Strong thunderstorm wind snapped and uprooted multiple trees.				
Strong to severe thunderstorms developed into portions of northwestern Arkansas during the early morning hours of the 18th, as strong atmospheric lift increased along and near a warm frontal boundary with the approach of an upper level disturbance. The strongest thunderstorms produced large hail to quarter size and damaging wind gusts.				
Another round of strong to severe thunderstorms developed into portions of northwestern Arkansas during the afternoon of the 18th. The strongest thunderstorms produced large hail to golf ball size and damaging wind gusts.				
WASHINGTON COUNTY --- 4.6 SSW SUMMERS [35.92, -94.52], 0.6 SSE CLYDE [35.89, -94.40]				
	05/19/25 18:14 CST		0	Tornado (EF1, L: 7.40 mi , W: 1000 yd)
	05/19/25 18:22 CST		0	Source: NWS Storm Survey
This is the second segment of a two segment tornado. The tornado developed near Snake Mountain and moved east-southeast, and then turned to the southeast crossing Salem Springs Road, Highway 59, Bush Valley Road, and then moved along Highway 45 for a time before dissipating east of Clyde. Trees were uprooted and large tree limbs were snapped along the path . It produced a tornadic debris signature from the KSRX WSR-88D. Based on this damage, maximum estimated wind in this segment of the tornado was 90 to 100 mph.				
WASHINGTON COUNTY --- 4.9 WNW MARROW [35.89, -94.52], 3.4 WNW MARROW [35.89, -94.48]				
	05/19/25 18:14 CST		0	Tornado (EF1, L: 1.90 mi , W: 2200 yd)
	05/19/25 18:16 CST		0	Source: NWS Storm Survey
This is the second segment of a two segment tornado. The tornado moved into Washington County northwest of Dutch Mills , and moved east-northeast across Highway 59 before dissipating. It uprooted numerous trees, and produced a tornadic debris signature from the KSRX WSR-88D. Based on this damage, maximum estimated wind in this segment of the tornado was 90 to 100 mph.				
WASHINGTON COUNTY --- 0.8 SW LINCOLN [35.94, -94.43], 3.6 NW WEST FORK [35.97, -94.23]				
	05/19/25 18:20 CST		0.10M	Tornado (EF1, L: 11.60 mi , W: 900 yd)
	05/19/25 18:32 CST		0	Source: NWS Storm Survey
This tornado developed along W South Street and moved across the south side of Lincoln. It moved east-northeast until it crossed County Road 438, then moved east. The tornado crossed Hogeye Road, turning northeast before dissipating east of Highway 265. The tornado damaged homes, several severely, uprooted or snapped numerous trees, snapped power poles, and destroyed outbuildings. It produced a tornadic debris signature from the KSRX WSR-88D. Based on this damage, maximum estimated wind in the tornado was 100 to 110 mph.				
WASHINGTON COUNTY --- 1.5 E LINCOLN [35.95, -94.39], 2.5 E LINCOLN [35.95, -94.38]				
	05/19/25 18:21 CST		0	Tornado (EF1, L: 1.00 mi , W: 500 yd)

Storm Data and Unusual Weather Phenomena - May 2025

Location	Date/Time	Deaths & Injuries	Property & Crop Dmg	Event Type and Details
This tornado developed north of Highway 62, and moved east for a short time. A tornadic debris signature was noted for two minutes from the KSRX WSR-88D. The tornado uprooted trees. Based on this damage, maximum estimated wind in the tornado was 90 to 100 mph.				

WASHINGTON COUNTY --- 3.0 SW (FYV)FAYETTEVILLE AR [35.97, -94.21], 1.7 WNW TUTTLE [36.04, -94.00]

05/19/25 18:29 CST	1M	Tornado (EF2, L: 13.60 mi , W: 1100 yd)
05/19/25 18:46 CST	0	Source: NWS Storm Survey

This tornado developed along SW Campbell Road, west of I-49, where trees were snapped and uprooted. It moved northeast across I-49, severely damaging a metal building structure, and then turned to the east across the southern portion of Drake Field. It then turned east-northeast, crossing Highway 16 and dissipated near Combs Bell Road. Numerous trees were snapped or uprooted along the path of this tornado, industrial buildings and homes and businesses were damaged, many power poles were snapped, and outbuildings were destroyed. The tornado produced a tornadic debris signature from the KSRX WSR-88D. Based on this damage, maximum estimated wind in the tornado was 115 to 125 mph.

