00:04 CST	0	Source: NWS Storm Survey

This tornado developed within a squall line to the northwest of Eucha, and moved northeast for nearly 4 miles. The tornado was embedded in a precipitation core within the line. Many trees were uprooted or snapped along the path. Three power poles were damage when trees fell on the associated lines. A few homes received minor damage, mostly from falling trees, and a poultry house was overturned. Based on this damage, maximum estimated wind in the tornado was 90 to 100 mph.

CHEROKEE COUNTY --- 3.0 NNW ROBBINS [35.94, -94.89], 1.9 E ELDON [35.93, -94.80]

Storm Data and Unusual Weather Phenomena - June 2025

Location	Date/Time	Deaths & Injuries	Property & Crop Dmg	Event Type and Details
	06/18/25 00:04 CST		50K	Tornado (EF1, L: 5.40 mi , W: 1000 yd)
	06/18/25 00:10 CST		0	Source: NWS Storm Survey

This is the first segment of a two segment tornado. The tornado developed north of Highway 62 and west of the 742 Road. It moved east through the 580 Road, and then turned more southeast, crossing Highway 62, and then moved into Adair County. The tornado uprooted and snapped numerous trees, some of the trees fell onto homes. Based on this damage, maximum estimated wind in this segment of the tornado was 95 to 105 mph.

ADAIR COUNTY --- 2.0 NNW TITANIC [35.93, -94.80], 1.9 NE TITANIC [35.92, -94.76]

06/18/25 00:10 CST	0	Tornado (EF1, L: 2.30 mi , W: 650 yd)

Strong thunderstorm wind damaged several green houses.

ADAIR COUNTY --- 3.0 NNW ADDIELEE [36.01, -94.64]

06/18/25 00:25 CST	0	Thunderstorm Wind (MG 54 kt)
06/18/25 00:25 CST	0	Source: Mesonet

The Oklahoma Mesonet station near Westville measured thunderstorm wind gusts to 62 mph.

OTTAWA COUNTY --- 3.4 SSE WYANDOTTE [36.76, -94.70]

06/18/25 00:25 CST	0	Thunderstorm Wind (EG 65 kt)
06/18/25 00:25 CST	0	Source: Emergency Manager

Strong thunderstorm wind blew down a tree onto Highway 10.

Thunderstorms developed over north central and northwestern Oklahoma during the early evening of the 17th, near an outflow boundary from earlier thunderstorms, and north of a developing warm front that stretched across the area. The atmosphere ahead of the thunderstorms over eastern Oklahoma had become very unstable. The strong instability combined with strong wind fields and strong wind shear associated with an intense upper level disturbance moving through the region, resulted in a few supercells that evolved into a severe squall line that moved through the area during the mid to late evening of the 17th, and early morning of the 18th. Widespread damaging wind, multiple tornadoes, and large hail up to golf ball size occurred across northeastern Oklahoma as the storms moved through the area.

TULSA COUNTY --- (TUL)TULSA INTL ARPT [36.20, -95.88]

06/27/25 14:32 CST	0	Thunderstorm Wind (MG 63 kt)

06/27/25 14:59 CST	0	Thunderstorm Wind (EG 52 kt)
06/27/25 14:59 CST	0	Source: Emergency Manager

Thunderstorm wind gusts were estimated to 60 mph on Highway 88 and the E 470 Road.

MCINTOSH COUNTY --- 1.0 N EUFAULA [35.29, -95.58]

Storm Data and Unusual Weather Phenomena - June 2025

Location	Date/Time	Deaths & Injuries	Property & Crop Dmg	Event Type and Details
	06/27/25 17:40 CST	1	0	Lightning
	06/27/25 17:40 CST		0	Source: Broadcast Media

A woman was walking through Greenwood cemetery , and took shelter under a tree when a thunderstorm moved into the area. She was struck and killed by lightning.

Direct Fatalities: F57UT

Scattered strong to severe thunderstorms developed across portions of eastern Oklahoma during the afternoon through early evening hours of the 27th, ahead of an approaching upper level disturbance. The atmosphere became moderately unstable during the afternoon across the area, but wind shear was weak. This combination resulted in intense thunderstorm development that was fairly short-lived and unorganized. The strongest thunderstorms produced damaging downburst wind. A woman was struck and killed by lightning near Eufaula during the evening.

TULSA COUNTY --- 2.1 W ALSUMA [36.10, -95.91], 1.5 WNW ALSUMA [36.10, -95.90], 1.4 WSW ALSUMA [36.10, -95.89], 2.1 W ALSUMA [36.10, -95.91]	06/28/25 06:50 CST	20K	Flash Flood (due to Heavy Rain)