BENTON COUNTY --- 2.0 E CENTERTON [36.35, -94.24], 1.2 W BENTONVILLE MUNI ARP [36.35, -94.24], 1.2 W BENTONVILLE MUNI ARP [36.35, -94.24], 1.4 W BENTONVILLE MUNI ARP [36.35, -94.24]

05/19/25 18:38 CST	0	Flash Flood (due to Heavy Rain)
05/19/25 21:38 CST	0	Source: Public

Several streets were reported flooded in Centerton.

WASHINGTON COUNTY --- 1.0 SE FAYETTEVILLE [36.06, -94.16], 0.8 ESE FAYETTEVILLE [36.07, -94.16], 1.0 ESE FAYETTEVILLE [36.07, -94.15], 1.2 SE FAYETTEVILLE [36.06, -94.15]

Several streets were reported flooded in Fayetteville.

SEBASTIAN COUNTY --- 2.3 S ENTERPRISE [35.24, -94.44], 1.1 ESE CENTRAL CITY [35.31, -94.23]

05/19/25 18:44 CST	1.50M	Tornado (EF1, L: 12.90 mi , W: 1000 yd)
05/19/25 18:59 CST	0	Source: NWS Storm Survey

This is the second segment of a two segment tornado. The tornado moved into Sebastian County west of Bonanza and moved northeast toward White Bluff. It was weak between Highway 112, across the north side of Bonanza, to just west of Highway 71, with mostly small trees uprooted and large tree limbs snapped in that segment of the path. It strengthened as it approached Highway 71, where trees were uprooted or snapped. The tornado then moved across Fort Chaffee, where 40 buildings were damaged, and trees were snapped or uprooted, and then turned east-northeast, dissipating before crossing Highway 22. It produced a tornadic debris signature from the KSRX WSR-88D. Based on this damage, maximum estimated wind in this segment of the tornado was 100 to 110 mph.

SEBASTIAN COUNTY --- 2.2 S ENTERPRISE [35.24, -94.42]

05/19/25 18:50 CST	0	Hail (1.00 in)
05/19/25 18:50 CST	0	Source: Fire Department/Rescue

Quarter size hail was reported in Bonanza.

WASHINGTON COUNTY --- 2.0 NW FAYETTEVILLE [36.09, -94.20], 1.9 NW FAYETTEVILLE [36.09, -94.19], 1.9 NW FAYETTEVILLE [36.09, -94.19], 2.0 NW FAYETTEVILLE [36.09, -94.20]

05/19/25 18:50 CST	0	Flash Flood (due to Heavy Rain)
05/19/25 21:30 CST	0	Source: Public

Portions of N Shiloh Drive were flooded.

MADISON COUNTY --- 2.8 SE WHITENER [36.09, -93.85], 1.4 WSW MARBLE [36.12, -93.60]

05/19/25 18:54 CST	0.10M	Tornado (EF1, L: 14.30 mi , W: 900 yd)
05/19/25 19:10 CST	0	Source: NWS Storm Survey

This tornado developed just east of CR 7505, along CR 7500 where trees were uprooted and large tree limbs were snapped. The tornado moved northeast, then turned to the east-southeast along CR 7755. After crossing CR 7855, the tornado moved east across the north side of Huntsville, and continued moving just south of Highway 412 until it dissipated after crossing CR 2315. The tornado snapped and uprooted numerous trees, and destroyed outbuildings. Based on this damage, maximum estimated wind in the tornado was 100 to 105 mph.

MADISON COUNTY --- 3.2 SW HARTWELL [36.08, -93.83], 2.1 SSE HARTWELL [36.09, -93.79]

Storm Data and Unusual Weather Phenomena - May 2025

Location	Date/Time	Deaths & Injuries	Property & Crop Dmg	Event Type and Details
	05/19/25 18:56 CST		60K	Tornado (EF1, L: 2.40 mi , W: 550 yd)

Portions of multiple roads were flooded across northern Sebastian County.

CRAWFORD COUNTY --- 2.0 W KIBLER [35.43, -94.27], 1.5 NNE CRUTCHER [35.44, -94.27], 1.8 WNW KIBLER [35.44, -94.26], 1.5 NE CRUTCHER [35.43, -94.26]

05/19/25 19:53 CST	0	Flash Flood (due to Heavy Rain)
05/19/25 22:15 CST	0	Source: Public

Mays Branch Creek flooded several roads west of Kibler.

Severe thunderstorms developed over central Oklahoma along and ahead of a dry line during the afternoon of the 19th, as an upper level disturbance approached the Southern Plains. These thunderstorms moved northeast off the dry line and across portions of northwestern Arkansas during the evening hours. The atmosphere east of the dry line across northwestern Arkansas became very unstable during the afternoon and evening, and this instability combined with strong deep-layer and low-level wind shear, resulted in the development of a severe squall line. Multiple tornadoes and large hail up to quarter size occurred with these thunderstorms across portions of northwestern Arkansas. Locally heavy rainfall also produced some flash flooding.

Storm Data and Unusual Weather Phenomena - May 2025

Location	Date/Time	Deaths & Injuries	Property & Crop Dmg	Event Type and Details
----------	-----------	-------------------	---------------------	------------------------

An EF-2 tornado damaged or destroyed multiple homes, businesses, and industrial buildings near Greenland, Arkansas, during the evening of May 19, 2025. The damage path was about 13.5 miles long, passing over the southern portion of Drake Field, where hangars and other buildings were damaged, and resulted in extensive tree and power pole damage. 	05/18/25 14:56 CST		0	Hail (0.75 in)
	05/18/25 14:56 CST		0	Source: Public
Strong to severe thunderstorms developed across portions of eastern Oklahoma during the late evening of the 17th and early morning hours of the 18th, as strong atmospheric lift increased along and near a warm frontal boundary with the approach of an upper level disturbance. The strongest thunderstorms produced large hail to golf ball size and damaging wind gusts.				
Another round of strong to severe thunderstorms developed across portions of eastern Oklahoma during the afternoon of the 18th. The strongest thunderstorms produced large hail slightly larger than golf ball size and damaging wind gusts.

Storm Data and Unusual Weather Phenomena - May 2025

Location	Date/Time	Deaths & Injuries	Property & Crop Dmg	Event Type and Details
This tornado developed east of Highway 10, near Scraper, and moved east. It snapped and uprooted numerous trees and destroyed an outbuilding west of the Illinois River. It crossed the Illinois River near the E 732 Road, continuing to snap and uproot trees until it dissipated north of the E 728 Road and west of the N 593 Road. Based on this damage, maximum estimated wind in the tornado was 100 to 105 mph.				
PITTSBURG COUNTY --- 3.9 S PITTSBURG [34.66, -95.86], 3.0 SSE BOND [34.78, -95.63]				
	05/19/25 16:44 CST		0.50M	Tornado (EF3, L: 16.00 mi , W: 3000 yd)
	05/19/25 17:07 CST	1	0	Source: NWS Storm Survey
This tornado developed approximately 3 miles southwest of the town of Pittsburg near Staples Road. The tornado intensified as it approached Pittsburg Lake. EF-1 to EF-2 damage was done to homes and trees just north of Pittsburg Lake on Indian Trail Road . One person was injured in the most badly damaged home. The tornado continued to grow as it passed just southeast of Pittsburg, where it did EF-1 and EF-2 damage to two homes. The tornado reached its maximum width of 1.7 miles near Blanco. Several homes just south and southwest of Blanco received significant roof damage, and a number of power poles were broken as well. Winds were estimated from 95 mph to 115 mph in these areas. The tornado turned onto a more east-northeast course leaving the immediate Blanco area. During this turn, the most intense winds stayed just south of Blanco proper. The highest rated damage was to trees 2.4 miles east of Blanco, where many trees were stripped of some bark and most branches. This occurred in a forested area where nearly all trees were downed. A rating of EF-3 was assigned to this area, with the wind speeds estimated near 140 mph. The tornado slowly weakened from this point and dissipated 9 miles east-northeast of Blanco.				
MAYES COUNTY --- 1.0 WNW MAZIE [36.10, -95.39]				
	05/19/25 16:53 CST		0	Thunderstorm Wind (EG 52 kt)
	05/19/25 16:53 CST		0	Source: Emergency Manager
Thunderstorm wind gusts were estimated to 60 mph in Mazie.				
PITTSBURG COUNTY --- 3.0 SW HARTSHORNE [34.80, -95.57]				
	05/19/25 17:10 CST		0	Hail (1.00 in)
	05/19/25 17:10 CST		0	Source: Public
PITTSBURG COUNTY --- 3.1 SE CRAIG [34.80, -95.58], 1.1 SE HARTSHORNE [34.82, -95.51]				
	05/19/25 17:14 CST		75K	Tornado (EF1, L: 3.70 mi , W: 1400 yd)
	05/19/25 17:18 CST		0	Source: NWS Storm Survey
This is the first segment of a two segment tornado. The tornado developed just southwest of Hartshorne Lake, and moved east-northeast, uprooting numerous trees and damaging outbuildings. It crossed into Latimer County just south of Highway 1. Based on this damage, maximum estimated wind in this segment of the tornado was 90 to 100 mph.				
LATIMER COUNTY --- 3.5 SSE CAMBRIA [34.82, -95.51], 0.9 ENE HOLSON [34.88, -95.41]				
	05/19/25 17:18 CST		75K	Tornado (EF1, L: 7.40 mi , W: 1500 yd)
	05/19/25 17:31 CST		0	Source: NWS Storm Survey
This is the second segment of a two segment tornado. The tornado moved into Latimer County just south of Highway 1, and moved northeast across Highway 1, the 156th Road, and along the 136th Road, before turning more east and dissipating north of the 130th Road and east of Holson Road. In Latimer County, the tornado uprooted numerous trees, damaged or destroyed outbuildings, damaged homes, and snapped power poles. Based on this damage, maximum estimated wind in this segment of the tornado was 90 to 100 mph.				
MUSKOGEE COUNTY --- 4.2 W WEBBERS FALLS [35.51, -95.20], 1.0 N WEBBERS FALLS [35.53, -95.13]				
	05/19/25 17:22 CST		50K	Tornado (EF1, L: 4.30 mi , W: 900 yd)
	05/19/25 17:28 CST		0	Source: NWS Storm Survey
This is the first segment of a two segment tornado. The tornado developed near the intersection of the N 4390 Road and the E 1035 Road, and moved east-northeast destroying outbuildings, snapping or uprooting trees, and blowing over a center pivot irrigation system before crossing the Arkansas River , and moving into Sequoyah County. It produced a tornadic debris signature from the KSRX WSR-88D. Based on this damage, maximum estimated wind in this segment of the tornado was 95 to 105 mph.				
SEQUOYAH COUNTY --- 0.8 WNW GORE [35.53, -95.13], 4.1 WSW BOX [35.57, -95.05]				
	05/19/25 17:28 CST		35K	Tornado (EF1, L: 5.20 mi , W: 750 yd)
	05/19/25 17:33 CST		0	Source: NWS Storm Survey
This is the second segment of a two segment tornado. The tornado moved into Sequoyah County west of Gore, and continued to move east-northeast across the north side of Gore. It uprooted trees, snapped large tree limbs, and damaged outbuildings until it dissipated north of the E 1000 Road and east of the S 4469 Road. It produced a tornadic debris signature from the KSRX WSR-88D. Based on this damage, maximum estimated wind in this segment of the tornado was 90 to 100 mph.

	05/19/25 17:50 CST		0	Source: Mesonet
The Oklahoma Mesonet station near Cookson measured 64 mph thunderstorm wind gusts.				
ADAIR COUNTY --- 1.1 N LYONS [35.77, -94.72], 6.3 ESE BARON [35.89, -94.52]				
	05/19/25 17:55 CST		50K	Tornado (EF1, L: 14.80 mi , W: 2200 yd)
	05/19/25 18:14 CST		0	Source: NWS Storm Survey
This is the first segment of a two segment tornado. The tornado developed just west of Stilwell City Lake. It moved east-northeast toward Blanch, and then northeast across the west and north sides of Stilwell. The tornado moved across Fairfield and then turned east- northeast before crossing into Washington County, Arkansas. Many trees were uprooted and some were snapped by this tornado, homes were damaged, outbuildings were destroyed, and power poles were blown down. A tornadic debris signature was noted from the KSRX WSR-88D. Based on this damage, maximum estimated wind in this segment of the tornado was 95 to 105 mph.				
ADAIR COUNTY --- 2.3 WSW BIDDING SPGS [35.79, -94.81], 1.7 ENE BIDDING SPGS [35.81, -94.74]				
	05/19/25 17:55 CST		0	Tornado (EF1, L: 3.90 mi , W: 1300 yd)
	05/19/25 17:58 CST		0	Source: NWS Storm Survey
This is the second segment of a two segment tornado. The tornado moved east- northeast into Adair County south of the E 830 Road, uprooting trees as it crossed the 4610 Road. The tornado dissipated after crossing the 834 Road, where trees were uprooted. Based on this damage, maximum estimated wind in this segment of the tornado was 95 to 105 mph.				
ADAIR COUNTY --- 4.6 SSE WESTVILLE [35.92, -94.53], 4.8 SE WESTVILLE [35.92, -94.52]				
	05/19/25 18:11 CST		0	Tornado (EFU, L: 0.80 mi , W: 1000 yd)
	05/19/25 18:14 CST		0	Source: Official NWS Observations
This is the first segment of a two segment tornado. The tornado developed over inaccessible terrain west of Snake Mountain, just west of state line, where a tornadic debris signature was indicated by the KSRX WSR-88D. Since the damage that produced the radar debris signature was inaccessible, this segment of the tornado was rated EF-unknown.				
LE FLORE COUNTY --- 1.0 SW OAK LODGE [35.24, -94.61]				
	05/19/25 18:18 CST		0	Hail (1.00 in)
	05/19/25 18:37 CST		0	Source: Social Media
LE FLORE COUNTY --- 0.3 ENE CALHOUN [35.10, -94.75], 1.8 NW WILLIAMS [35.19, -94.57]				
	05/19/25 18:21 CST		0	Tornado (EF1, L: 11.90 mi , W: 1100 yd)
	05/19/25 18:35 CST		0	Source: NWS Storm Survey
This tornado developed near Calhoun and moved northeast across Calhoun Road and Roy Monks Road, where trees were uprooted and large tree limbs were snapped. The tornado uprooted numerous trees and snapped numerous tree limbs as it crossed Latham Road, Highway 59, and Waterfield Street. The tornado continued to move northeast and likely dissipated west of County Road 1240. The survey team attempted to access areas east of Highway 59 where the tornado likely tracked, but all available roads into those areas were severely flooded by the Poteau River, thus the path east of Waterfield Street is estimated based on the continuation of a tornadic debris signature and tight velocity couplet from the KSRX WSR-88D. Based on this damage, maximum estimated wind in the tornado was 95 to 105 mph.				
LE FLORE COUNTY --- 0.6 SSW WILLIAMS [35.16, -94.55], 2.5 ENE POCOLA [35.24, -94.44]				
	05/19/25 18:34 CST		0	Tornado (EF1, L: 8.50 mi , W: 1000 yd)

Highway 82 was closed between Bengal Road and Highway 270 due to flooding.

CHOCTAW COUNTY --- 1.4 WNW HUGO [34.03, -95.54]				
	05/20/25 00:45 CST		0	Thunderstorm Wind (MG 56 kt)
	05/20/25 00:50 CST		0	Source: Mesonet

The Oklahoma Mesonet station near Hugo measured 58 to 65 mph thunderstorm wind gusts.

Severe thunderstorms developed over central Oklahoma along and ahead of a dry line during the afternoon of the 19th, as an upper level disturbance approached the Southern Plains. These thunderstorms moved northeast off the dry line and across portions of eastern Oklahoma during the mid afternoon and evening hours. The atmosphere east of the dry line across eastern Oklahoma became very unstable during the afternoon and evening, and this instability combined with strong deep-layer and low-level wind shear, resulted in the development of a few supercell thunderstorms and a severe squall line. Multiple tornadoes, large hail slightly larger than golf ball size, and damaging wind gusts occurred with these thunderstorms across eastern Oklahoma. Locally heavy rainfall also produced some localized flash flooding.

Storm Data and Unusual Weather Phenomena - May 2025

Location	Date/Time	Deaths & Injuries	Property & Crop Dmg	Event Type and Details
				

An EF-3 tornado damaged or destroyed multiple homes near Blanco, Oklahoma, during the late afternoon of May 19, 2025, injuring one of the occupants. The damage path was about 1.7 miles wide at times, and resulted in extensive tree damage, with areas of trees stripped of limbs and debarked. Many power poles were snapped, and numerous outbuildings were also destroyed. Photo by Steven Piltz, MIC, NWS Tulsa Oklahoma.

Half dollar size hail damaged homes and vehicles.				
Scattered strong to severe thunderstorms developed across portions of eastern Oklahoma during the early morning hours of the 24th, as the low level jet increased lift over a frontal boundary that stretched across the area. Strong elevated instability and wind shear resulted in some of the storms becoming supercells, which produced large hail up to baseball size. An organized line of severe thunderstorms that developed over southwestern Kansas during the late evening of the 23rd, moved into portions of eastern Oklahoma during the morning of the 24th. These thunderstorms produced widespread damaging wind gusts.

Portions of Wekiwa Road were flooded near 177th West Avenue.

Strong to severe thunderstorms developed into northeastern Oklahoma during the early morning hours of the 25th, as lift increased north of a warm front with the strengthening of the low level jet across the area. Very unstable air combined with strong wind shear to support the development of some supercell thunderstorms. Large hail to golf ball size occurred with the severe thunderstorms. Locally heavy rainfall also resulted in some flash flooding.
